Description:

Display devices have always been a key part of the PC experience. PC Gamers want a more immersive experience and Professionals seek more desktop space to run apps side by side and increase their productivity. The easiest solution is to add multiple Monitors to an existing Laptop or Desktop PC. The SenseVision MST Hub utilizes Multi Stream Transport, a unique DisplayPort™ 1.2 feature, to split a single DP 1.2 signal into multiple DisplayPort™ outputs. This enables up to four Full HD Displays to be driven independently from one DisplayPort™ 1.2 output on the source device. The MST Hubs support Dual Mode DisplayPort™ (DP++) which allows the use of DVI or HDMI™ Monitors via passive Adapters. With multiple Monitors, games become more immersive, workstations become more useful and you become more productive.

Note: When using a DisplayPort 1.1 video card the MST hub will act as a splitter, automatically mirroring your video source across all displays.
