# MACHINE OPERATION

Additional information (including troubleshooting and service) can be found in the individual chapters of the Instructions for use.

Sort laundry according to care symbols

⊠ Do not tumble dry

⊙ Suitable for tumble drying – at low temperatures

⊙⊙ Suitable for tumble drying

Sort laundry by:
Material thickness: whenever there is greater load than the dryer can handle, separate laundry according to weight (e.g. dry towels and thin underwear separately).
Type of material: cotton (linen); synthetic textiles (easy care).
Degree of drying: cupboard dry, iron dry etc.
Do not tumble dry: nylon stockings, delicate embroidery, fabrics with metallic decorations.

Preparing laundry

Check that all fastenings are closed and that pockets are empty.
Please ensure that there are no cigarette lighters in the laundry.
Turn laundry inside out.

Loading dryer

Place laundry loosely in the drum to achieve equal drying throughout.
Then close the door.

Selecting programme

Select the drying programme required by turning the programme selector knob (for information, refer to programme table).
If you do not start the programme soon after having made your choice, the dryer will switch off after a few minutes.
To switch the dryer on again turn the programme selector knob to **"Off" ("0")** and afterwards to the desired programme.

Selecting options (if available)

Select the option required by pressing the corresponding button.
The indicator lamp above the relevant button lights up to confirm your selection.
A fast blinking lamp indicates a wrong selection is made (incompatible options).
Press the button again to cancel the option.

Starting dryer

The drying programme is started by pressing the **"Start (Pause)"** button.
The relevant indicator lamp lights up.
Changing programme selection: If the programme selected is changed during drying, the dryer stops.
The **"Start (Pause)"** indicator lamp flashes.
To operate the new programme, press the **"Start (Pause)"** button again.
Interrupting programme: To interrupt a drying cycle, press the **"Start (Pause)"** button and open the door.
Wait at least 5 minutes, to allow the laundry to cool down, before you unload the dryer.
For your safety the drying cycle stops automatically if you open the door.
To restart, after door opening, close the door and press the **"Start (Pause)"** button again.
Warning: Never stop a tumble dryer before the end of the drying cycle, unless all items are quickly removed and spread out so that the heat is dissipated.

Programme end – unloading dryer

The final part of a drying cycle occurs without heat (cool down cycle) to ensure that the items reach a lower temperature to avoid wrinkling.
End: Take the laundry out of the dryer.
The drying process is complete.
Anticrease: If the laundry is not removed at the end of the drying cycle, an automatic anti-crease cycle will operate for maximum 15 min (by choosing the option **"Anticrease"** this time can be extended up to 12 hours).
The drum rotates to prevent the laundry from creasing.
After the end of the **"Anticrease"** the dryer will switch off after a short time, to save energy.

Switching dryer off

Set the programme selector knob to **"Off" ("0")**.

Cleaning the door filter after every cycle: open door, pull door filter up and out of machine and open it. Brush lint using a soft brush or your fingertips. Close door filter and push firmly back into place.

Emptying water container: pull container out by the handle and empty. Replace the container when empty by pushing it completely back into place.

Please note: Only use additives/plastic items specified as dryer safe and rinse items that have been treated with stain remover thoroughly in plenty of water before drying. Never dry rubber objects or objects stained with vegetable oils in the dryer.

The Manufacturer is not liable for any damage to laundry resulting from inadequate or incorrect fabric care instructions which have been provided with the garment or article.

Power consumption: in off-mode 0.11 W / in left on-mode 0.11 W

Overview of programmes					Options				Approximate drying times (in minutes)	
Programmes / Drying levels		Type of textile		Fabrics	Gentle Gentile	Pause ▷‖	Dry plus Asciu- gatura+	Start delay Avvio ritsrdato	Very wet load	Wet load

*Test programmes according to EN61121, tested with maximum rated load capacity.

HOW TO PROCEED IF…

...you want to check the dryer yourself first: (If your machine is not functioning correctly, please check the following points before calling the customer service – also refer to relevant chapter in the Instructions for use)

Drying takes too long / Laundry is not dry enough	• Has the correct drying programme been selected? • Has the cycle been interrupted (door opening, full water container)? • Was the inserted laundry too wet (washing machine spin speed less than 1000 rpm)? • Is the door filter dirty (filter indicator light on)? • Is the heat exchanger dirty (for more information, refer to the Instructions for use)? • Is the room temperature too high? • Is the **"End"** and **"Anticrease"** indicator lamp lighting up? The drying cycle is complete and the laundry can be taken out. • If the drying result does not meet your expectation, select a more dry programme or use the dryness adjustment option (if available) to optimize the drying result.
The dryer does not operate (after a power failure, always press the "Start (Pause)" button)	• Is the plug properly inserted into the mains electricity socket? • Is there a power failure? • Has the fuse blown? • Is the door properly closed? • Has a drying programme been selected? • Has the **"Start (Pause)"** button been pressed shortly after a programme is selected? (If not, the dryer will switch off.) • Has the start delay option been selected? • Is the dryer overloaded? → Please remove a part of the load.
Door filter, water container or bottom filter indicator lamp on	• Is the door filter clean? • Is the water container empty? • Has the water container been inserted correctly? • Is the heat exchanger clean and inserted correctly?
Water droplets underneath the dryer	• Has the bottom filter been inserted correctly? • Have all lint on the bottom filter seal and the door seal been wiped away? • Has the water container been inserted correctly? • If the direct drain connection is used, is it tight? • Is the dryer leveled?

...you want to care of and clean your dryer:

|	
Clean the door filter at the end of every cycle	• Brush lint using a soft brush or your fingertips. • Close the filter. • Push the filter back into place.
Empty the water container at the end of every drying cycle	• Pull the handle to remove the water container. • Empty the water container. • Replace the water container when empty by pushing it completely back into place.
Clean the bottom filter every fifth cycle	• Clean the bottom filter under running water. • Remove all fluffs from the seals. • Clean the bottom filter housing (for further information see chapter **"Cleaning the Bottom Filter"** in the Instructions for use). • See the Instruction for use for further information how to clean the bottom filter.

In case of a malfunction of the dryer, one the following failure codes could be displayed.
Depending on the model of your dryer, the failure can be displayed in letters or by different blinking lamps.

Failure code	Lamps failure code	Check needed by customer before Service call
F01	*▪ blink □ off □ off ▪ on ▪* blink *▪ blink □ off	Please call the After-Sales-Service.
F02	*▪ blink □ off ▪ on □ off ▪* blink *▪ blink □ off	Please call the After-Sales-Service.

Before using the machine, please also read the instructions for use carefully!

AZA-HP 8004 – Quick Reference Guide

Indicator lamps and Options

Programme selector knob

The drying programme is selected by turning this knob.

The **"Start (Pause)"** indicator lamp flashes.

"Start (Pause)" button

The drying programme is started by pressing this button.

The indicator lamp lights up.

Bottom Filter

This indicator lamp lights up when the bottom filter needs to be cleaned.

This indicator lamp is blinking, when the bottom filter is not correctly positioned.

Please take care that the bottom filter is correctly inserted and the handle is fully engaged.

Water container

The indicator lamp lights up when the water container needs to be emptied.

The drying cycle is automatically interrupted.

Empty the container and restart the drying programme.

Empty the water container after every drying cycle

End

The drying programme is finished.

Please unload the dryer.

Overdry protection / 6th Sense

The indicator lights up when a humidity controlled programme is selected, to indicate the activated protection function.

Dry plus

By selecting this option you can increase the dryness level of the laundry.

Gentle

Selecting this option will reduce the drying temperature.

This option cannot be selected when the option **"Rapid"** is selected.

Start delay

Delays the start of the drying cycle by 3, 6 or 9 hours.

Each time the button is pressed the delay is increased by 3 hours.

Press the **"Start (Pause)"** button to confirm the final selection and to start the dryer.

The lamps above the programme selector knob are flashing to indicate the selected time.

During the countdown, the drum will turn from time to time to redistribute the laundry and the pump will start to pump water in the water container.

To cancel or change the previously set time delay, set the index of the programme selector knob to **"off"** position, or open the door.
