

CUSBCHARKIT

Universal USB Travel Charger kit

The Universal USB Travel Charger kit is an ideal solution for charging an iPad or tablet on the go, as well as most other devices that use a USB connection. Offering the versatility of charging directly from a power socket or from a 12V car cigarette port, the USB travel charger kit can handle voltages from 100 to 240 volt AC or 12 volt DC and converts them automatically to the 5 volt DC that USB devices use. As well as smart phones and tablets, the charger supports safe charging of many other devices such as navigation systems, MP3 players and digital cameras. Thanks to the high output power and 2 USB ports, the versatile Conceptronic Universal USB Travel Charger kit can charge 2 devices at the same time, and comes with built-in protection against over-charging and overheating. Perfect for travel or simply a busy lifestyle, the unit is compact and features a bag for keeping the included accessories safe. A must-have for the office, at home, in a car or when travelling.

Highlights

- > Charge USB (5V) devices quickly thanks to high output (max 2100mA)
- > Charge your mobile or USB device without the need of your PC or notebook
- > Compact design
- > Includes accessory bag for safely transporting the device and accessories
- > Full protection functions: short-circuit protection, over-load protection, over-voltage protection, over-heating protection
- > AC plugs compatible with US, UK, AU and EU
