Highlights

Control buttons

The intuitive user interface gives you precise feedback on the selected length. Use the buttons to easily select and lock-in more than 60 length settings. Quickly browse through lengths or slowly go through each small step of 0.2 mm.

60 lock-in length settings

Use the Control Buttons to precisely select and lock-in the length you want, with more than 60 length settings. Use the comb to trim with precisely 0.2mm increments between 1 and 7mm, and 1mm between 7 and 42mm. Or you can use it without the comb for a close 0.5mm trim.

3 adjustable hair combs

The clipper comes with 3 adjustable hair combs: from 1 to 7mm, 7 to 24mm and 24 to 42mm. Just attach one of the combs for more than 60 lock-in length settings, with precisely 0.2mm increments between 1 and 7mm, and 1mm between 7 and 42mm. Or you can use the clipper without the comb for a close 0.5mm trim.

Stainless steel blades

Self-sharpening stainless steel blades for long-lasting sharpness.

Motorized Combs

The motor powered length setting system easily selects and locks in the preferred length. The motor powers the comb and allows selecting between lengths with a precision of up to 0.2mm. This innovative technology gives you the security of clipping all the time at the desired length and achieving consistent results time after time.

Auto Turbo

The Turbo feature automatically boosts the speed when reaching thick hair, allowing you to get a perfect, effortless cut.

DualCut Technology

Power through any hair type with our advanced DualCut Technology, which combines a double-sharpened cutting element with low-friction engineering. The innovative cutting element is designed to cut hair twice as fast as regular Philips clippers, with the added confidence of a robust steel guard for ultimate durability.

Remembers last length setting

The comb goes back to the last used cutting length setting when the clipper is turned on.

Powerful cordless use

Use the clipper cordless for maximum power and freedom. Its powerful Lithium-Ion battery provides up to 120 minutes of cordless power after 1 hour of charging. Can be used corded and cordless.
