# Color your world with light

Be it the pure colors of day light or the golden hues of Autumn forest, the Philips friends of hue Iris Clear starter kit lets you create your ideal lighting mood at home with your smartphone or devices. Color your world with light.

## Benefits

### Wireless connectivity

- Control from your iOS and Android smart devices
- Always up to date
- Connect up to 50 Hue bulbs and lamps

### Match your light to the moment

- Create light settings based on your favorite picture
- Use light to help you through your sleeping routine
- Enjoy dynamic light effects synced to your moment

- Set lights to turn on and off when you're away from home

### Fits every interior perfectly

- Freedom of placement, blends seamlessly with your interiors
- Vary your ambiance with colored light
- Just the right amount of light

# PHILIPS

## Features

### Control from smart devices

The Philips hue bridge lets you control your lights wirelessly from anywhere in your house. Be it from the living room, the dinning table or from your bedroom, your smart device can control any light connected to the bridge.

### Upgradeable

Philips Hue is based on ZigBee, a low power, safe, and reliable technology to control your lights. New features and improvements are continuously added to the system. Updates to both software and firmware are done wirelessly and seamlessly directly to your Hue product.

### Expand your Hue ecosystem

You can connect up to 50 bulbs or lamps to the Philips Hue bridge. Simply begin with any of the available starter kits and start adding Philips Hue products. You can then control your lights at the swipe of a finger with the intuitive Philips Hue app for iOS and Android smart devices.

### Create your own light settings

Use your favorite picture to generate the perfect color scene for special occasions. Go back in time and relive those moments by uploading your own picture and tuning the lights accordingly. Add up to 50 lights to every setting and recalling, is at a simple tap of the finger.

### Timer function

The timer function not only lets you preset what time your Friends of hue product comes on - for light when you arrive home in the evening. It also lets you change your lights gradually over time. Use it to turn your Friends of hue product into your wake up light. Preset it for gradual brightness intensity to bring you out of your sleep in a soft and gentle way vs the sudden beep or ring of a conventional alarm clock. At night, you can preset the timer to turn your lights off gradually to help you fall asleep naturally.

### Light dynamics

The hue ecosystem is fully open for developers. There is an ever growing number of applications being developed for hue within this community. This has resulted in creative and dynamic lighting schemes opening possibilities of syncing your lights to your favorite music, to get the party kicking.

### Safety and security at home

Make it look like you are at home even when you are away. Set scheduled alarms or use timers to turn your lights on and off at fixed or random times. With online access, you can also control your home lighting directly via the app on your smart device. Enable geofencing in the app and your lights will automatically turn on or off when you enter or leave the house. Convenient and peace of mind - wherever you are.

Match with any interiors

210 lumen output

Place the Philips Friends of hue Iris just where you need it. Highlight a favorite spot with up to 210 lumen light output. Turn down the intensity and blend soft tones for smooth light effect across the room.

Philips Friends of hue Iris is designed to create indirect ambient lighting and is a perfect way to give highlight to your favorite furniture or architectural features in your home. Timeless and distinctive in design, placed on the floor on your favourite furniture, it will blend seamlessly with your interiors. And because it is a plug-based product, you can easily move it around and place it where a power socket is available.

Up to 16 million colors

Choose from 16 million colors to match your light to the moment. Add accents to your home. Light a space with a splash of color. Or wash your walls with stunning shades.
