- Wireless music streaming via Bluetooth

Designed for simplicity

- Low-rise profile for the perfect fit in front of your TV

- Flexible placement on the wall, tabletop or stand

Richer sound for watching TV and movies

- Virtual Surround Sound for a realistic movie experience
- External subwoofer adds thrill to the action
- Dolby Digital for ultimate movie experience
- Twin tweeters for optimum clarity performance

PHILIPS

Features

Virtual Surround Sound

Philips Virtual Surround Sound produces rich and immersive surround sound from a less than five-speaker system. Highly advanced spatial algorithms faithfully replicate the sonic characteristics that occur in an ideal 5.1-channel environment. Any high quality stereo source is transformed into true-to-life, multi-channel surround sound. No need to purchase extra speakers, wires or speaker stands to appreciate room-filling sound.

External subwoofer

Audio in

Audio in allows you to easily play your music directly from your iPod/iPhone/iPad, MP3 player or laptop via a simple connection to your Philips home cinema system. Simply connect your audio device to the Audio in jack to enjoy your music with the superior sound quality of the Philips home cinema system.

Dolby Digital

Because Dolby Digital standards, the world's leading digital multi-channel audio standards, make use of the way the human ear naturally processes sound, you experience superb quality surround sound audio with realistic spatial cues.

USB

Works with multiple devices

Bluetooth

Bluetooth is a short-range wireless communication technology that is both stable and energy efficient. The technology allows for easy wireless connection to other Bluetooth devices, so you can play your favourite music from any smartphone, tablet or laptop, including the iPod or iPhone, with a Bluetooth-enabled speaker.
