1 Important safety information

General maintenance

To avoid damage or malfunction:

- Do not expose the player to excessive heat caused by heating equipment or direct sunlight.
- Do not drop your player or allow objects to fall on your player.
- Do not allow your player to be submerged in water. Do not expose headphone socket or battery compartment to water, as water entering the set may cause major damage.
- Do not use any cleaning agents containing alcohol, ammonia, benzene, or abrasives as these may harm the set.
- · Active mobile phones in the vicinity may cause interference.
- Back up your files. Please ensure that you retain the original files you have downloaded to your device. Philips is not responsible for any loss of data if the product becomes damaged or not readable / legible.
- Manage (transfer, delete, etc.) your music files only with the supplied music software to avoid problems!

About operating and storage temperatures

- Operate in a place where temperature is always between 0 and 35°C (32 to 95°F)
- Store in a place where temperature is always between -20 and 45°C (-4 to 113°F)
- Battery life may be shortened in low temperature conditions.

Replacement parts/accessories

Visit www.philips.com/support to order replacement parts/accessories.

Hearing Safety

Listen at a moderate volume.

Using headphones at a high volume can impair your hearing. This product can
produce sounds in decibel ranges that may cause hearing loss for a normal person,
even for exposure less than a minute. The higher decibel ranges are offered for those
that may have already experienced some hearing loss.

• Sound can be deceiving. Over time your hearing "comfort level" adapts to higher volumes of sound. So after prolonged listening, what sounds "normal" can actually be loud and harmful to your hearing. To guard against this, set your volume to a safe level before your hearing adapts and leave it there.

To establish a safe volume level:

- Set your volume control at a low setting.
- Slowly increase the sound until you can hear it comfortably and clearly, without distortion.

Listen for reasonable periods of time:

- · Prolonged exposure to sound, even at normally "safe" levels, can also cause hearing loss.
- · Be sure to use your equipment reasonably and take appropriate breaks.

Be sure to observe the following guidelines when using your headphones.

- Listen at reasonable volumes for reasonable periods of time.
- Be careful not to adjust the volume as your hearing adapts.
- Do not turn up the volume so high that you can't hear what's around you.
- You should use caution or temporarily discontinue use in potentially hazardous situations.
- Do not use headphones while operating a motorized vehicle, cycling, skateboarding, etc.; it
 may create a traffic hazard and is illegal in many areas.

Important (for models supplied with headphones):

Philips guarantees compliance with the maximum sound power of its audio players as determined by relevant regulatory bodies only with the original model of provided headphones. In case this one needs replacement, we recommend that you contact your retailer to order a model identical to that of the original, provided by Philips.

Copyright information

All other brands and product names are trademarks of their respective companies or organizations.

Unauthorized duplication of any recordings whether downloaded from the Internet or made from audio CDs is a violation of copyright laws and international treaties.

The making of unauthorized copies of copy-protected material, including computer programmes, files, broadcasts and sound recordings, may be an infringement of copyrights and constitute a criminal offence. This equipment should not be used for such purposes.

This product is protected by certain intellectual property rights of Microsoft Corporation. Use or distribution of such technology outside of this product is prohibited without a license from Microsoft or an authorized Microsoft subsidiary.

Content providers are using the digital rights management technology for Windows Media contained in this device ("WM-DRM") to protect the integrity of their content ("Secure Content") so that their intellectual property, including copyright, in such content is not misappropriated. This device uses WM-DRM software to play Secure Content ("WM-DRM Software"). If the security of the WM-DRM Software in this device has been compromised, Microsoft may revoke (either on its own or upon the request of the owners of Secure Content ("Secure Content Owners")) the WM-DRM Software's right to acquire new licenses to copy, display and/or play Secure Content which you have previously stored on your Device. Revocation does not alter the WM-DRM Software's ability to play unprotected content. A list of revoked WM-DRM Software is sent to your device whenever you download a license for Secure Content from the Internet or from a PC. Microsoft may, in conjunction with such license, also download revocation lists onto your device on behalf of Secure Content. When When the may disable your device's ability to copy, display and/or play Secure Content.

In the event of revocation, Philips will attempt to make available software updates to restore some or all of your device's ability to transfer, store, access, copy, display and/or play Secure Content. However, the ability to make such updates available does not rest solely with Philips. Philips does not guarantee that, after revocation, such software updates will be available. If such updates are not available, your device will not have the ability to transfer, store, copy, display and/or play Secure Content - even Secure Content which you have previously stored on your device.

In addition, even if such software updates are available, they may not enable your Device to transfer, store, copy, display, and/or play Secure Content which was previously stored on your Device. In some cases you may be able to transfer the content from the PC. In other cases, you may have to repurchase previously obtained Secure Content.

To summarize - Microsoft, Secure Content Owners, and Secure Content distributors may deny you access, or restrict your access, to Secure Content. They may also disable your device's ability to transfer, store, copy, display and/or play Secure Content even after you have paid for and obtained it. Neither your consent nor the consent or approval of Philips is necessary for any of them to deny, withhold or otherwise restrict your access to Secure Content or to disable your device's ability to transfer, store, access, copy, display, and/or play Secure Content. Philips does not guaranty that you will be able to transfer, store, access, copy, display, and/or play Secure Content.

The Windows Media and the Windows logo are registered trademarks of Microsoft Corporation in the United States and/or other countries.

Be Responsible! Respect Copyrights.

Philips respects the intellectual property of others, and we ask our users to do the same.

Multimedia content on the internet may have been created and/or distributed without the original copyright owner's authorization.

Copying or distributing unauthorized content may violate copyright laws in various countries including yours.

Compliance with copyright laws remains your responsibility.

The recording and transfer to the portable player of video streams downloaded to your computer is intended only for use with public domain or properly licensed content. You may only use such content for your private, non-commercial use and shall respect eventual copyright instructions provided by the copyright owner of the work. Such instruction may state that no further copies shall be made. Video streams may include copy protection technology that prohibits further copying. For such situations the recording function will not work and you will be notified with a message.

Data logging

Philips is committed to improving the quality of your product and enhancing the Philips user experience. To understand the usage profile of this device, this device logs some info / data to the non-volatile memory region of the device. These data are used to identify and detect any failures or problems you as a user may experience while using the device. The data stored, for example, will be the duration of playback in music mode, duration of playback in turner mode, how many times battery low was encountered, etc. The data stored do not reveal the content or media used on the device or the source of downloads. The data stored on the device are retrieved and used ONLY if the user returns the device to the Philips service centre and ONLY to simplify error detection and prevention. The data stored shall be made available to user on user's first request.

Disposal of your old product

Your product is designed and manufactured with high quality materials and components, which can be recycled and reused.

When this crossed-out wheeled bin symbol is attached to a product, it means the product is covered by the European Directive 2002/96/EC.

Please be informed about the local separate collection system for electrical and electronic products.

Please act according to your local rules and do not dispose of your old product with your normal household waste. The correct disposal of your old product will help prevent potential negative consequences to the environment and human health.

The build-in rechargeable battery contains substances that may pollute the environment. Always hand the appliance in at an official collection point to remove the battery before discarding the appliance. Battery should be disposed of at an official collection point.

Modifications

Modifications not authorized by the manufacturer may void user authority to operate this device.

Notice for USA

Note:

This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses, and can radiate radio frequency energy and, if not

installed and used in accordance with the instruction manual, may cause harmful interference to radio communications.

However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Relocate the receiving antenna.
- Increase the separation between equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

Notice for Canada

This Class B digital apparatus complies with Canadian ICES-003.

The set complies with the FCC-Rules, Part 15 and with 21 CFR 1040.10. Operation is subject to the following two conditions:

- This device may not cause harmful interference, and
- This device must accept any interference received, including interference that may cause undesired operation.

Notice for the European Union

This product complies with the radio interference requirements of the European Union.

2 Your new player

With your newly purchased player, you can enjoy the following:

- Play video files (WMV, MPEG4 (.avi))
- Play audio files (MP3, WMA, AAC (unprotected))
- Display album art
- View pictures
- · Listen to FM radio
- · Record FM radio1 and voices / sounds
- View folders

2.1 What's in the box

The following accessories are included with your player:

Player

Quick start guide

Earphones with exchangeable caps

USB cable

Protective pouch

CD-ROM containing Windows Media Player, Philips Device Manager, Media Converter for Philips, User Manual and Frequently Asked Questions

2.2 Register your product

We strongly recommend that you register your product in order to gain access to free updates. To register your product, please log on to www.philips.com/welcome so that we can inform you as soon as new updates become available.

¹ FM radio recording: This feature is available for all regions except USA and Canada.

3 Getting started

3.1 Overview of controls and connections

Α	OPTIONS	Offers a selection of options, depending on the current menu
B	-VOLUME+	Increases/decreases volume (hold to increase/decrease fast)
С	◀	Skips back (hold to quick skip)
		Skips forward (hold to quick skip)
	▲/▼	Scrolls up/down (hold to quick scroll)
D	① / ▶Ⅱ	On / Off
		Play/Record / Pause
		Confirm selection
E	MIC	Microphone
F	A	Headphones jack
G	5	Back one level (hold to return to root menu)
Н		USB connector
	RESET	
J	🔒 slider	Hold slider to lock/unlock all keys (except -VOLUME+)

3.2 Main menu

Menu	То
Music	Play digital music tracks
🎦 Video	Watch videos
O Pictures	View pictures
📷 Radio	Listen to or record from FM radio ¹
Recording	Create or listen to recordings
Folders ¹	View folders
Settings	Customize the settings of your player
Now playing	Go to the play screen
Last played	Resume play

3.3 Install

Important Make sure to install the software provided in the supplied CD for music and video transfer.

System requirements:

- Windows XP (SP2 or above) or Vista
- Pentium III 800MHz processor or higher
- 128MB RAM
- 500MB hard disk space

- Internet connection
- Microsoft Internet Explorer 6.0 or later
- CD-ROM
- USB port

Important You need **Windows XP Service Pack 2** to install and run this software. In case you do not have this on your PC, you will be asked to install the Service Pack. Please do install this, complete the rest of your software installation and only then connect your device. This is critical to ensure the proper working of your player when connected to the PC.

- 1 Insert the CD supplied with your product into the CD ROM drive of your PC.
- 2 Follow the on-screen instructions to complete the installation of **Windows Media Player**, **Philips Device Manager** and **Media Converter for Philips**. The Media Converter for Philipsconverts video clips and JPEG pictures into suitable formats for the player.
- 3 If the installation program does not start automatically, browse the CD contents with **Windows Explorer** and double click on the file ending with .exe.

Lost your CD? Don't worry, you can download the CD contents from www.philips.com/support.

¹ FM radio recording: This feature is available for all regions except USA and Canada.

3.4 Connect and charge

When you connect the player to the PC, it automatically charges.

3.4.1 Use the supplied USB cable

- 1 Before you use the player for the first time, charge it for at least 5 hours.
 - > The battery² has a 100% charge after 4 hours and an 80% charge after 2 hours.

- **2** Connect the supplied USB cable to the mini USB port at the bottom of the player, the other end to your PC.
 - > The player will start to charge as soon as it is connected to your PC.

E Note The player is fully charged when the charging animation stops and $\mathbf{\mathcal{G}}$ is displayed. Your fully charged player will allow up to 30 hours² of music playback.

3.4.2 Battery level indication

The approximate power levels of your battery are indicated as follows:

Full	Two-thirds full	Half full	Low	Empty

Note When the batteries are almost empty, the battery screen **b**links. The player saves all settings and unfinished recordings and switches off in less than 60 seconds.

² Rechargeable batteries have a limited number of charge cycles. Battery life and number of charge cycles vary by use and settings.

3.6.1 Download or add videos to MediaConverter™

3.6.1.1 Download videos with Stream Ripper*

1 Use the **Internet Explorer** to open the website from where you want to download the video.

The Stream Ripper software supports downloads from the following websites:

- video.google.com
- myspace.com
- youtube.com
- 2 While playing the video on the website, move your mouse cursor over the video until you see the Stream Ripper icon common in the top left hand side corner, then click **Download**.

> When the video is downloaded the MediaConverter[™] opens and shows the downloaded video.

* The **Stream Ripper** download feature requires that the **FLV codec** is installed on your PC. For more information read chapter **Install** in this user manual.

3.6.1.2 Add video files from your PC or DVD

- 1 In the **MediaConverter**[™] window, click **Add File** / **Add DVD** to select the source of your video.
- 2 In the **pop-up window**, mark your video file, then click **Open**.
- 3 In the **MediaConverter™ window**, click **Start** to start the conversion and transfer of the video.

3.6.2 Convert and transfer videos with MediaConverter™

- 1 Follow section 3.6.1.1 or 3.6.1.2 to download or add a video.
- 2 In the **MediaConverter™ window**, select the destination for the video (your Philips player or local disk).
- 3 In the **MediaConverter™ window**, click **Start** to start the conversion and transfer of the video.

The progress of conversion and transfer is shown. All the converted files will be transferred to the player.

Tip You can also select the files in **Windows Explorer** and then drag and drop them into the **MediaConverter™ for Philips** screen.

Note If needed, the files will first be converted to a format that can be played on the player.

3.7 Enjoy

3.7.1 Turn on and off

To turn on, press **()**/**I** until the display shows the Philips logo.

To turn off, press and hold \bigcirc \models **II** until the display shows 'Bye'.

Tip If the player is in stop mode and no button is pressed for 10 minutes, it switches off automatically.

3.7.2 Navigate the menu

Your player has an intuitive menu navigation system to guide you through various settings and operations.

Goal	Action
Return to previous menu	Press 🔈
Return to main menu	Press and hold ๖
Browse through menus	Press 📲 or ⊃
Scroll through a list	Press 🔺 or 🔻
Select an option	Press 🔰

3.7.3 Lock slider

The player has a lock switch to prevent any accidental operation.

- 1 To lock the buttons when you play, move the lock slider to position $\mathbf{a}_{\mathbf{r}}$
 - > All buttons except -VOL+ are locked and the display shows 💼.
- 2 To unlock the buttons again, move the lock slider to position \mathbf{G}

4 Organize and transfer music and pictures with Windows Media Player 11

4.1 Installing Windows Media Player 11 (WMP11)

- 1 Insert the supplied CD into the CD ROM drive of your computer.
- 2 Follow the onscreen instructions to complete the installation of WMP11.

4.2 Music and picture transfer

4.2.1 Add music and picture files to WMP11 library

By default, **WMP11** automatically loads all the music and picture files stored in your **My Music** and **My Pictures** folder into the library. When you add new files to this folder on your computer, the new files are also automatically added to the WMP11 library.

4.2.2 Add music and picture files that are stored elsewhere on your computer or computer network

- 1 Select Start > All Programs > Windows Media Player to launch the WMP11 program.
- 2 Click the down arrow beneath the Library tab and select Add to Library....

> Add to Library dialog box appears.

elect the folders to monitor

- 3 Click <<Advanced Options to expand the dialog box.
- 4 Click Add...
 - > Add folder dialog box appears.
- 5 Select a folder in which you have kept your music and picture files and click OK.
- 6 Return to Add to library dialog box and click OK.
 - > WMP11 will start scanning the folder and add available music or picture files to the library.
- 7 Click Close when done.

Tip WMP11 is configured to skip audio files that are smaller than 100KB. To include files smaller than 100KB, you can change the default settings within the **Add to library** dialog box.

4.2.3 Switch between music and pictures library in Windows Media Player and your player

To switch between music and pictures library, simply click the arrow on the top left of Windows Media Player and select the category you want to view.

4.2.4 Rip songs from a CD

If you want to transfer music from a CD to your player, you need to create a digital copy of the music on your computer first. This is called ripping.

- 1 Ensure that the PC is connected to the Internet.
- 2 Start WMP11.
- 3 Click the down arrow beneath the Rip tab and select the Format.

4 Click the down arrow beneath the **Rip** tab and select the **Bit Rate**.

> You can find the albums or songs you purchase in the WMP11 library.

4.3 Sync your Windows Media contents to your player

You can sync your music and pictures to your player using WMP11. When you connect your player to the computer for the first time, WMP11 automatically selects the sync method (automatic or manual) that works best for your player.

Automatic: If your player has sufficient storage space (at least 4GB of free space) and your entire media library can fit on your player, your entire media library will be automatically copied to your player as soon as you connect it to your computer.

Manual: If your entire media library cannot fit on the player, then you will be prompted to manually select specific files or playlists that you want to transfer to your player.

4.3.1 Set up your player

- 1 Start WMP11.
- 2 Turn on your player.
- 3 Use the supplied USB cable to connect your player to the computer.
- 4 Set up synch:

If prompted, select the option to sync the device using WMP11. If WMP11 selects to sync your device automatically, click **Finish**.

Your entire library will sync to your player. Thereafter, every time you connect your player to your computer, your player will sync automatically. You can also select and prioritize what syncs automatically (see 4.3.3 Select and prioritize what syncs automatically).

If WMP11 selects to sync your device manually, click Finish.

> You then need to click the **Sync** tab and select the files and playlists you want to sync manually (see **4.3.4 Select files and playlists for manual sync**).

() Important! Do not disconnect your player while transferring is in progress. If you disconnect your player, the transfer will not be complete and Windows might not be able to recognize your player afterwards.

4.3.2 Switch between automatic and manual sync

After your player is set up the first time, depending on your preference, you can switch between automatic and manual sync.

- Click the down arrow beneath the Sync tab, select Philips GoGear SA52xx > Set Up Sync.
- 2 Select or clear the Sync this device automatically check box.

4.3.3 Select and prioritize what syncs automatically

If **WMP11** has selected to sync your device automatically, you can choose not to sync your entire media library. You can choose what you wish to sync from existing playlists or create new playlists. These playlists you have selected will then sync to your player every time you connect it to your computer.

 Click the down arrow beneath the Sync tab and select Philips GoGear SA52xx > Set Up Sync.

- > The **Device Setup** dialog box appears.
- 2 In the **Available playlists** pane, select the existing playlists you want to sync and then click **Add**.

hlips GoGear SAS1:cc 7 Sync this device automatically		Device S Select Playlists

New Auto PlayIst		Shuffle what syncs Priority: 4	•

- **3** To create a playlist, click **New Auto Playlist** and follow the steps on the screen to specify criteria for files in the auto playlist (for details on how to create an auto playlist, see **4.4.2 Create an Auto Playlist**).
- 4 To remove a playlist, click the playlist in the list of **Playlists to sync**, and then click **Remove**.

5 In the **Playlists to sync** pane, select a playlist and click the **Priority** arrows to arrange them in the order that you want them to sync.

> If your player is full before sync is complete, then the files and playlists that are lower in priority on the list will not sync.

Tip If your player has limited storage capacity, or if your media library has grown too large to fit on your player, you can shuffle the files that are in the playlists you have selected to sync. To do so, select the Shuffle what syncs check box. Thereafter, every time you connect your player to the computer, the files on your player are removed and a new set of files (from the Playlists to sync pane) are added to the device.

4.3.4 Select files and playlists for manual sync

If you sync manually, you must create a list of files and playlists you want to sync. You can also shuffle which files from your playlists to sync to your player.

- 1 Start WMP11.
- 2 Turn on your player.
- 3 Use the supplied USB cable to connect the player to the computer.
- 4 Click the Sync tab.

- **5** Drag the files and playlists that you want to sync from the Contents pane to the Sync List pane.
 - > You can also right click on the file or playlist and select Add to "Sync List".

- **6** In the Sync List pane, verify that the items you have selected to sync will all fit on your player.
 - > If necessary, remove items from the list.

- 7 To remove items, right click on the item in the Sync List pane, and then select **Remove** from List.
- 8 Click **Start Sync** button to transfer the Sync List items to your player.
 - The progress is displayed on the bottom right of WMP11. Click Stop Sync to stop the transfer.

Tip If the track you are trying to sync is a protected file, you will be prompted to upgrade the security components on your computer. When this happens, play the track in WMP11 and when prompted, follow the steps on the screen to upgrade the security components. After you have upgraded your security components, sync the file to your player again.

4.3.5 Copy files from your player to your computer

Your player supports reverse sync, which lets you copy files from your player to your computer via WMP11.

- 1 Start WMP11.
- 2 Turn on the player.
- 3 Use the supplied USB cable to connect the player to the computer.
- 4 Click on **Philips GoGear SA52xx** in the left Navigation pane.
 - > The content on your player is listed in the Contents pane.
- 5 Navigate to the file or playlist you want to copy from the player to the computer.
- 6 Right click on the file or playlist and select Copy from Device.

4.4 Manage your Windows Media Player Playlist

Playlists allow you to mix any combination of songs or pictures you want so that you can enjoy hours of listening. You can create regular or auto playlists containing songs, pictures or both using WMP11.

4.4.1 Create a regular Playlist

- 1 Click the down arrow beneath the Library tab and select Create Playlist.
 - > Untitled Playlist appears on the List pane
- 2 Click on Untitled Playlist and enter a new name for the playlist.
- **3** To add items to your playlist, drag them from the Contents pane onto the List pane. Your playlist can contain both songs and pictures.

- 3 Click the first green plus sign and select your first criteria from the pull-down list.
- 4 Click on the underlined words to further define your criteria.
- 5 Click the second and third green plus signs to select and define more criteria for your auto playlist.
- 6 Click **OK** button when done.

4.4.3 Edit playlist

You can edit your existing playlists at any time.

1 Click on **Playlists** in the left Navigation pane.

- > All your playlists will be displayed in the Contents pane.
- 2 Right click on the playlist you wish to edit and select **Edit in List Pane** from the pop-up menu.
 - > The content in the playlist appears on the List pane.
- **3** To remove an item from the playlist, right click on the item and select **Remove from List**.

- **4** To change the order of the items in the playlist, click and drag any item to a new position within the List pane.
- 5 To add a new item to the playlist, select it from the library and drag it to the List pane.
- 6 When you have finished editing the playlist, click the **Save Playlist** button.

4.4.4 Transfer playlists to your player

Refer to 4.3.4 Select files and playlists for Manual Sync.

4.5 Manage your files and playlists in Windows Media Player 11

4.5.1 Search for music or pictures via WMP11

- 1 Click the Library tab.
- 2 To search for music files, click the arrow on the top left of WMP11 and select **Music**. To search for picture files, select **Pictures**.
- 3 Type a few keywords of the file, such as song title, artist, etc in the search box.
 - > The results of your search appear in the Contents pane as you type, and are updated as you enter each new letter of your search.
- 4 Keep entering keywords to fine-tune the results of your search.

4.5.2 Delete files and playlists from WMP11 library

- 1 Click the Library tab.
- 2 To delete music files, click the arrow on the top left of **WMP11** and select **Music**. To delete picture files, select **Pictures**.
- 3 Navigate to the file or playlist you wish to delete.
- 4 Right click on the file or playlist and select **Delete**.
- 5 Select **Delete from library only** or **Delete from library and my computer** and click **OK**.

4.5.3 Delete files and playlists from your player

You can also use WMP11 to manage the files stored on your player. When you connect your player to the computer, the contents on your player will be displayed in WMP11. You can then delete files or playlists, just as you would any other files displayed in WMP11.

- 1 Click on **Philips GoGear SA52xx** in the left Navigation pane.
 - You can browse your player's contents in a variety of views, such as Recently Added, Artist, Album, Songs, etc.
- 2 The contents on your player will be listed in the Contents pane.
- **3** To delete music files, click the arrow on the top left of WMP11 and select **Music**. To delete picture files, select **Pictures**.
- 4 Navigate to the file or playlist you wish to delete.
- 5 Right click on the file or playlist and select **Delete**.
- 6 Click OK.

4.5.4 Edit song information via WMP11

- 1 Click the Library tab.
- 2 Navigate to the song you wish to edit.
- 3 Right click on the song and select Advanced Tag Editor from the pop-up menu.

- > The Advanced Tag Editor dialog box appears.
- **4** Select the appropriate tab and enter or edit the information.

5 Click **OK** to save your changes.

4.5.5 Format your player via WMP11

You can reformat the hard disk on your player to erase all data.

- 1 Start WMP11.
- 2 Turn on the player.
- 3 Use the supplied USB cable to connect the player to the computer.
- 4 Click the down arrow beneath the Sync tab and select **Philips GoGear SA4xx** > **Format**.

5 Detailed operation

5.1 Music mode (also play mode for recordings)

Your player supports MP3, WMA, and AAC (unprotected) formats.

5.1.1 Control

The player offers the following music mode options:

Goal	Action
Play / Pause music	Press 🔰
Skip to next audio file	Press 🕨
Return to previous audio file	Press <
Fast forward	Press and hold >
Fast rewind	Press and hold <
Return to browsing menu	Long/short press 숰
Increase volume	Press VOL +
Decrease volume	Press VOL -
Access options menu	Press OPTIONS

5.1.2 Find your music

1-	Music	
	Video	
	Pictures	
	Radio	
	Recordings	
	Settings	
	Now playing	

1 From the main menu, select **F** to enter music mode. The player offers the following menu options:

All songs	Alphabetically listed tracks			
Artists	Alphabetically listed artists	Alphabetically listed albums	Tracks listed in album order	
Album art	Alphanumerically listed album art			
Albums	Alphanumerically listed albums	Tracks listed in album order		
Genres	Alphanumerically listed genres	Alphanumerically listed artists	Alphanumerically listed albums	Tracks listed in album order
Playlists	Numerically listed 'Playlists on the go'	Tracks listed in play order		
	Alphanumerically listed playlists	Tracks listed in play order		

- **2** Press \blacktriangle or \checkmark to scroll through the list.
- 3 Press **II** to select or press **5** to return to previous level.
- 4 Press >II to play.

5.1.3 Limit the volume

Listening to loud sounds for longer than a moment can be harmful to the listener. You can set the volume level of the player to suit your preferences:

- 1 From the main menu, select **Settings > Sound settings > Volume limit**.
- 2 Press -VOLUME+ to adjust the level.
- 3 Press >II to set.

> When you set a volume limit, you can no longer exceed the set volume, even if you press the VOLUME+ button.

To enable maximum volume again, set the volume limit back to maximum.

5.1.4 Resume play (Now playing)

While playing, when you navigate away from the play screen, you can return to the play screen anytime.

In any menu except the main menu:

- 1 Press OPTIONS.
- 2 Press \blacktriangle or \checkmark , then \triangleright II to select **Now playing** [current track name].

In the main menu:

1 Press ▲ or ▼, then ▶II to select **Now playing**.

5.2 Picture library

5.2.1 View pictures

The player supports pictures in JPEG format and provides a slide show function.

- 1 From the main menu, select of to enter Picture mode.
- 2 Press \blacktriangle or \checkmark to browse through picture thumbnails.
- 3 Press >II to see the picture in full view.
- 4 During full screen browsing, press \blacktriangle or \checkmark to move to next or previous picture.

5.2.2 Adding pictures to folder 'Favorites'

The **Favorites** feature enables you to share your favorite pictures more quickly. This is a useful feature when you have many picture files.

- 1 While viewing a picture, press **OPTIONS** to see the options menu.
- 2 Press \blacktriangle or \checkmark , then \triangleright II to select Add to Favorites.
 - > The currently displayed picture is added to the folder Favorites.

5.2.3 Slideshow

A slideshow displays all pictures within the album in full view. It moves to the next picture at a specified interval.

- 1 To start a slideshow in thumbnails or full screen browse mode, press OPTIONS to see the options menu.
- 2 Press \blacktriangle or \checkmark , then \triangleright II to select **Start Slideshow**.
- 3 To cancel the slideshow, press 5.

5.3 Video

5.3.1 Transfer videos from a computer to the player

Please see section 3.6 Transfer videos in this user manual.

5.3.2 Video play

You can play video clips that are stored on the player.

	Music		
1-	Video	P	
	Pictures		
	Radio		
	Recordings		
	Settings		
	Now playing		

- 1 From the main menu, select 🎬 to enter Video mode.
 - > A list of video files stored on the player is displayed.
- 2 Press \blacktriangle or \checkmark to select the file and press \triangleright II to play.
- 3 Short press 5 to go back to the previous menu, and long press 5 to return to the main menu.

5.3.3 Fast forward / backward control

The player enables you to scan videos in fast forward / backward mode.

Fast forward / backward

- 1 Long press ► to select 4x normal speed.
 - > Press > II anytime to resume normal speed play.
- 2 While in 4x normal speed mode, press ► to cycle through the following speed options: 8x normal speed > 16x normal speed > 4x normal speed...

5.4 Radio

From the main menu, select 📷 to enter radio mode.

	Music	
	Video	
	Pictures	
1	Radio	•
	Recordings	
	Settings	
	secongs	

Connect the headphones

The supplied headphones serve as a radio antenna. Ensure you connect the headphones properly for an optimal reception.

5.4.1 Automatic tuning of radio stations

Note
 The Autotune function saves the frequencies of found radio stations under presets and overwrites existing presets.
 When there are no frequencies saved under presets, the radio feature prompts you to start Autotune.

Start a new Autotune session

- 1 While in radio mode, press **OPTIONS** to see the options menu.
- 2 Press \blacktriangle or \checkmark to select the Autotune, then \triangleright II to start.
 - > The frequencies of found radio stations are saved to presets. The radio can store up to 20 radio stations to presets.

5.4.2 RDS (Radio Data System)

The player supports the RDS feature of FM radio stations. RDS stations can send additional information along with the FM radio signal, such as channel information.

5.4.3 Play a preset radio station

- 1 While in radio mode, press **OPTIONS** to see the options menu.
- 2 Press ▲ or ▼ to select the **Select radio preset**, then ►II to begin play.
- 3 Press </br>

 to change to another preset.

5.4.4 Manually tune a radio station

- 1 While in radio mode, press \blacktriangle or \checkmark to manually tune to a radio station:
 - > To fine tune frequency, quick press ▲/▼. To search for the next stronger signal, long press ▲/▼.

5.4.5 Manually save a radio station to a preset

- 1 While playing a radio station, press **OPTIONS** to see the options menu.
- 2 Press \blacktriangle or \checkmark to select the **Save to preset**, then **>**II to save.

5.4.6 Record from FM radio¹ when the radio is playing

- 1 While in radio mode, press **OPTIONS** to see the options menu.
- 2 Press ▲ or ▼ to select the **Start radio recording**, then ►II to start.
- 3 Press > 1 to pause.
- 4 Press **5** to stop and save the recording.
 - > Your recordings are saved in the **Recordings library** on the player.
- 5 You can find you radio recordings files under **V** > **Recordings Library** > **Radio** recordings.

¹ FM radio recording: This feature is available for all regions except USA and Canada.

5.5 Recordings

You can record audio with the player. The section **Overview of controls and connections** shows you the location of the microphone.

		⊻ 1/2 ─ ⊻	.

- 1 From the main menu, select 🛄.
- 2 Press ▲ or ▼ to select the **Start voice recording**, then ►II to start.
- 3 Press NI to pause.
- 4 Press **5** to stop and save the recording.
 - > Your recordings are saved in the **Recordings library** on the player.
- 5 You can find the voice recordings file under **Second Provide ProvideProvide Provide Provide Provide Provide Provide Provide Provide Provide Provide**

Solution Note To record FM radio¹, see section **5.4 Radio**.

5.5.1 Play recordings

- 1 From the main menu, select **V** > **Recordings Library** > **Voice recordings** or **Radio recordings**¹.
- 2 Press \blacktriangle or \checkmark to select the recording you want to hear.
- 3 Press NI to play.

5.5.2 Upload recordings to the computer

- 1 Connect the player to your computer.
- 2 Select the player in Windows Explorer.
- 3 Select Recordings > Voice or FM radio¹.
- 4 Copy and paste the recordings to any desired location on the computer.

5.5.3 Delete recordings

You can delete one or all of the recordings.

- 1 From the main menu, select **V** > **Recordings Library** > **Voice recordings** or **Radio recordings**¹.
- 2 Press \blacktriangle or \checkmark to select the recording you want to delete.
- 3 Press OPTIONS to see the options menu.
- 4 Press ▲ or ▼ to select **Delete** or **Delete all**.
- 5 Press **I** to confirm.

5.6 Use your player to store and carry data files

You can use your player to store and carry data files by copying data files into your player with **Windows Explorer**.

¹ FM radio recording: This feature is available for all regions except USA and Canada.

6 Settings

You can set preferences in your player to suit your needs.

6.1 Equalizer custom settings

You can customize the equalizer settings:

- 1 From the main menu, select 🔀.
- 2 Press \blacktriangle or \checkmark , then \triangleright II to select **Sound settings**.
- 3 Press \blacktriangle or \checkmark , then \triangleright II to select Equalizer.
- 4 Press \blacktriangle or \checkmark , then \triangleright II to select **Custom**.
- 5 Press < or > to select equalizer band:
 B = bass, L = low, M = mid, H = high, T = treble
- 6 Press \blacktriangle or \checkmark to adjust level.

- > Bar indicator shows current level.
- 7 Press >II to confirm your selection.
 - > Press \leq to cancel the adjustments.
- 8 Press **5** to exit the **Settings** menu.

7 Update your player

Your player is controlled by an internal program called the firmware. Newer versions of the firmware may have been released after you have purchased your player.

A software program called **Philips Device Manager** checks for firmware updates that are available on the Internet.

Install **Philips Device Manager** from the supplied CD or download the latest version from www.philips.com/support.

7.1 Perform a software update

- Attention This procedure will erase the content of the player.
- 1 Copy the content of the player to the computer as a back-up.
- 2 Disconnect the player from the computer.
- 3 Turn off your player.
- 4 Ensure the computer is connected to the Internet.
- 5 Click Start > Programs > Philips Digital Audio Player > SA52XX > Philips SA52XX Device Manager to launch the Philips Device Manager.

- 6 On the player, hold the volume "+" button while you connect the player to the computer.
 - > The Device Manager enters recovery mode.
- 7 Click OK to continue.
- 8 When the display indicates that the process is finished, disconnect the player from the computer.
 - > The display shows Updating firmware.
- 9 Wait until the update process is completed on the player.
 - > The player restarts and is ready for use again.
- 10 Reconnect the player to the computer.
- 11 Transfer the back-up content to the player.

8 Technical data

Power

 Power supply 880mAh Li-polymer internal rechargeable battery²

 Support format: AVI, WMV (requires WMP10 or above), MOV (requires Quicktime), RM (requires RealPlayer)

Recording

- Audio Capturing: Build-in microphone
 (Mono)
- FM radio¹

Storage media

 Built-in memory capacity: SA522x 2GB NAND Flash³ SA524x 4GB NAND Flash³ SA528x 8GB NAND Flash³

Connectivity

• Headphone 3.5mm, USB 2.0⁴

Music and picture transfer

· Drag and drop in Windows Explorer

Video transfer

· Via Media Converter for Philips

Data transfer

• Via Windows Explorer

System requirements

- Windows® XP (SP2 or above), Vista
- · Pentium III 800MHz processor or higher
- 128MB RAM
- 500MB hard disk space
- Internet connection
- Microsoft Internet Explorer 6.0 or later
- Video display card
- Sound card
- CD-ROM
- USB port

- ¹ FM radio recording: This feature is available for all regions except USA and Canada.
- ² Rechargeable batteries have a limited number of charge cycles. Battery life and number of charge cycles vary by use and settings.
- ³ 1MB = 1 million bytes; available storage capacity will be less.
 1GB = 1 billion bytes; available storage capacity will be less.
 Full memory capacity may not be available as some memory will be reserved for the player.
 Storage capacity based on 4 minutes per song and 64kbps WMA encoding.
- ⁴ Actual transfer speed may vary based on your operating system and software configuration.

9 Frequently asked questions

If you encounter problems with your player, go through the following points listed in the next section. Please also check out FAQs at www.philips.com/support for further help and other troubleshooting tips.

Consult your dealer or service center if you are unable to find a solution by following these hints.

Warning Under no circumstances should you try to repair the set yourself, as this will invalidate the warranty.

My player cannot power on.

- You may have failed to press and hold **>II** long enough. Press and hold **>II** until the Philips welcome screen appears on display.
- Your device battery may be out of power due to long period of non-usage. Please charge your player.

If none of the above works, then you may have to use the Device Manager to recover your player:

- 1 Launch the Philips Device Manager at Start > Programs > Philips Digital Audio Player > SA52XX > Philips SA52XX Device Manager on your PC.
- 2 Press and hold the VOL+ button while your player is connecting to the PC.
- 3 Keep holding the key until the **Philips Device Manager** acknowledges your player and goes into recovery mode.
- 4 Click the repair button and follow the instructions given by the Device Manager.
- 5 After the player has been repaired, disconnect it from your PC and re-start.

There is no music on my player after transfer.

Are your songs in MP3, AAC or WMA format?

Other formats will not playback on the player.

There is no picture on my player after transfer.

Are your pictures in JPEG, BMP or GIF format?

Pictures in other formats cannot be transferred to your player.

There is no video on my player after transfer.

Make sure you use Media Converter for Philips(provided in the CD-ROM) to convert the video clips into the readable format to the player.

My player hangs.

1 In the unlikely event that your player hangs, do not panic. Insert a small pin or other sharp object into the reset hole located at the bottom of the player. Hold until the player shuts down.

Note The existing contents on your player will not be erased.

2 If nothing happens, recharge the battery for at least 4 hours and try to power on or reset again. If this does not work, you might have to repair your player with **Philips Device** Manager.

There is no sound.

Make sure your headphones are inserted all the way into the headphones jack.

Some songs do not show up or playback on the player.

The audio file might be corrupted, try to playback the file on your PC first. If it does not play, rip the song again.
