

Soundbar speaker

- 2.1 CH wireless subwoofer
- Bluetooth® aptX, AAC and NFC
- 1 HDMI in and HDMI out ARC
- 320 W

HTL5140B/12

Powerful sound for any TV

with wireless subwoofer

HTL5140 is a slim Soundbar with a maximum output of 320 W. A premium metal finish gives it style and it can be mounted on the wall or placed on a table top. HDMI ARC, one HDMI in for video and Bluetooth® with aptX® and AAC for wireless music.

Benefits

Richer sound for watching TV and movies

- Powerful 320-W sound output
- Dolby Digital and DTS for great surround sound
- Mylar material tweeter for high definition sound
- Virtual Surround Sound for a realistic movie experience
- 8" woofer for thumping bass

Connect and enjoy all your entertainment

- Bluetooth® (aptX® and AAC) for wireless music streaming

- One-Touch with NFC-enabled smartphones for Bluetooth pairing
- HDMI ARC to access all the sound from your TV
- EasyLink to control all HDMI CEC devices via a single remote
- Connect to one HDMI in for great picture and sound quality

Designed to enhance your living space

- Wireless subwoofer for clutter-free placement

Philips HTL5140

PHILIPS

Features

Powerful 320-W sound output

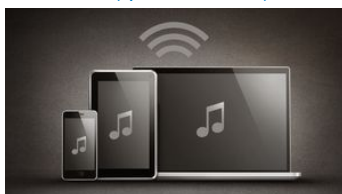

Two units, each one with 4 woofers and 2 tweeters inside, keep sound perfectly balanced. As a whole, they output 320 W of sound, which is matched by powerful bass from a 17-l subwoofer box.

Dolby Digital and DTS

Go digital and get the most out of your music and movies. Even stereo music sounds great because Dolby Digital and DTS Digital Surround enhance digital music and videos, pumping it up so you get truly immersive surround sound out of your home cinema speaker.

Bluetooth® (aptX® and AAC)

Bluetooth® (aptX® and AAC) for wireless music steaming

NFC technology

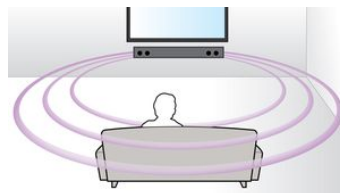

Pair Bluetooth devices easily with one-touch NFC (Near Field Communications) technology. Just tap the NFC-enabled smartphone or tablet on the NFC area of a speaker to turn the speaker on, start Bluetooth pairing and begin streaming music.

Mylar tweeter

The unique Mylar material used in the tweeters ensures incredible sound definition. The full range of high frequencies is perfectly reproduced, so music comes to life and films sound like they were meant to. An integral part of the 2-way design, the tweeter improves high frequencies resulting in cleaner, more spacious and more accurate sound in tandem with the woofer. Improved clarity means you can identify all the different elements in the music. Listen to the individual instruments, hear the vocals more clearly, enjoy your music in refreshing detail.

Virtual Surround Sound

Philips Virtual Surround Sound produces rich and immersive surround sound from a less than five-speaker system. Highly advanced spatial algorithms faithfully replicate the sonic characteristics that occur in an ideal 5.1-channel environment. Any high quality stereo source is transformed into true-to-life, multi-channel surround sound. No need to purchase extra speakers, wires or speaker stands to appreciate room-filling sound.

One HDMI in available

Enjoy larger-than-life 3D playback and crystal-clear 5.1 or 7.1 audio by simply plugging our player's audio one HDMI in output into the connection on your non-3D AV receiver.
