## Marketing

### Extended retailer text

Choose the color that suits to you everyday! With the Reversible folio stand you have two covers in one. Attach the tablet once into the folio and fold the cover then to easily change its colors.

#### Reversible Design

The reversible folio has a stylish design with two different sides. The durable outside has two colors which can be easily changed thanks to the reversible design. The subtle white stitching gives the folio a very stylish look. The elastic bands with which you can easily close the folio are seamlessly integrated into the design of this unique premium folio.

#### Stick&Go

The folio includes a sophisticated Stick&Go pad: a simple but effective pad you can easily stick your tablet on. While it is completely stuck, you don't see anything of the pad making your tablet invisibly attached into your folio. Thus, you need no straps which would only ruin the design of your tablet. Whenever you want you can easily remove your tablet from the Stick&Go pad leaving no residue on your tablet.

#### Protection & Use

The folio provides optimal protection for your 10" tablet without having to give up its functions. Thanks to the integrated kickstand you can easily watch movies, videos and pictures. Depending on the situation, you can even change the viewing angle to three different angles including a flat position to use your tablet while it is lying. Thus, you can easily type longer messages or surf the internet.

Even if your tablet is in the cover all ports and buttons are easily to access. The hard, wear-resistant folio offers optimal protection against dust, dirt and scratches. In addition, the durable materials are easy to clean so that your cover will look good for a lasting time.
