# Datasheet

### NEC MultiSync® P703 SST - Interactivity breathes new life into Digital Signage

Animated content catches the eye far more effectively than static images making digital signage a compelling proposition. By adding interactivity the spectator becomes an integral part of the story thus intensifying customer loyalty.

An interactive signage application integrated with the 70" 10-point-touch display entices the user to engage with the content, which at 700 cd/m<sup>2</sup> brightness and with an attractive colour spectrum guarantees an extraordinary visual and touch experience.

A perfect solutions for retail and digital signage industry where owners wish to address their customers on a more personal level whilst increasing their ROI and securing their investment into a brighter future.

## Benefits

**Avoid Touch Frustration** – satisfy users with the highest touch point accuracy, filtering out misleading touch-sizes and avoiding ghost touches even in high ambient light operation.

**Seamless Touch Integration** – work hand-in-hand with multi-touch applications while using the 10 touch points of ShadowSense™ touch technology in real-time collaboration.

**Intuitive Touch Behaviour** – benefit from Windows Ink supported automatic recognition of interactions, whether touch gestures, pen writing or erasing, in MS Office applications.

**Simple Plug & Play** – easy set-up without the need to install any drivers on the host PC for all major operating systems.

**Ease of Use** – enhance the display with an optional “Windows based” Slot-in-PC using the integrated Ultra High Resolution OPS option slot, thereby simplifying installations and reducing the points of failure.

**Cost Saving Device Management** – save effort whilst managing all connected NEC devices from a centralised location by using the NaViSet Administrator 2 software tool.
