# Highlights

## Philips bulb always included

High-quality Philips EcoLamp energy-efficient light lamps are included in the box for achieving the best light effect.

## Wall and ceiling installation

Install this lamp as a wall light or ceiling light, just the way you like it.

## Energy saving

This Philips energy-saving lamp conserves energy compared with traditional light sources, helping you to save money on your electricity bills and do your bit for the environment.

## IP44 - bathroom-safe

This Philips bathroom light is especially designed for humid environments. It was tested rigorously to ensure its water resistance. The IP level is described by two figures: the first one refers to the protection level against dust, the second against water. This bathroom light is designed with IP44: it is protected against splashing water. This product is most commonly used and ideal for the bathroom.

## Warm white light

Light can have different colour temperatures, indicated in units called Kelvin (K). Lamps with a low Kelvin value produce a warm, more cosy light, while those with a higher Kelvin value produce a cool, more energising light. This Philips lamp offers warm white light for a cosy atmosphere.

## True skin colour

This Philips bathroom light makes colours reflect in a natural and accurate way, just the way the sun would do.
