Accelero Xtreme IV 280(X)

High End Graphics Card Cooler

The **Accelero Xtreme IV 280(X)** is a high performance cooler with a cooling efficiency to maintain super low temperatures even when overclocked. Incorporating ARCTIC's super quiet PWM fans means even on full load, you will no longer need to turn up the volume while gaming.

Patented Back Side Cooler

Voltage Regulator ICs are heating up the complete board to a level which is not just for the ICs itself dangerous, but mainly lowers the service life of other components dramatically. Our patented back side cooler keeps the board and all components around the GPU on low temperature.
