- Real-time monitoring with temperature and humidity sensor

Easy, safe and secure

- Easy set-up of Wi-Fi baby monitor via QR code
- Video encrypted for secure connection
- PVC-BFR-free power cables and monitor

PHILIPS

Features

Continuous audio streaming

The In.Sight wireless HD baby monitor streams audio continuously, even when your iPhone or iPad is locked or when you are docking or charging your iPhone or iPad.

Easy set-up via QR code

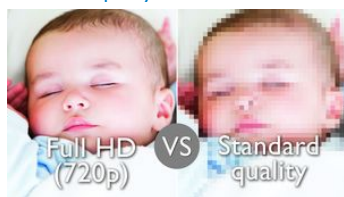

Set-up is simple with the app. The app will generate a QR code for your home Wi-Fi settings. With the QR code, the monitor will automatically pair with your Wi-Fi network, easily and instantly.

Encrypted direct networking

The In.Sight wireless monitor uses highly secure encryption to provide you with privacy at all times. The In.Sight wireless monitor uses a unique encryption key each time it makes a connection, providing you with a highly secure connection each time you look at your loved ones.

HD video quality

In.Sight wireless HD baby monitors allow you to watch your baby in vivid detail. View videos in high-definition 720p quality. The "720" refers to the number of horizontal lines of resolution on the screen. The "p" stands for progressive scan or the sequential appearance of the lines in each frame. With 720p resolution, videos are sharper and more true to life.

Parents talk via iPhone/iPad

With the In.Sight wireless HD baby monitor, you can talk to your baby any time you want. Simply press "talk" on your iPhone or iPad and sing her a nursery rhyme. Watch as she falls asleep to your soothing voice.

Multi-user mode

Share monitors with your spouse, family, friends and even your baby sitters. The app lets you share each monitor with two other users so that they also

have access to live videos and sound via their smartphones. You can even upgrade the app to share the monitor with up to 10 users.

Night vision mode

Night vision mode allows you to see your baby's lovely face in the dark. Infrared light goes on for the monitor to capture clear black-and-white video when it is dark. Night vision mode switches on and off automatically, or you can adjust it manually.

Noise and motion alerts

It's impossible to predict when something might happen to your baby. The In.Sight wireless HD baby monitor keeps watching with adjustable noise and motion detection. You will be alerted any time noise or motion is detected. Automatically receive push notifications on your iPhone or iPad when the monitor detects motion or noise.

Temperature and humidity sensor

Temperature and humidity sensors on the In.Sight wireless HD baby monitor show temperature and humidity levels on your iPhone or iPad. The humidity sensor measures the humidity level, detecting dry air that may irritate baby's throat, for instance. The app will even alert you when the temperature is too high/low.

PVC and BFR-free

The In.Sight wireless HD baby monitor is free from brominated flame retardant (BFR) and polyvinyl chloride (PVC). It adheres to the stringent safety standards for infant utensils and is absolutely baby-proof, safe and eco-friendly.

Watch your baby on Wi-Fi/3G/4G

In.Sight wireless HD baby monitor allows you to watch your baby on your iPhone or iPad wherever you are. Once you have downloaded the free Apple App and set up your In.Sight wireless baby monitor, you can access the video stream from your iPhone or iPad anywhere on Wi-Fi, 3G or 4G LTE networks. There's no limit to where and how you view your loved ones.

Wi-Fi-enabled baby monitor

Have ultimate peace of mind with the In.Sight wireless baby monitor. It connects to Wi-Fi 802.11 bgn networks. Place the monitor in your baby's room and you can watch and hear your baby directly from your iPhone or iPad wherever you are.
