_InSight_HD

Watch over your home from your iPhone/iPad

With HD and night vision

Keep an eye on home with the In.Sight wireless HD home monitor via your iPhone/iPad. With HD video and night vision, it lets you clearly see your home in daylight or darkness. It's easy to set up and will alert you when it detects motion/sound.

Benefits

Stay close to loved ones when you're on the move
- Wi-Fi enabled for placement anywhere in your home
- Night vision mode for viewing in the dark
- Extra-wide-angle lens to let you see more
- InSightHD app available on Apple Store
- Unlimited live viewing via Wi-Fi/3G/4G LTE

Alerts and notifications for ultimate peace of mind
- Push to talk via iPhone/iPad
- Phone receives notification when motion/sound is detected

- Share monitors with other iPhone/iPad users
- Optional cloud video recording when sound/motion is detected

Easy, safe and secure
- Easy setup of monitor via QR code
- Video encrypted for secure connection
- Powered by Ivideon, a leading firm in video cloud solutions

PHILIPS

Features

Wi-Fi enabled

The In.Sight wireless monitor is a Wi-Fi enabled monitor. It uses your home wireless network to stream live video and audio with monitors that you can set up anywhere you like.

Night vision mode

Infrared night vision mode allows you to watch your home even in the dark. When it's dark, infrared light goes on so the monitor can capture clear black-and-white video. Night vision mode switches on and off automatically, or you can adjust it manually.

Extra-wide-angle lens

Philips In.Sight wireless HD home monitor M120 boasts a viewing angle of 102 degrees that shows you more of the room at once, letting you see a lot more than other monitors.
Push to talk

With the In.Sight monitor, not only can you keep an eye on your home, but you can also talk to your loved ones. Simply press "talk" on your iPhone/iPad and communicate at once. What a great way to say hello!

Motion/sound notifications

It's impossible to predict when something might happen. In.Sight keeps watching with adjustable motion and sound detection. You will be notified automatically when sound or motion is detected.

Easy set-up via QR code

Setup is simple with the In.Sight+ app. The app will generate a QR code for your home Wi-Fi settings. With the QR code, the monitor will automatically pair with your Wi-Fi network, easily and instantly.

Specifications
