

Dual dock triple charging clock radio

- DualDock for iPod/iPhone/iPad
- USB port for charging
- FM, dual alarm
- 8W

AJ7260D/37

Wake up to great music

with this iPod/iPhone/iPad docking station

Play and charge all your iPod/iPhone/iPad via Lightning or 30-pin connector, and get rich and clear sound. This chic dual dock alarm clock radio features an extra USB port that allow you to charge three devices at once and wakes you in time

Benefits

Enrich your sound experience

- Dual docking system to charge and play your iPod/iPhone/iPad
- Neodymium speaker driver for rich and clear sound
- 8W RMS total output power
- FM digital tuning with presets

Easy to use

- Auto clock synchronization with iPod/iPhone/iPad when docked
- Extra USB for charging an additional smartphone or tablet

- Audio-in for easy portable music playback
- Time and alarm backup for on-time wakeup even with power cut

Start the day your way

- Wake up to your iPod/iPhone/iPad music or radio tunes
- Weekday/ weekend alarm setting to complement your lifestyle
- Dual alarm to wake you and your partner at different times

Features

Neodymium speaker driver

PHILIPS

8W RMS

This system has 8W RMS total output power. RMS refers to Root Mean Square which is a typical measurement of audio power, or rather, the electrical power transferred from an audio amplifier to a loudspeaker, which is measured in watts. The amount of electrical power delivered to the loudspeaker and its sensitivity determines the sound power that is generated. The higher the wattage, the better the sound power emitted by the speaker.

FM digital tuning with presets

Digital FM radio offers you additional music options to your music collection on your Philips audio system. Simply tune into the station that you want to preset, press and hold the preset button to memorize the frequency. With preset radio stations that can be stored, you can quickly access your favorite radio station without having to manually tune the frequencies each time.

Auto clock synchronization

When connect and dock, this docking system will automatically synchronize the clock with your iPod/iPhone/iPad within a few seconds. With this convenient feature, you do not need to set the time manually.

Additional USB

Weekday/ weekend alarm

Designed with modern day lifestyles in mind, this clock radio has a dual alarm feature, allowing you to set different alarm times for weekdays and weekends or even vary the alarm settings for couples. The alarm settings can be tailored for the same alarm times for the entire week from Monday to Sunday. Or you can set the alarm for an early start on weekdays from Monday to Friday, and lazy lie-ins for Saturday and Sundays. Whichever you choose, this convenient features saves you from the hassle of fiddling with different alarm times every single night.

iPhone compatibility

Compatible with

iPhone 5
iPhone 4S

iPhone 4
iPhone 3GS
iPhone 6

AUDIO-IN (3.5mm)

Make one easy connection and enjoy all your music from portable devices and computers. Simply plug your device to the AUDIO-IN (3.5 mm) port on your Philips set. With computers, the connection is typically made from the headset output. Once linked, you can enjoy your entire music collection directly, on a set of superior speakers. Philips simply delivers better sound.

Dual alarm

The Philips audio system comes with two alarm times. Set one alarm time to wake you up and the other time to wake up your partner.

Time and alarm backup

When there is a power failure, this intelligent clock will still maintain and keep its reliable time and your settings. The scheduled alarm remains active even when its display is off - all thanks to a pre-installed battery. When the power comes back on, there is no need to adjust the clock or reinstate settings. More amazingly, even if power supply is not restored, the battery provides enough energy for the buzzer to go off at the alarm time you have set - making sure you never wake up late.
