

docking speaker

- for iPod/iPhone
- Rechargeable battery

DS7550/10

## Designed to travel the world with you

with this docking speaker

Compact and very portable, this DS7550/10 is no lightweight when it comes to sound performance. Designed to travel, it has a long-play rechargeable battery, robust aluminium finish and carrying case. Enjoy great music wherever you are.

### Benefits

#### Sound that blows you away

- wOOx technology for rich yet precise bass without distortion
- DBB to preserve low tones for deep bass at any volume level
- Shielding technology to block mobile phone interference

#### Made to go places

- Robust aluminium finish and cover case for full protection
- Elegant, slim and compact design to fit into any briefcase

#### Truly portable and versatile

- Dock any iPod/iPhone, even in its case
- Battery or AC power option for music enjoyment anywhere
- AUX-in for easy connection to almost any electronic device
- Built-in rechargeable Li-ion battery for long music playback
- Free DockStudio app for Internet radio and other cool features

# PHILIPS

## Features

### wOOx technology

wOOx technology is a revolutionary loudspeaker concept that allows you to hear and feel profoundly deep bass that is richer than any other audio system. Special speaker drivers work in harmony with the wOOx bass radiator, and precise tuning between the main driver and the tweeter ensures smooth transitions from low-mid to high frequencies. Dual suspension and a totally symmetrical sandwich construction deliver low and precise base without noticeable distortion. wOOx produces exceptionally deep and dynamic bass by using the speaker box full volume to truly magnify the impact of the music.

### Dynamic Bass Boost (DBB)

Dynamic Bass Boost maximises your music enjoyment by emphasising the bass content of the music throughout the range of volume settings - from low to high – at the touch of a button! Bottom-end bass frequencies usually get lost when the volume is set at a low level. To counteract this, Dynamic Bass Boost can be switched on to boost bass levels, so you can enjoy consistent sound even when you turn down the volume.
