Micro music system

- Bluetooth®
- CD, USB, FM
- Desktop or wall-mount option
- 20W max

BTM2280W/12

Sound system that fits your home

Obsessed with sound

Let your portable music play on at home. This Philips micro music system comes with USB Direct and Audio in. Even with wireless music streaming via Bluetooth, it gives you fuss-free musical enjoyment.

Benefits

Enrich your sound experience

- 20W RMS maximum output power
- Bass Reflex Speaker System delivers a powerful, deeper bass
- Digital Sound Control

Enjoy your music from multiple sources

- Play MP3-CD, CD and CD-R/RW
- Audio-in for portable music playback
- Digital tuning with preset stations for extra convenience

- USB Direct for easy MP3 music playback
- Wireless music streaming via Bluetooth

Design that blends into your interior

- Compact design fits any space, any lifestyle
- Wall-mountable option for flexible placement

PHILIPS

Features

Bass Reflex Speaker System

Bass Reflex Speaker System delivers a deep bass experience from a compact loudspeaker box system. It differs from a conventional loudspeaker box system in the addition of a bass pipe that is acoustically aligned to the woofer to optimise the low frequency roll-off of the system. The result is deeper controlled bass and lower distortion. The system works by causing the air mass in the bass pipe to vibrate like a conventional woofer. Combined with the response of the woofer, the system extends the overall low frequency sounds to create a completely new dimension of deep bass.

Wall-mountable

The perfect combination of a slim and versatile design, your Philips audio system is cleverly designed to blend into your living space. The base of the audio system is a stand so the system can sit securely and nicely on any shelf or cabinet. When wall mounted you have all the same flexibility of the freestanding stand.

USB Direct for easy MP3 music

Thanks to the complete file transferability, you can easily enjoy the convenience and fun of accessing more digital music via the built-in USB Direct.

Digital Sound Control

Digital Sound Control offers you a choice of pre-set balanced, clear, powerful, warm and bright controls you can use to optimise the frequency ranges for different musical styles. Each mode uses graphic equalising technology to automatically adjust the sound balance and enhance the most important sound frequencies in your chosen music style. Ultimately, Digital Sound Control makes it easy for you get the most out of your music by precisely adjusting the sound balance to match the type of music you are playing.

Wireless music streaming

Bluetooth is a short range wireless communication technology that is both robust and energy-efficient. The technology allows easy wireless connection to iPod/iPhone/iPad or other Bluetooth devices, such as smartphones, tablets or even laptops. So you can enjoy your favourite music and sound from videos or games wirelessly.
