

Linksys Business Wireless-N Access Point

Wireless-N600 Dual Band Access Point with PoE (LAPN600)

Key Features

- Dual Band (2.4 GHz + 5 GHz) and speed up to 600 (300 + 300) Mbps for LAPN600
- Integrated Power over Ethernet (PoE)
- · Gigabit Ethernet port
- Workgroup Bridge Mode for Range Extension
- Industrial-strength Wi-Fi Protected Access (WPAWPA2) security and data encryption
- Advanced Security and Preventions (802.1X Supplicant, SSID to VLAN Mapping, MAC Access Control, Rogue AP detection)
- IPv6 Support

The Linksys Business Wireless-N Access Point employs Wi-Fi technology (802.11n) to provide a fast, powerful wireless network that's ideal for today's tech-savvy businesses.

Indoor Wireless Provider

The Linksys Wireless-N Access Point connects notebooks, smartphones, tablets, and other Wi-Fi devices at transfer rates up to 300 Mbps (LAPN300) or 600 Mbps (LAPN600) for an optimal business network experience. With a Gigabit Ethernet port, wireless clients can enjoy the fastest speeds possible by maximizing wireless-to-wired performance.

Optimal Wireless Coverage

The Linksys Wireless-N Access Point offers high power, enabling better, wider wireless coverage for you and your business. Wireless client devices can access their intranet or the Internet in hard-to-reach areas.

Flexible Deployment

The Linksys Wireless-N Access Point can be deployed as a typical access point, or set up as a workgroup bridge to extend your wireless range coverage.

Easy to Use

The Linksys Wireless-N Access Point is integrated with 802.3af/at PoE capability to eliminate extra power adapters and offer optimal placement. It also provides an intuitive web administrative interface, easy to set up and easy to use.

Heightened Security

The Linksys Wireless-N Access Point offers advanced security features including WPA, WPA2, and 802.1X with RADIUS to protect your wireless network. Other business class security features, such as Rogue AP Detection, MAC address filtering, SSID to VLAN mapping, Wireless Broadcast Scheduling, and 802.1X Supplicant, are offered as well.

*Maximum Performance derived from IEEE Standard 802.11 specifications (draft specifications for 802.11ac). Actual performance can vary, including lower wireless network capacity, data throughput rate, range and coverage. Performance depends upon many factors, conditions and variables, including products used, interference and other adverse conditions. 802.11ac 1300 Mbps in the 5GHz Band is approximately 3 x faster than 802.11n 450 Mbps in the 2.4GHz Band. An 802.11ac adapter will be needed to achieve 11ac data rates and up to 1300 Mbps wireless speeds may be achieved when connecting to other 802.11ac 1300 Mbps devices.
