Highlights

Control from smart devices

Simply sync your lights to your existing Philips hue bridge. Once that is done, you can control your lights wirelessly from anywhere in your house. Be it from the living room, the dining table or from your bedroom, your smart device can control any light connected to the bridge.

Upgradeable

Philips hue is based on ZigBee, a low-power, safe and reliable technology to control your lights. New features and improvements are continuously added to the system. Updates to both software and firmware are done wirelessly and seamlessly directly to your hue product.

Expand your ecosystem

You can connect up to 50 bulbs or lamps to your existing Philips hue bridge. Simply begin with any of the available extension kits and start adding Philips hue bulbs or Philips Friends

of hue products in any combination. With a tap of your finger, you can now control any connected lighting in your home.

Create your own light settings

Use your favourite picture to generate the perfect colour scene for special occasions. Go back in time and relive those moments by uploading your own picture and tuning the lights accordingly. Add up to 50 lights to every setting, and recall with a simple tap of the finger.

Timer function

The timer function not only lets you pre-set what time your Friends of hue product comes on, for light when you arrive home in the evening, but also lets you change your lights gradually over time. Use it to turn your Friends of hue product into your wake-up light. Pre-set it to increase the brightness gradually to bring you out of your sleep softly and gently compared with the sudden beep or ring of a conventional alarm clock. At night, you can pre-set the timer to turn your lights off gradually to help you fall asleep naturally.

Light dynamics

The hue ecosystem is fully open for developers. There are an ever-growing number of applications being developed for hue within this community. This has resulted in creative and dynamic lighting schemes opening possibilities of syncing your lights to your favourite music, to get the party kicking.

Safety and security

Make it look like you are at home even when you are away! With online access and at the tap of your smart device's menu screen, you can now control your home lighting. Convenience and peace of mind.

Match any interiors

Philips Friends of hue Bloom is designed to create indirect ambient lighting and is a perfect way to highlight your favourite furniture or architectural features in your home. Placed in or out of sight (e.g. behind your lounge chair), it will blend seamlessly with your interiors. And because it is a plug-based product, you can easily move it around and place it where a power socket is available.

Specifications

Design and finishing

- Material: aluminium
- Colour: white

Extra feature/accessory incl.

- Dimmable
- Perfectly suited for creating ambience
- Colour changing (LED)
- Diffused light effect
- ZigBee Light Link
