Description

The P137-000-VGA Mini-DisplayPort 1.2 to VGA Adapter allows you to connect a Mac or PC with a Mini-DisplayPort or Thunderbolt output to a VGA monitor. Ideal for Thunderbolt/Mini DisplayPort equipped laptops, Chromebooks, MacBooks and Microsoft Surface. Mac (up to OSX 10.12) and Windows (up to 10) Compatible.

Supports computer video resolutions up to 1920 x 1200 and HD resolutions up to 1080p. Fully-molded compact one-piece design ensures long life enjoyment.

Features a simple plug-and-play design with an integrated chip that converts the digital Mini-DisplayPort signal to analog VGA; no drivers or setup needed. Simply plug the adapter into your Mini-DisplayPort /Thunderbolt source and connect your VGA cable between it and your monitor.
