F1

Travel with high-fidelity sound – always

The super-slim and light Philips Fidelio F1 is the ideal travel companion. Uncompromising on sound quality, smart comfort and sturdiness, it's expertly crafted for high-definition sound and steadfast superb noise isolation, wherever you go.

Full immersion in pristine details

- High-resolution audio reproduces music in its purest form
- 40-mm high-definition drivers for clear and authentic sound
- Closed-back architecture keeps sound details in and noise out
- Bass reflex system delivers clear, dynamic and balanced bass
- Unmistakable pure, richly detailed Fidelio sound signature

Travel light and with convenience

- Slim, light and compact flat-folding for travelling light
- Deluxe memory foam cushions for long-wearing comfort
- Aluminium and fine leather for premium look and feel

Intuitive and enjoyable ease of use

- Stylish faux suede pouch for easy storage and protection
- In-line remote for easy switching between music and calls

PHILIPS
Fidelio

Highlights

40 mm high-definition drivers

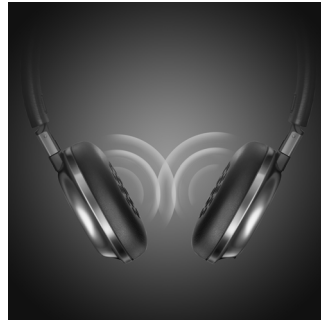

Each speaker driver is carefully hand-picked, tuned and tested before being paired to ensure the most balanced natural sound. The 40 mm drivers utilise high power neodymium magnets to deliver true high definition sound in a wide dynamic range, reproducing even the most minute details.

Fidelio sound signature

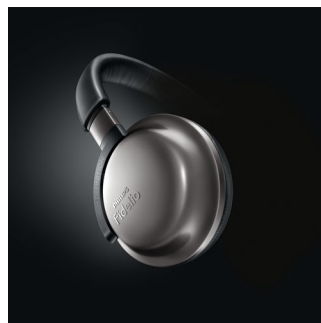

Precision 40-mm high-quality drivers, acoustic closed-back architecture and the bass reflex system are all part of Fidelio's meticulous sound engineering. The Fidelio F1 headphones deliver consistent rich bass, clear highs and a natural mid-range, which together make up the Fidelio's unmistakable sound signature.

Bass reflex system

The headphone's acoustic closed-back architecture features a Bass Reflex System that essentially comprises ear shells with strategically placed vents. These regulate the air pressure within the internal chamber, providing the diaphragm with a controlled environment for optimal acoustic response. Working in conjunction with the acoustic seal capture, they isolate every natural sound detail and deliver precise and dynamic bass, without any compromise on sound clarity.

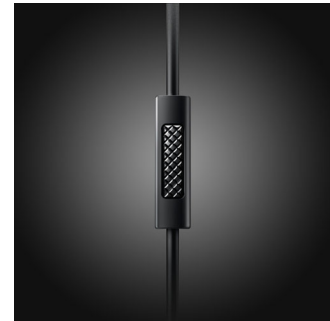

Closed-back architecture

Your Fidelio headphones feature an acoustic seal that's a specially designed ribbon lock built into the internal chamber, which eliminates any

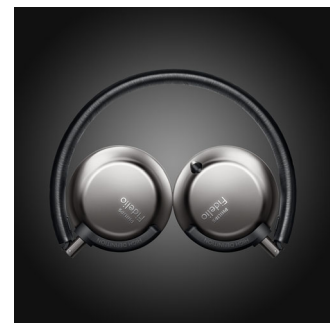

unnecessary sound leakage and preserves every minute sound detail. Not only can you enjoy excellent bass extension, but also total immersion in every superb detail of your music, without environmental disturbances.

In-line mic with remote

The Fidelio F1 headphones feature an in-line control and microphone so you can switch easily between your music and calls. Stay connected with important people – and your music, always.

Compact and light flat-folding

The Fidelio F1 headphone's slim, lightweight and compact design folds flat for convenient and easy storage – perfect for travelling light.

Specifications

Sound

- Frequency response: 7 - 40 000 Hz
- Impedance: 16 Ohm
- Sensitivity: 107 dB
- Maximum power input: 150 mW
- Distortion: < 0.1% THD
