

Philips

Soundbar speaker

- 2.1 CH wireless slim subwoofer
- Bluetooth® aptX, AAC and NFC
- 1 HDMI in & HDMI out ARC
- Only 29.8mm slimness

HTL6145C/12

Powerful sound for any TV

with slim wireless subwoofer

The Philips HTL6145C soundbar combines a wafer thin profile with quality sound and thundering bass. Its ultra slim subwoofer can be placed anywhere to maximize impact.

Benefits

Richer sound for watching TV and movies

- Dual reflex system for impactful bass
- Premium soft dome tweeters for Crystal Clear Sound
- Virtual Surround Sound for a realistic movie experience
- Powerful 320W sound output
- Dolby Digital and DTS for great surround sound

Connect and enjoy all your entertainment

- Bluetooth® (aptX® and AAC) for wireless music streaming
- One-Touch with NFC-enabled smartphones for Bluetooth pairing

- HDMI ARC to access all the sound from your TV
- Connect to one HDMI in for great picture and sound quality

Designed to enhance your living space

- 2.98cm slimness
- Slim wireless subwoofer for vertical & horizontal placement
- Minimalistic chic design to suit a modern decor

PHILIPS

Features

Dual reflex system

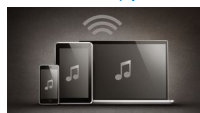

Most subwoofers on the market use a single bass port and a single driver, but for bigger and clearer bass, two bass ports are needed. The larger volume of open space created by two bass ports increases airflow which reduces distortion while simultaneously allowing more bass to be created. With two 6.5" drivers and two bass ports, the dual bass reflex system far surpasses the bass created by a normal subwoofer.

Premium soft dome tweeters

With Philips' Crystal Clear Sound, you will now be able to discern and appreciate every sound detail, the way it's meant to be heard and as the artist or director intended! Crystal Clear Sound reproduces the sound source - whether it's an action movie, a musical or a live performance - faithfully, precisely and without any distortion. Philips home theaters with Crystal Clear Sound keep audio processing to a minimum, preserving the purity of the original audio content. The result is greater sonic accuracy delivered to your ears.

Bluetooth® (aptX® and AAC)

Bluetooth® (aptX® and AAC) for wireless music steaming

NFC technology

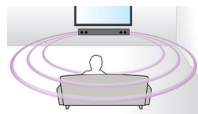

Pair Bluetooth devices easily with one-touch NFC (Near Field Communications) technology. Just tap the NFC enabled smartphone or tablet on the NFC area of a speaker to turn the speaker on, start Bluetooth pairing, and begin streaming music.

One HDMI in available

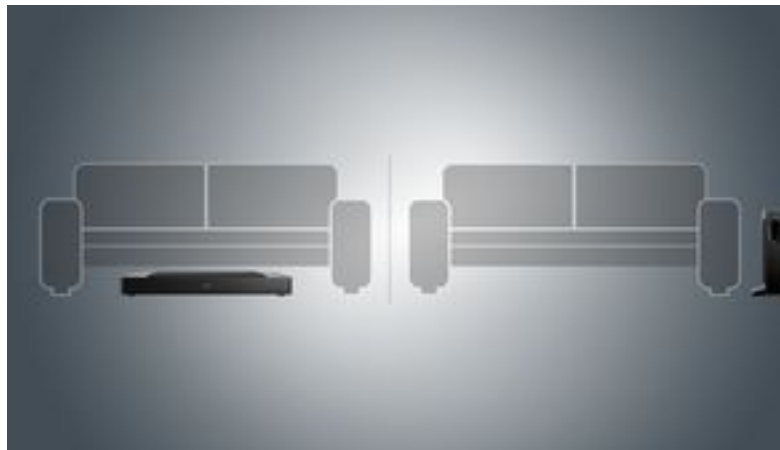

Enjoy larger-than-life 3D playback and crystal-clear 5.1 or 7.1 audio by simply plugging our player's audio one HDMI in output to the connection in your non-3D AV receiver.

Virtual Surround Sound

Philips Virtual Surround Sound produces rich and immersive surround sound from less than five-speaker system. Highly advanced spatial algorithms faithfully replicate the sonic characteristics that occur in an ideal 5.1-channel environment. Any high quality stereo source is transformed into true-to-life, multi-channel surround sound. No need to purchase extra speakers, wires or speaker stands to appreciate room-filling sound.

Wireless subwoofer

Dolby Digital and DTS

Go digital and get the most out of your music and movies. Even stereo music sounds great because Dolby Digital and DTS Digital Surround enhance digital music and videos, pumping it up so you get truly immersive surround sound out of your home cinema speaker.
