- Set lights to turn on and off when you're away from home

#### Fits every interior perfectly

- Ultimate flexibility in placement
- Easy to cut. For maximum freedom
- Vary your ambiance with colored light
- Just the right amount of light

**PHILIPS**

## Features

### Control from smart devices

Simply sync your lights to your existing Philips hue bridge. Once that is done, you can control your lights wirelessly from anywhere in your house. Be it from the living room, the dining table or from your bedroom, your smart device can control any light connected to the bridge.

### Upgradeable

Philips Hue is based on ZigBee, a low power, safe, and reliable technology to control your lights. New features and improvements are continuously added to the system. Updates to both software and firmware are done wirelessly and seamlessly directly to your Hue product.

### Expand your ecosystem

You can connect up to 50 bulbs or lamps to your existing Philips Hue bridge. Simply begin with any of the available extension kits and start adding in any combination, Philips Hue bulbs or Philips Friends of Hue products. With a tap of your finger, you can now control any connected lighting in your home.

### Create your own light settings

Use your favorite picture to generate the perfect color scene for special occasions. Go back in time and relive those moments by uploading your own picture and tuning the lights accordingly. Add up to 50 lights to every setting and recalling, is at a simple tap of the finger.

### Timer function

The timer function not only lets you preset what time your Friends of hue product comes on - for light when you arrive home in the evening. It also lets you change your lights gradually over time. Use it to turn your Friends of hue product into your wake up light. Preset it for gradual brightness intensity to bring you out of your sleep in a soft and gentle way vs the sudden beep or

ring of a conventional alarm clock. At night, you can preset the timer to turn your lights off gradually to help you fall asleep naturally.

### Light dynamics

The hue ecosystem is fully open for developers. There is an ever growing number of applications being developed for hue within this community. This has resulted in creative and dynamic lighting schemes opening possibilities of syncing your lights to your favorite music, to get the party kicking.

### Safety and security at home

Make it look like you are at home even when you are away. Set scheduled alarms or use timers to turn your lights on and off at fixed or random times. With online access, you can also control your home lighting directly via the app on your smart device. Enable geofencing in the app and your lights will automatically turn on or off when you enter or leave the house. Convenient and peace of mind - wherever you are.

### Adheres to any solid surface

Bend, shape, and fix your Friends of hue LightStrips to highlight furniture and create complete new light effects. Thanks to the integrated adhesive tape of the Friends of Hue LightStrips, it's easy to install the product anywhere and on any piece of furniture.

### Cut to size

The Friend of hue LightStrips bring complete design freedom to your home lighting. For added convenience, these flexible 2m strips comes with cutting marks that helps guide when cutting to size to suit your application.

Up to 16 million colors

Choose from 16 million colors to match your light to the moment. Add accents to your home. Light a space with a splash of color. Or wash your walls with stunning shades.

120 lumen output

Place the Philips Friends of hue LightStrips just where you need it. Highlight a favorite spot with up to 120 lumen light output. Turn down the intensity and blend soft tones for smooth light effect across the room.
