MCM530/22

Remote Control MP3 Music from Your PC

Enjoy the freedom of remote controlling your MP3 Music from your PC and savouring it through the MCM530's powerful, dynamic speakers. With USB PC Link for MP3 streaming and Max Sound, music lovers will appreciate this complete audio solution

Benefits

MP3 music at your fingertips
• USB PC link turns your PC into a massive MP3 music jukebox
• Song title and playlist name display for easy navigation

Longer listening, greater enjoyment
• Play back 50 hours of MP3 music from 5 CDs

Power and performance

• Class 'D' digital amplifier for quality sound performance
• MAX Sound for instant power boost
• 2-Way Bass Reflex Speaker System for powerful sound
• 150 W RMS total output power

PHILIPS

Features

USB PC Link

USB PC Link lets you playback your MP3 music through the powerful speakers of Philips sound systems instead of your PC speakers. By connecting a PC directly to your audio system with a USB cable, you can stream MP3 music directly to your sound system, transforming your PC into a 'massive MP3 music jukebox'. The control buttons on the sound system and remote control provide easy navigation and control of the MP3 music stored in the MusicMatch Playlist. You can also view song title information as well as elapsed play time on the sound system's display.

## Song title display

50 hours of MP3-CD playback

MP3 is a revolutionary compression technology with which large digital music files can be made up to 10 times smaller without radically degrading their audio quality. A singe CD can store up to 10 hrs of music. With a 5-CD tray, it allows you to play 50 hours of music. MP3 has become the standard audio compression format, allowing quick and easy audio file transfer.

Class 'D' Amplifier

The Class 'D' Digital Amplifier takes an analogue signal, converts it into a digital signal and then amplifies the signal digitally. The signal then enters a demodulation filter to give the final output. The amplified digital output delivers all the advantages of digital audio, including improved sound quality. In addition, the Class 'D' Digital Amplifier has over 90% efficiency compared to
traditional AB amplifiers. This high efficiency translates into a powerful amplifier with a small footprint.

MAX Sound

MAX Sound technology produces an instant boost in the bass, maximising volume performance and instantly creating the most impressive listening experience with just the touch of a button. Its sophisticated electronic circuitry calibrates existing sound and volume settings, instantly boosting the bass and volume to maximum levels, without distortion. The end result is a noticeable amplification of both sound spectrum and volume and a powerful audio boost that will add mileage to any music.

2-Way Bass Reflex System

150 W RMS

This system has a 150 W RMS total output power. RMS refers to Root Mean Square, which is a typical measurement of audio power, or rather, the electrical power transferred from an audio amplifier to a loudspeaker, which is measured in watts. The amount of electrical power delivered to the loudspeaker and its sensitivity determines the sound power that is generated. The higher the wattage, the better the sound power emitted by the speaker.

Specifications

Please note that this is a pre-sales leaflet. The contents of this leaflet reflect the best of our knowledge per date and country mentioned above. The contents of this leaflet are subject to change without notice. Philips does not accept any liability as to the contents of this leaflet.

Sound

Output Power	2 x 150 watts music power
Sound Enhancement	MAX Sound
	Digital Sound Control 4 modes
	Virtual Environment Control
	Class "D" Digital Amplifier

Loudspeakers

Main Speaker	2-way
	Bass Reflex Speaker System
	5.25" woofer
	2" tweeter
	Speaker grilles detachable
