Highlights

Youthful

Philips VisaCare Microdermabrasion stimulates the resurfacing process of the skin for smoother, firmer feeling, visibly radiant skin.

Visible results

93% of women tested reported instantly smoother feeling skin. 84% agree their skin looks more radiant, 84% noticed their skin looks healthier*.

DualAction System

Massages the skin, encouraging blood circulation, while removing dead skin cells, allowing for natural cell renewal.

Air Lift System

The vacuum massage intensively stimulates microcirculation. Skin is gently lifted and stretched, massaging its deeper layers. Blood flow increases, bringing oxygen and nutrients to the surface. For a revitalized look. VisaCare is designed to be in the sweet spot of stretch required to stimulate collagen and elastin production. For a firmer feel in 4-6 weeks time.

Exfoliating tip

The exfoliating tip gently removes part of the stratum corneum (the upper layer of the skin) and thickens the epidermis (the second layer of the skin) unveiling skin that feels smoother and looks radiant. It gently nudges away roughness and flakiness more effectively and controlled than manually possible. Skin is stimulated to renew cells. For a firmer feel in 4-6 weeks time.

Suitable for all skin types

VisaCare's gentleness is clinically proven. The device includes two tips (sensitive and normal) addressing different levels of skin sensitivity. Philips skincare experts are at your disposal to guide you in achieving the best results.

Developed with skin experts

Philips VisaCare uses microdermabrasion technology commonly used in professional beauty salons. Philips has adapted this technology for safe use in the comfort of your own home. Philips VisaCare has been developed in collaboration with expert scientists and dermatologists.

5 minutes treatment

Achieve immediate results with only 5 minutes treatment twice a week. With a smooth and healthy glow!

Cordless usage

VisaCare's unique cordless design allows you to enjoy your treatment in the most comfortable way.
