* At \$0.11 kWh, this 4.5 watt, 330 lumen LED candle uses \$12.38 of electricity over its 25,000 hour life. This is a \$97.63 savings when compared to the \$110.00 required to run a 40 watt, 115 lumen, incandescent A15 fan bulb over the same period. Actual savings will vary depending on cost per kWh.

* 22.8 years means rated average life based on engineering testing and probability analysis where the bulb is used on average 3 hours/day, 7 days a week.
