## Marketing

### Extended retailer text

Don't be worried again about scratches, bumps or other damages thanks to the Trust Shock-proof case for the iPad Air. The case ensures optimal protection and improves your user experience thanks to the integrated handles and viewing stand.

#### Protection & Design

This soft, shock-proof case provides the ultimate protection for your iPad Air. Thanks to this case you never have to be worried again when iPad Air drops of your hand. The soft silicone material protects it against scratches and bumps and is even anti-slip.

The shock-proof case does not only protect but also has an ergonomic design with playful curved corners. The round thicker sides give it an extra grip and comfort whenever you hold your iPad Air.

#### Ease of Use

The case fits perfectly with the design of your iPad Air whereby all buttons, connections and cameras are easy to access. On top of that, the Shock-proof case has sound-boosters which boost the sound of the iPad Air and direct it to the user.

The iPad Air can be easily taken out of the protective case thanks to its flexible silicone-like rubber.

The folding stand in the back offers two viewing angles. One is ideal to watch movies or pictures and the other one offers a flatter position for typing emails or longer texts.

#### Applications

The shock-proof case provides extra protection, comfort and grip for each situation: when watching a movie on a bench, in the garden or in the bed. Store your iPad Air in your bag, suitcase or backpack without worrying whether it will survive or not. Give it even to your children without having to worry about it.

Thanks to the shock-proof case your iPad Air can handle any bump easily.
