

# System x3650 M4 (E5-2600) Product Guide (withdrawn product)

The System x3650 M4 server provides outstanding performance for your business-critical applications. Its energy-efficient design supports more cores, memory, and data capacity in a scalable 2U package that is easy to service and manage. With more computing power per watt and the latest Intel Xeon processors, you can reduce costs while maintaining speed and availability.

Suggested use: database, virtualization, enterprise applications, collaboration/email, streaming media, web, HPC, Microsoft RemoteFX, and cloud applications.

Figure 1 shows the System x3650 M4.

Figure 1. The System x3650 M4

#### Did you know?

The x3650 M4 offers a flexible, scalable design and simple upgrade path to 16 hard-disk drives (HDDs) or solid-state drives (SSDs) plus optical and tape drives at the same time, with up to six PCIe Gen 3 slots and up to 768 GB of memory. This flexible onboard Ethernet solution provides four standard embedded Gigabit Ethernet ports and two optional embedded 10 Gb Ethernet ports without occupying PCIe slots. Comprehensive systems management tools with the next-generation Integrated Management Module II (IMM2) make it easy to deploy, integrate, service, and manage.

## **Key features**

The x3650 M4 is an outstanding 2U two-socket business-critical server, offering improved performance and pay-as-you grow flexibility along with new features that improve server management capability. This powerful system is designed for your most important business applications and cloud deployments.

Combining balanced performance and flexibility, the x3650 M4 is a great choice for small and medium businesses up to the large enterprise. It can provide outstanding uptime to keep business-critical applications and cloud deployments running safely. Ease of use and comprehensive systems management tools make it easy to deploy. Outstanding RAS and high-efficiency design improve your business environment and help save operational costs.

#### Scalability and performance

The x3650 M4 offers numerous features to boost performance, improve scalability, and reduce costs:

- Intel Xeon processor E5-2600 product family
  - Improves productivity by offering superior system performance with up to 8-core processors, up to 20 MB of L3 cache, and up to two 8 GT/s QPI interconnect links.
  - Supports up to two processors, 16 cores, and 32 threads maximize the concurrent execution of multi-threaded applications.
  - Supports up to 1600 MHz memory speeds.
  - Supports up to 768 GB memory with 32 GB LRDIMMs or HCDIMMs.
- Intelligent and adaptive system performance with Intel Turbo Boost Technology 2.0 allows CPU cores to run at maximum speeds during peak workloads by temporarily going beyond processor TDP.
- Intel Hyper-Threading Technology boosts performance for multi-threaded applications by enabling simultaneous multi-threading within each processor core, up to two threads per core.
- Intel Virtualization Technology integrates hardware-level virtualization hooks that allow operating system vendors to better utilize the hardware for virtualization workloads.
- Intel Advanced Vector Extensions (AVX) significantly improve floating-point performance for compute-intensive technical and scientific applications.
- 12 Gbps SAS internal storage connectivity doubles the data transfer rate compared to 6 Gb SAS solutions to maximize performance of storage I/O-intensive applications.
- The use of solid-state drives (SSDs) instead of, or along with, traditional spinning drives (HDDs) can significantly improve I/O performance. An SSD can support up to 100 times more I/O operations per second (IOPS) than a typical HDD.
- Up to 32 1.8-inch SSD bays, or up to 16 2.5-inch bays, or up to 6 3.5-inch bays, together with internal backup and an optical drive at the same time, provide a flexible and scalable all-in-one platform to meet your increasing demands.
- The server has four integrated Gigabit Ethernet ports and two optional 10 Gb Ethernet ports with mezzanine cards that do not consume PICe slots.
- The server offers PCI Express 3.0 I/O expansion capabilities that improve the theoretical maximum bandwidth by almost 100% (8 GTps per link using 128b/130b encoding) compared to the previous generation of PCI Express 2.0 (5 GTps per link using 8b/10b encoding).
- With Intel Integrated I/O Technology, the PCI Express 3.0 controller is integrated into the Intel Xeon processor E5 family. This integration helps to dramatically reduce I/O latency and increase overall system performance.
- Support for NVIDIA Quadro graphics processing units (GPUs) to maximize computing power

#### Availability and serviceability

The x3650 M4 provides many features to simplify serviceability and increase system uptime:

- The server offers memory mirroring and memory rank sparing for redundancy in the event of a noncorrectable memory failure.
- Tool-less cover removal provides easy access to upgrades and serviceable parts, such as CPU, memory, and adapter cards.
- The server offers hot-swap drives, supporting RAID redundancy for data protection and greater system uptime.
- The server has up to two redundant hot-swap power supplies and four hot-swap dual-motor redundant fans (two fan zones with an N+1 fan design) to provide availability for business-critical applications.
- The light path diagnostics panel and individual light path LEDs quickly lead the technician to failed (or failing) components, which simplifies servicing, speeds up problem resolution, and helps improve system availability.
- Predictive Failure Analysis (PFA) detects when system components (processors, VRMs, memory, HDDs, fans, and power supplies) operate outside of standard thresholds and generates proactive alerts in advance of a possible failure, therefore increasing uptime.
- Solid-state drives (SSDs) offer significantly better reliability than traditional mechanical HDDs for greater uptime.
- Built-in Integrated Management Module Version II (IMM2) continuously monitors system parameters, triggers alerts, and performs recovering actions in case of failures to minimize downtime.
- Built-in diagnostics, using Dynamic Systems Analysis (DSA) Preboot, speed up troubleshooting tasks to reduce service time.
- Three-year customer-replaceable unit and on-site limited warranty, 9x5 next business day. Optional service upgrades are available.

#### Manageability and security

Powerful systems management features simplify local and remote management of the x3650 M4:

- The server includes an Integrated Management Module II (IMM2) to monitor server availability and perform remote management.
- Integrated industry-standard Unified Extensible Firmware Interface (UEFI) enables improved setup, configuration, and updates, and simplifies error handling.
- Integrated Trusted Platform Module (TPM) 1.2 support enables advanced cryptographic functionality, such as digital signatures and remote attestation.
- Industry-standard Advanced Encryption Standard (AES) NI support for faster, stronger encryption.
- IBM Systems Director offers comprehensive systems management tools that help to increase uptime, reduce costs, and improve productivity through advanced server management capabilities.
- Intel Execute Disable Bit functionality can help prevent certain classes of malicious buffer overflow attacks when combined with a supported operating system.
- Intel Trusted Execution Technology provides enhanced security through hardware-based resistance to malicious software attacks, allowing an application to run in its own isolated space, protected from all other software running on a system.

#### **Energy efficiency**

The x3650 M4 offers the following energy-efficiency features to save energy, reduce operational costs, increase energy availability, and contribute to the green environment:

- Energy-efficient planar components help lower operational costs.
- The x3650 M4 is Energy Star 2.0 compliant. Energy Star is the trusted, US government-backed symbol for energy efficiency, with the goal of helping customers save money and protect the environment through energy efficient products and practices.
- Highly efficient 550 W, 750 W, and 900 W AC power supplies with 80 PLUS Platinum certification. Available 750W DC power option.
- Intel Xeon processor E5-2600 product family offers significantly better performance over the previous generation while fitting into the same thermal design power (TDP) limits.
- Intel Intelligent Power Capability powers individual processor elements on and off as needed, to reduce power draw.
- Low-voltage Intel Xeon processors draw less energy to satisfy the demands of power and thermally constrained data centers and telecommunication environments.
- Low-voltage 1.35 V DDR3 memory RDIMMs consume up to 19% less energy compared to 1.5 V DDR3 RDIMMs.
- Solid state drives (SSDs) consume as much as 80% less power than traditional spinning 2.5-inch HDDs.
- The server uses hexagonal ventilation holes, which is a part of Calibrated Vectored Cooling technology. Hexagonal holes can be grouped more densely than round holes, providing more efficient airflow through the system.
- IBM Systems Director Active Energy Manager<sup>™</sup> provides advanced data center power notification and management to help achieve lower heat output and reduced cooling needs.

# **Standard specifications**

The following table lists the standard specifications.

| Components                  | Specification  |
|-----------------------------|--|
| Form factor                 | 2U Rack-mount.   |
| Processor                   | Up to two Intel Xeon processor E5-2600 product family CPUs with eight cores (up to 2.9 GHz) or six cores (up to 2.9 GHz) or four cores (up to 3.3 GHz). Two QPI links up to 8.0 GT/s each. Up to 1600 MHz memory speed. Up to 20 MB L3 cache.  |
| Chipset                     | Intel C602J.   |
| Memory                      | Up to 24 DIMM sockets (12 DIMMs per processor).<br>RDIMMs, UDIMMs, HyperCloud DIMMs, and LRDIMMs (Load Reduced DIMMs) are<br>supported, but memory types cannot be intermixed. Memory speed up to 1600 MHz.  |
| Memory<br>maximums          | <ul> <li>With RDIMMs: Up to 384 GB with 24x 16 GB RDIMMs and two processors</li> <li>With UDIMMs: Up to 64 GB with 16x 4 GB UDIMMs and two processors</li> <li>With HyperCloud DIMMs: Up to 768 GB with 24x 32 GB DIMMs and two processors</li> <li>With LRDIMMs: Up to 768 GB with 24x 32 GB LRDIMMs and two processors</li> </ul>  |
| Memory<br>protection        | ECC, Chipkill, memory mirroring, and memory rank sparing.  |
| Disk drive bays             | Up to 32 1.8" SSD bays, or 16 2.5" hot-swap SAS/SATA bays, or up to six 3.5" hot-swap SAS/SATA bays, or up to eight 2.5" Simple Swap SATA bays, or up to six 3.5" Simple Swap SATA bays.   |
| Maximum<br>internal storage | Up to 28.8 TB with 1.8 TB 2.5" SAS HDDs, up to 16 TB with 1 TB 2.5" NL SAS/SATA HDDs, up to 25.6 TB with 800 GB 1.8" SATA SSDs, up to 25.6 TB with 1.6 TB 2.5" SAS/SATA SSDs, or up to 36 TB with 6 TB 3.5" NL SAS/SATA HDDs. Intermix of SAS/SATA is supported.   |
| RAID support                | • 6 Gb SAS/SATA: RAID 0, 1, 10 with integrated M5110e or optional M5110; optional upgrades to RAID 5, 50 are available (zero-cache; 512 MB battery-backed cache; 512 MB or 1 GB flash-backed cache). Optional upgrade to RAID 6, 60 is available for M5110e or M5110 with 512 MB or 1 GB cache upgrades.   |
|                             | • <b>12 Gb SAS/SATA:</b> RAID 0, 1, 10 with optional M5210; optional upgrades to RAID 5, 50 are available (zero-cache; 1 GB non-backed cache; 1 GB or 2 GB flash-backed cache). Optional upgrade to RAID 6, 60 is available for M5210 with 1 GB or 2 GB cache upgrades.  |
| Optical drive<br>bays       | One bay for optional DVD-ROM or Multiburner drive.   |
| Tape drive bays             | Optional Tape Enablement Kit is available to support one DDS5, DDS6, or RDX internal USB tape drive.   |
| Network<br>interfaces       | Four integrated Gigabit Ethernet 1000BASE-T ports (RJ-45); two embedded 10 Gb Ethernet ports (10GBASE-T RJ-45 or 10GBASE-SR SFP+ based) on optional 10 Gb Ethernet mezzanine card (does not consume PCIe slot).  |
| PCI Expansion<br>slots      | Up to six slots depending on the riser cards installed. The slots are as follows:<br>Slot 1: PCle 3.0 x8; full-height, full-length<br>Slot 2: PCle 3.0 x8; full-height, half-length<br>Slot 3: PCle 3.0 x8; full-height, half-length<br>Slot 4: Optional, requires second processor and second riser card<br>Slot 5: Optional, requires second processor and second riser card<br>Slot 6: Optional, requires second processor and second riser card<br>Optional riser cards available with PCle x8 or PCle x16 or PCl-X slots. |

Table 1. Standard specifications

| Components            | Specification   |
|-----------------------|---|
| Ports                 | Two USB 2.0 and one DB-15 video on front. Four USB 2.0, one DB-15 video, one DB-9 serial, one RJ-45 systems management, four RJ-45 GbE network ports, two optional RJ-45 or SFP+ 10 GbE network ports on rear. Two internal USB ports (for embedded hypervisor and internal tape drive).        |
| Cooling               | Calibrated Vectored Cooling with up to four redundant hot swap fans (three standard, additional fan with second processor or with the x3650 M4 Thermal Solution Kit); two fan zones with N+1 fan design; each fan has two motors.   |
| Power supply          | Up to two redundant hot-swap 550 W AC or 750 W AC or 900 W AC power supplies (all 80 PLUS Platinum certification), or -48V 750 W DC power supply options.   |
| Video                 | Matrox G200eR2 with 16 MB memory integrated into the IMM2. Maximum resolution is 1600x1200 at 75 Hz with 16 M colors.   |
| Hot-swap parts        | Hard drives, power supplies, and fans.  |
| Systems<br>management | UEFI, Integrated Management Module II (IMM2), Predictive Failure Analysis, Light Path<br>Diagnostics, Automatic Server Restart, IBM Systems Director and Active Energy Manager,<br>ServerGuide. Optional Integrated Management Module Advanced Upgrade software feature<br>for remote presence. |
| Security<br>features  | Power-on password, administrator's password, Trusted Platform Module (TPM).   |
| Operating<br>systems  | Microsoft Windows Server 2012 R2, 2012, 2008 R2 and 2008; Red Hat Enterprise Linux (RHEL) 5, 6, and 7; SUSE Linux Enterprise Server (SLES) 10, 11, and 12; VMware ESX 4.1 and ESXi 4.1, VMware vSphere (ESXi) 5.0, 5.1, and 5.5.  |
| Limited warranty      | Three-year customer-replaceable unit and on-site limited warranty with 9x5 next business day (NBD).   |
| Service and support   | Optional service upgrades are available through Lenovo Services: Four-hour or two-hour response time, eight-hour fix time, one-year or two-year warranty extension, remote technical support for System x hardware and some third-party applications.   |
| Dimensions            | Height: 86 mm (3.4 in), width: 445 mm (17.5 in), depth: 746 mm (29.4 in)  |
| Weight                | Minimum configuration: 25 kg (55 lb), maximum: 30 kg (65 lb)  |

The x3650 M4 servers are shipped with the following items:

- Statement of Limited Warranty
- Important Notices
- Rack Installation Instructions
- Documentation CD that contains the Installation and User's Guide
- IBM Systems Director Flyer
- System x Gen-III Slides Kit
- System x Gen-III Cable Management Arm (CMA)
- 2.8 m (9.18 in) C13-C14 power cord (one for models with one power supply, and two for models with two power supplies)

## Standard models

The following table lists the standard models.

#### Table 2. Standard models

| Model<br>number   | Intel Xeon processors†<br>(two maximum)   | Memory  | RAID                  | Disk<br>bays      | Disks  | GbE | Optical | Power supply |

† Processor detail: Processor quantity and model, cores, core speed, L3 cache, memory speed, TDP. \* Model GSx includes preinstalled SAP Discovery System V5 - see below. Also includes Blank USB Memory Key for VMWare ESXi Downloads, part number 41Y8298.

#### Workload optimized model - SAP Discovery system

Model GSx comes preinstalled with SAP Discovery system V5. The SAP Discovery system is a fully configured and preintegrated service-oriented architecture (SOA) platform enabler for SAP development environments. The System x solution with SAP Discovery system provides a robust System x hardware platform for evaluating SAP software. The x3650 M4 model is pre-installed with a wide range of SAP software and development tools, the solution offers a fast, easy and cost-effective way to explore, evaluate and train on SAP products including SAP HANA, before deploying it in your infrastructure.

Note: The model that includes the preinstalled copy of SAP software does not include a license to use such SAP software. Please contact your SAP representative to obtain the appropriate license rights to use the SAP software.

# **Express models**

The following table lists the Express models.

#### **Processor options**

The x3650 M4 supports the processor options listed in the following table. The server supports up to two processors. This table shows which server models have each processor standard. If there is no corresponding *where-used* model for a particular processor, this processor is only available through CTO. Second processor options include an additional cooling fan.

| Part number | Feature<br>codes* | Description                                    | Models<br>where used |
|-------------|-------------------|--|----------------------|
| 69Y5323     | A1KJ / A1KV       | Intel Xeon E5-2603 4C 1.8GHz 10MB 1066MHz 80W  | A2x                  |

Table 4. Processor options

\* The first feature code is for the first processor; the second feature code is for the second processor

#### **Memory options**

System x DDR3 memory is compatibility tested and tuned for optimal System x performance and throughput. System x memory specifications are integrated into the light path diagnostics for immediate system performance feedback and optimum system uptime. From a service and support standpoint, System x memory automatically assumes the System x system warranty, and Lenovo provides service and support worldwide.

The System x3650 M4 supports DDR3 memory. The server supports up to 12 DIMMs when one processor is installed and up to 24 DIMMs when two processors are installed. Each processor has four memory channels, and there are three DIMMs per channel.

The following rules apply when selecting the memory configuration:

- Server supports UDIMMs, RDIMMs, HyperCloud DIMMs (also known as HCDIMMs), and LRDIMMs.
- Mixing different types of memory (UDIMMs, RDIMMs, HyperCloud DIMMs, and LRDIMMs) is not supported.
- 16 GB HyperCloud DIMMs and 32 GB HyperCloud DIMMs cannot be mixed.
- Mixing 1.5 V and 1.35 V DIMMs is supported; in such a case, all DIMMs operate at 1.5 V.
- Maximum number of ranks per one channel is eight (with the exception of Load Reduced DIMMs and HyperCloud DIMMs where more than eight ranks are supported, because one quad-rank LRDIMM or HCDIMM provides the reduced electrical load on a memory bus).
- The maximum quantity of DIMMs that can be installed in the server depends on the number of CPUs, DIMM type, rank, and operating voltage, as shown in the "Max. qty supported" row in Table 5.
- All DIMMs in the server operate at the same speed, which is determined as the lowest value of:
  - Memory speed that is supported by the specific CPU.
  - Lowest of maximum operating speeds for selected memory configuration that depends on rated speed, operating voltage, and quantity of DIMMs per channel, as shown under "Maximum operating speed" section in the table.

The following memory protection technologies are supported:

- ECC
- Chipkill (for x4-based memory DIMMs)
- Memory mirroring
- Memory rank sparing

If memory mirroring is used, DIMMs must be installed in pairs (minimum of one pair per each CPU), and both DIMMs in a pair must be identical in type and size.

If memory rank sparing is used, then a minimum of one quad-rank DIMM or two single-rank or dual-rank DIMMs must be installed per populated channel (the DIMMs do not need being identical). In rank sparing mode, one rank of a DIMM in each populated channel is reserved as spare memory. The size of a rank varies depending on the DIMMs installed.

The following table shows the characteristics of the supported DIMMs. Tables cells highlighted with a gray background indicate when the combination of DIMM voltage and the number of DIMMs per channel still allows the DIMMs to operate at a rated speed.

| DIMM<br>specification         | RDIMM         |                    |                  |               |                                  |  |               |               |  |  |
|-------------------------------|---------------|--------------------|------------------|---------------|----------------------------------|--|---------------|---------------|--|--|
| Rank                          |               | Single ra          | ınk              |               | Dual ra                          | ank  | Qua           | d rank        |  |  |

### Internal storage

The System x3650 M4 server supports 1.8-inch solid-state drives (SSDs), 2.5-inch SSDs and HDDs, and 3.5-inch HDDs. The server supports the following configurations:

- 1. 16x 2.5-inch hot-swap drive bays, either with or without a SAS expander
- 2. 8x 2.5-inch hot-swap drive bays
- 3. 6x 3.5-inch hot-swap hard drive bays
- 4. 8x 2.5-inch hot-swap drive bays + 16x 1.8-inch SSD drive bays
- 5. 8x 2.5-inch simple swap drive bays (only available in CTO)
- 6. 32x 1.8-inch SSD drive bays (only available in CTO)
- 7. 6x 3.5-inch simple-swap SATA hard drive bays (only available in CTO)

The following figure shows the first three of these configurations.

Figure 5. Internal drive configurations (3 of 6 configurations shown)

#### Backplanes and enablement kits

All standard models, except models C4x and C5x, ship with eight 2.5-inch Slim-SFF SAS/SATA hot-swap hard drive bays. Models C4x and C5x ship with six 3.5-inch SAS/SATA hot-swap hard drive bays.

The following table shows the internal storage expansion options that are available for x3650 M4 server.

| Table 7. Internal storage expansion o | options |
|---------------------------------------|---------|
|---------------------------------------|---------|

| Part<br>number | Feature<br>code | Name and description  | Maximum<br>supported |
|----------------|-----------------|---|----------------------|
| 6 Gb SAS/      | SATA            |   |                      |

Table 9. RAID controllers and HBAs for internal storage (Part 2: 12 Gbps SAS)

\* Requires cache memory upgrade (47C8656, 47C8660, or 47C8664).

The integrated ServeRAID M5110e SAS/SATA Controller has the following specifications:

- Eight internal 6 Gbps SAS/SATA ports
- Two x4 mini-SAS internal connectors
- Supports RAID levels 0, 1, and 10
- Supports RAID levels 5 and 50 with optional M5100 Series RAID 5 upgrades
- Supports RAID 6 and 60 with the optional M5100 Series RAID 6 Upgrade
- Supports 512 MB battery-backed cache or 512 MB, 1 GB, or 2 GB flash-backed cache
- Up to 6 Gbps throughput per port
- PCle x8 Gen 3 host interface
- Based on the LSI SAS2208 6 Gbps ROC controller

The ServeRAID M5110 SAS/SATA Controller has the following specifications:

- Eight internal 6 Gbps SAS/SATA ports
- Two x4 mini-SAS internal connectors (SFF-8087)
- Supports connections to SAS/SATA drives and SAS Expanders
- Supports RAID levels 0, 1, and 10
- Supports RAID levels 5 and 50 with optional M5100 Series RAID 5 upgrades
- Supports RAID 6 and 60 with the optional M5100 Series RAID 6 Upgrade
- Supports 512 MB battery-backed cache or 512 MB, 1 GB, or 2 GB flash-backed cache
- Up to 6 Gbps throughput per port
- PCIe 3.0 x8 host interface
- Based on the LSI SAS2208 6 Gbps ROC controller

The ServeRAID M5210 SAS/SATA Controller has the following specifications:

- Eight internal 12 Gbps SAS/SATA ports
- Two x4 HD mini-SAS internal connectors (SFF-8643)
- Supports connections to SAS/SATA drives and SAS Expanders
- Supports RAID levels 0, 1, and 10
- Supports RAID levels 5 and 50 with optional M5200 Series RAID 5 upgrades
- Supports RAID 6 and 60 with the optional M5200 Series RAID 6 Upgrade
- Supports 1 GB non-backed cache or 1 GB, 2 GB, or 4 GB flash-backed cache
- Up to 12 Gbps throughput per port
- PCIe 3.0 x8 host interface
- Based on the LSI SAS3108 12 Gbps ROC controller

The 6Gb Performance Optimized HBA has the following specifications:

- Eight internal 6 Gbps SAS/SATA ports
- Two x4 mini-SAS internal connectors (SFF-8087)
- Supports connections to SAS/SATA HDDs and SATA SSDs
- Optimized for SSD performance
- No RAID support
- Up to 6 Gbps throughput per port
- PCle 2.0 x8 host interface
- Based on the LSI SAS2008 6 Gbps controller

The N2115 SAS/SATA HBA has the following specifications:

- Eight internal 6 Gbps SAS/SATA ports
- Two x4 mini-SAS internal connectors (SFF-8087)
- Supports connections to SAS/SATA HDDs and SATA SSDs
- Optimized for SSD performance
- No RAID support
- Up to 6 Gbps throughput per port
- PCle 3.0 x8 host interface
- Based on the LSI SAS2308 6 Gbps controller

The N2215 SAS/SATA HBA has the following specifications:

- Eight internal 12 Gbps SAS/SATA ports
- Two x4 HD mini-SAS internal connectors (SFF-8643)
- Supports connections to SAS/SATA HDDs and SATA SSDs
- Optimized for SSD performance
- No RAID support
- Up to 12 Gbps throughput per port
- PCIe 3.0 x8 host interface
- Based on the LSI SAS3008 12 Gbps controller

For more information, see the list of Lenovo Press Product Guides in the RAID adapters category: https://lenovopress.com/servers/options/raid?rt=product-guide

# Internal drive options

The following table lists currently available drive options for the internal disk storage of the x3650 M4 server.

| Part number     | Feature<br>code | Description                                    | Maximum<br>supported |
|-----------------|-----------------|--|----------------------|
| 1.8-inch SSDs   | - Enterpris     | e  |                      |
| 41Y8366         | A4FS            | S3700 200GB SATA 1.8" MLC Enterprise SSD       | 32                   |

\* Simple swap drives are for use in configurations that are only available via special bid or Configure To Order (CTO).

## Internal backup units

The server supports the internal tape drive options listed in the following table. The x3650 M4 Tape Enablement Kit (69Y5320) is required to support these tapes internally.

| Part<br>number | Feature<br>code | Description                                    | Maximum<br>supported |
|----------------|-----------------|--|----------------------|
| 00D2786        | A2VE            | RDX Internal USB 3.0 Dock with 320GB Cartridge | 1                    |
| 00D2787        | A2VF            | RDX Internal USB 3.0 Dock with 500GB Cartridge | 1                    |
| 00D2788        | A2VG            | RDX Internal USB 3.0 Dock with 1TB Cartridge   | 1                    |

Table 11. Internal tape drives

For more information, see the list of lenovo Press Product Guides in the Backup units category: https://lenovopress.com/storage/tape?rt=product-guide

### **Optical drives**

The server supports the optical drive options listed in the following table.

Table 12. Optical drives

| Part number | Feature<br>code | Description                          | Maximum<br>supported | Standard models where used |
|-------------|-----------------|--------------------------------------|----------------------|----------------------------|
| 46M0901     | 4161            | UltraSlim Enhanced SATA DVD-ROM      | 1                    | -                          |
| 46M0902     | 4163            | UltraSlim Enhanced SATA Multi-Burner | 1                    | -                          |

UltraSlim Enhanced SATA DVD-ROM (part number 46M0901) supports the following media and speeds for reading:

- CD-ROM 24X
- CD-DA (DAE) 20X
- CD-R 24X
- CD-RW 24X
- DVD-ROM (single layer) 8X
- DVD-ROM (dual layer) 8X
- DVD-R (4.7 GB) 6X
- DVD-R DL 4X
- DVD+R 6X
- DVD+R DL 4X
- DVD-RW (4.7 GB) 4X
- DVD+RW 4X
- DVD-RAM (4.7/9.4 GB) 4X

UltraSlim Enhanced SATA Multi-Burner (46M0902) supports the same media and speeds for reading as DVD-ROM (46M0901). This drive also supports the following media and speeds for writing:

- CD-R 24X
- CD-RW 4X
- High Speed CD-RW 10X
- Ultra Speed CD-RW 16X
- Ultra Speed Plus CD-RW 16X
- DVD-R 8X
- DVD-R DL 6X
- DVD+R 8X
- DVD+R DL 6X
- DVD-RW 6X
- DVD+RW 8X
- DVD-RAM 5X

## I/O expansion options

The server supports up to six PCIe slots with different riser cards installed into two riser sockets on the system planar (one riser socket supports installation of one riser card). Riser 1 supplies slots 1, 2, and 3. Riser 2 supplies slots 4, 5, and 6. Standard models have Riser card 1 installed with three PCIe 3.0 x8 slots. To enable slots 4 - 6, install a second processor and a second riser card.

The following table lists the PCI riser card options available.

| Part number | Feature<br>code | Description   | Maximum<br>supported |
|-------------|-----------------|---|----------------------|
| 69Y5321     | A1JT / A1JU*    | x3650 M4 PCIe Riser Card (3 x8 PCIe slots)<br>(one included in standard models in Riser socket 1) | 2                    |
| 69Y5322     | A1JP / A1JQ*    | x3650 M4 PCIe Riser Card (1 x16 + 1 x8 PCIe slots)  | 2                    |
| 81Y6843     | A1JR / A1JS*    | x3650 M4 PCIX Riser Card (2 PCIX + 1 x16 PCIe slots)  | 2                    |
| 90Y5085     | A3L2 / A3A1*    | x3650 M4 PCIe Riser Card 2 (1 x16 for GPU + 1 x8 FH/HL Slots)                                     | 2                    |

Table 13. PCI riser card options

\* For CTO orders, the first feature code is for the first riser slot and the second feature code is for the second riser slot.

The locations of the PCIe slots are shown in the following figure.

Figure 6. Slot dimensions

The specific slots that are available depend on the riser cards installed in Riser socket 1 and Riser socket 2, as shown in the following table. Standard models have 69Y5321 installed in Riser socket 1.

**Tip**: All slots support full-height adapters. Slots 1, 4, and 5 support full-length adapters, whereas slots 2, 3, and 6 (when present) support half-length adapters.

Table 14. PCIe slot descriptions (FH=full height, FL=full length, HL=half length, DW=double width)

Note: Slots 4, 5, and 6 require a second processor to be installed.

The x3650 M4 Thermal Solution Kit, 46W8422 contains an 80 mm fan which provides the fourth system fan needed for the QLogic Dual Port 10GbE SFP+ Embedded VFA for IBM System x when only one processor is installed. The Thermal Solution Kit is not needed if two processors are installed, since the second processor includes this fan.

Table 15. Thermal Solution Kit

| Part number | Feature<br>code | Description                   | Maximum<br>supported |
|-------------|-----------------|-------------------------------|----------------------|
| 46W8422     | A499*           | x3650 M4 Thermal Solution Kit | 1                    |

\* For CTO orders, feature code A3ZE, IBM System x3650 M4 Fan Assembling Kit will be substituted

### **Network adapters**

The x3650 M4 supports four integrated Gigabit Ethernet ports. Optionally, two 10 Gb Ethernet ports can be added by installing one of the dual-port 10 Gb Ethernet mezzanine cards listed in the following table. These cards use a dedicated connector on the motherboard and do not consume a PCI expansion slot.

Integrated NICs have the following features:

- Intel I350AM4 chip
- Four GbE ports
- TCP Offload Engine (TOE) support
- Wake on LAN support
- IPv6 support
- 802.1Q VLAN tagging support
- NIC Teaming (load balancing and failover)

The following table lists additional network adapters that are currently available for the x3650 M4.

| Table 16. Network adapters | Table 16 | . Network | adapters |
|----------------------------|----------|-----------|----------|
|----------------------------|----------|-----------|----------|

| Part number     | Feature code | Description  | Maximum<br>supported# |

| 00D4143   | A36R | Dual Port FDR Embedded Adapter                  | 1* |  |  |
| InfiniBand  |      |   |    |  |  |
| 00D9550   | A3PN | Mellanox ConnectX-3 FDR VPI IB/E Adapter        | 6* |  |  |

\* SFP+ and QSFP+ based adapters require supported transceivers or DAC cables that must be purchased

separately. \*\* The QLogic Dual Port 10GbE SFP+ Embedded VFA requires the x3650 M4 Thermal Solution Kit, 46W8422 or the second processor (with additional system fan).

# Maximum quantity is achieved with two processors installed. With one processor, the maximum quantity is half of the listed value (this does not apply to mezzanine cards).

For more information, see the list of Lenovo Press Product Guides in the Networking adapters category: https://lenovopress.com/servers/options/ethernet?rt=product-quide

### Storage host bus adapters

The following table lists storage HBAs available for the x3650 M4 server. The maximum quantity listed is for configurations with two processors installed. If one processor is installed, the maximum quantity supported is half of the listed value.

| Part number           | Feature<br>code      | Description                    | Maximum<br>supported |  |  |  |
|-----------------------|----------------------|--------------------------------|----------------------|--|--|--|
| Fibre Channel - 16 Gb |                      |                                |                      |  |  |  |
| 81Y1655               | A2W5                 | Emulex 16Gb FC Single-port HBA | 6                    |  |  |  |
| 81Y1662               | A2W6                 | Emulex 16Gb FC Dual-port HBA   | 6                    |  |  |  |
| 00Y3337               | A3KW                 | QLogic 16Gb FC Single-port HBA | 6                    |  |  |  |
| 00Y3341               | АЗКХ                 | QLogic 16Gb FC Dual-port HBA   | 6                    |  |  |  |
| Fibre Channel - 8     | Fibre Channel - 8 Gb |                                |                      |  |  |  |
| 42D0485               | 3580                 | Emulex 8 Gb FC Single-port HBA | 6                    |  |  |  |

Table 17. Storage adapters

For more information, see the list of Lenovo PressProduct Guides in the Host bus adapters category: https://lenovopress.com/servers/options/hba?rt=product-guide

## **PCIe SSD** adapters

The server supports the High IOPS SSD adapters listed in the following table.

| Part number      | Feature code | Description                               | Maximum supported |
|------------------|--------------|---|-------------------|
| Enterprise       |              |   |                   |
| 00AE995          | ARYP         | 1000GB Enterprise io3 Flash Adapter       | 4                 |
| 00AE998          | ARYQ         | 1300GB Enterprise io3 Flash Adapter       | 4                 |
| 00JY001          | ARYR         | 2600GB Enterprise io3 Flash Adapter       | 4                 |
| 00JY004          | ARYS         | 5200GB Enterprise io3 Flash Adapter       | 4*                |
| Enterprise Value |              |   |                   |
| 00AE983          | ARYK         | 1250GB Enterprise Value io3 Flash Adapter | 4                 |
| 00AE986          | ARYL         | 1600GB Enterprise Value io3 Flash Adapter | 4                 |
| 00AE989          | ARYM         | 3200GB Enterprise Value io3 Flash Adapter | 4                 |
| 00AE992          | ARYN         | 6400GB Enterprise Value io3 Flash Adapter | 4*                |

Table 18. SSD adapters

\* The 5200GB and 6400GB io3 Flash Adapters cannot be factory installed; they are supported as field-installable options only. The server cannot be shipped with these adapters installed.

For details about these adapters, see the Lenovo Press Product Guides in the PCIe SSD Adapters category, found at the following address:

https://lenovopress.com/servers/options/ssdadapter?rt=product-guide

### **GPU** adapters

The server supports GPUs provided the appropriate riser card is installed (one or two riser cards depending on the number of GPUs). For the NVIDIA Quadro K600, riser card 69Y5322 is used. For all other GPUs, riser card 90Y5085 is used. The server provides up to 225W of external power to each GPU. The following table lists the supported GPUs.

| Part number | Feature<br>code | Description                      | Maximum<br>supported |
|-------------|-----------------|----------------------------------|----------------------|
| None*       | A3WH            | NVIDIA Quadro K600               | 4                    |
| None*       | A3WJ            | NVIDIA Quadro K2000              | 2                    |
| None*       | A3YU            | NVIDIA Quadro K4000              | 2                    |
| None*       | A3YW            | NVIDIA Quadro K5000              | 2                    |
| None*       | A3YV            | NVIDIA Quadro K6000              | 2                    |
| None*       | A470            | NVIDIA Grid K2 (Actively Cooled) | 2                    |

Table 19. GPU adapters

\* Available only via CTO or special bid.

The following configuration rules apply when selecting GPU adapters:

- General requirements for all GPUs
  - Use the configurator tools to ensure the necessary cables, riser cards, air baffles, and other prerequisites are selected
  - When 2 GPUs are selected (2, 3 or 4 GPUs in the case of the Quadro K600), the second processor is required and will require a special heatsink
  - GPUs cannot be mixed
  - Further restrictions apply depending on the power supplies installed as described in the Power supplies section.
- NVIDIA Quadro K600 requirements:
  - Maximum 128 GB system memory
- NVIDIA Quadro K2000 requirements:
  - No additional requirement
- NVIDIA Quadro K4000, K5000, K6000 requirements:
  - Only drive backplanes 8x 2.5" HS HDD Kit (feature A1JX) or Plus 8x 2.5" HS HDD Assembly Kit with Expander (feature A1JY) can be selected
- NVIDIA Grid K2 requirements:
  - Second processor required
  - When 2 GPUs selected, only drive backplanes 8x 2.5" HS HDD Kit (feature A1JX) or Plus 8x 2.5" HS HDD Assembly Kit with Expander (feature A1JY) can be selected

#### **Power supplies**

The server supports up to two redundant power supplies. Standard models come with one or two power supplies (model dependent). The following table lists the power supplies.

| Part number | Feature code | Description   | Maximum supported | Standard models where used           |
|-------------|--------------|---|-------------------|--------------------------------------|
| 94Y6668     | A1H6         | System x 550W High Efficiency<br>Platinum AC Power Supply | 2                 | A2x, B2x, C2x, C4x, 52x              |
| 94Y6669     | A1H5         | System x 750W High Efficiency<br>Platinum AC Power Supply | 2                 | D2x, F2x, G2x, H2x, J2x,<br>62x, GSx |
| 94Y7631     | A39N         | System x 750W High Efficiency<br>-48 V DC Power Supply    | 2                 | -                                    |
| 94Y6667     | A2EB         | System x 900W High Efficiency<br>Platinum AC Power Supply | 2                 | L2x, 32x, M2x                        |

Table 20. Power supplies

An AC power supply ships standard with one 2.8 m C13 - C14 power cord.

General power supply rules are as follows:

- Minimum of 1 and maximum of 2 power supplies per system
- If 2 installed, power supplies must be identical

#### 550W power supply restrictions

- GPUs not supported
- 135W processors not supported; 130W processors supported with restrictions as listed below.
- With 1 power supply installed and 2 processors 115W or lower:
  - Maximum 8 DIMMs
  - No Quad rank RDIMMs, LRDIMM or HCDIMM
  - Maximum 3 PCIe adapters (including mezzanine cards)
  - Maximum 16 drives
- With 1 power supply installed and 1 processors 130W or lower:
  - Maximum 12 DIMMs
  - No Quad rank RDIMMs, LRDIMM or HCDIMM
  - Maximum 3 PCIe adapters (including mezzanine cards)
  - Maximum 16 drives
- With 2 power supplies installed and 2 processors 115W or lower:
  - Maximum 16 DIMMs
  - No Quad rank RDIMMs, LRDIMM or HCDIMM
  - Maximum 3 PCIe adapters (including mezzanine cards)
  - Maximum 16 drives
- With 2 power supplies installed and 1 processor 130W or lower:
  - Maximum 12 DIMMs
  - No Quad rank RDIMMs, LRDIMM or HCDIMM
  - Maximum 4 PCIe adapters (including mezzanine cards) (if 4 adapters to be installed, one must be a mezzanine card)
  - Maximum 16 drives

#### 750W power supply restrictions

- With 1 power supply installed and no GPU adapter is selected:
  - Maximum 24 DIMMs
  - No Quad rank RDIMMs, LRDIMM or HCDIMM
  - Maximum 4 PCIe adapters (including mezzanine cards) (if 4 adapters to be installed, one must be a mezzanine card)
- With 1 power supply installed and GPU adapters are selected:
  - Maximum 1 Quadro K5000 or any supported quantity of Quadro K2000, K600
  - All other GPUs not supported
  - Processors up to 115W supported
  - Maximum 16 DIMMs
  - No Quad rank RDIMMs, LRDIMM or HCDIMM
  - Maximum 2 PCIe adapters (including mezzanine cards, excluding GPUs)
  - Maximum 8 drives

#### 900W power supply restrictions:

- With 1 power supply installed and no GPU adapter is selected, there is no restriction on drives, memory, processors or adapters
- With 1 power supply installed and certain GPU adapters are selected:
  - Maximum 1 Quadro K5000; or any supported quantity of Quadro K2000, K600
  - Maximum 24 DIMMs
  - No Quad rank RDIMMs, LRDIMM or HCDIMM
  - Maximum 2 PCIe adapters (including mezzanine cards, excluding GPUs)
- With 1 power supply installed and certain GPU adapters are selected:
  - Maximum 1 Quadro K6000, Grid K2
  - Maximum 16 DIMMs
  - No Quad rank RDIMMs, LRDIMM or HCDIMM
  - Maximum 12 drives
  - Maximum 2 PCIe adapters (including mezzanine cards, excluding GPUs)
- With 1 power supply installed and Tesla K40c is selected:
  - Maximum 16 DIMMs
  - No Quad rank RDIMMs, LRDIMM or HCDIMM
  - Maximum 10 drives
  - Maximum 2 PCIe adapters (including mezzanine cards, excluding GPUs)
- With 2 power supplies installed and Tesla K40c is selected:
  - Maximum 10 drives
  - No restriction on memory and PCIe adapters
- With 2 power supplies installed and 2 Grid K2 or 2 K6000 are selected:
  - Maximum 12 DIMMs
  - No Quad rank RDIMMs, LRDIMM or HCDIMM
  - Maximum 12 drives
  - Maximum 1 PCIe adapter (including mezzanine cards, excluding GPUs)
- 2 Quadro K5000 adapters supported with 2 power supply installed

#### Integrated virtualization

The server supports VMware ESXi installed on a USB memory key. The key is installed in a USB socket inside the server. The following table lists the virtualization options.

| Part number | Feature<br>code | Description                                    | Maximum<br>supported |
|-------------|-----------------|--|----------------------|
| 41Y8298     | A2G0            | Blank USB Memory Key for VMware ESXi Downloads | 1                    |
| 41Y8382     | A4WZ            | USB Memory Key for VMware ESXi 5.1 Update 1    | 1                    |

Table 21. Virtualization options

### Systems management

The server contains Integrated Management Module II (IMM2), which provides advanced serviceprocessor control, monitoring, and an alerting function. If an environmental condition exceeds a threshold or if a system component fails, the IMM2 lights LEDs to help you diagnose the problem, records the error in the event log, and alerts you to the problem. Optionally, the IMM2 also provides a virtual presence capability for remote server management capabilities.

The IMM provides remote server management through industry-standard interfaces:

- Intelligent Platform Management Interface (IPMI) Version 2.0
- Simple Network Management Protocol (SNMP) Version 3
- Common Information Model (CIM)
- Web browser

The optional Integrated Management Module Advanced Upgrade is required to enable the remote presence and blue-screen capture features. The remote presence feature provides the following functions:

- Remotely viewing video with graphics resolutions up to 1600x1200 at 75 Hz with up to 23 bits per pixel colors, regardless of the system state
- Remotely accessing the server using the keyboard and mouse from a remote client
- Mapping the CD or DVD drive, diskette drive, and USB flash drive on a remote client, and mapping ISO and diskette image files as virtual drives that are available for use by the server
- Uploading a diskette image to the IMM memory and mapping it to the server as a virtual drive

The blue-screen capture feature captures the video display contents before the IMM restarts the server when the IMM detects an operating-system hang condition. A system administrator can use the blue-screen capture to assist in determining the cause of the hang condition. The following table lists the remote management option.

Table 22. Remote management option

| Part<br>number | Feature<br>code |   |   | Models<br>where used |
|----------------|-----------------|---|---|----------------------|
| 90Y3901        | A1ML            | Integrated Management Module Advanced Upgrade | 1 | -                    |

All standard models ship with a pop-out light path diagnostics panel on the front of the server (See Figure 2). Configure-to-order (CTO) customers may elect to deselect this feature and instead have a basic light path diagnostics panel on the front of the server. The following table shows the two light path diagnostics features

Table 23. Light path diagnostics options

| Part number | Feature code | Description                     |   | Models<br>where used |
|-------------|--------------|---------------------------------|---|----------------------|
| None*       | A1LF         | System x Lightpath Kit          | 1 | -                    |
| 00Y7676     | A2U6         | System x Advanced Lightpath Kit | 1 | All models           |

\* CTO only

## **Operating systems**

The server supports the following operating systems:

- Microsoft Windows Server 2008 R2
- Microsoft Windows Server 2008, Datacenter x64 Edition
- Microsoft Windows Server 2008, Datacenter x86 Edition
- Microsoft Windows Server 2008, Enterprise x64 Edition
- Microsoft Windows Server 2008, Enterprise x86 Edition
- Microsoft Windows Server 2008, Standard x64 Edition
- Microsoft Windows Server 2008, Standard x86 Edition
- Microsoft Windows Server 2008, Web x64 Edition
- Microsoft Windows Server 2008, Web x86 Edition
- Microsoft Windows Server 2012
- Microsoft Windows Server 2012 R2
- Microsoft Windows Small Business Server 2008 Premium Edition
- Microsoft Windows Small Business Server 2008 Standard Edition
- Red Hat Enterprise Linux 5 Server with Xen x64 Edition
- Red Hat Enterprise Linux 5 Server x64 Edition
- Red Hat Enterprise Linux 6 Server Edition
- Red Hat Enterprise Linux 6 Server x64 Edition
- Red Hat Enterprise Linux 7
- Solaris 10 Operating System
- SUSE Linux Enterprise Server 10 for AMD64/EM64T
- SUSE Linux Enterprise Server 11 for AMD64/EM64T
- SUSE Linux Enterprise Server 11 for x86
- SUSE Linux Enterprise Server 11 with Xen for AMD64/EM64T
- SUSE Linux Enterprise Server 12
- SUSE Linux Enterprise Server 12 with Xen
- VMware ESX 4.1
- VMware ESXi 4.1
- VMware vSphere 5.0 (ESXi)
- VMware vSphere 5.1 (ESXi)
- VMware vSphere 5.5 (ESXi)

See the ServerProven® website for the latest information about the specific versions and service levels supported and any other prerequisites: www.lenovo.com/us/en/serverproven/

#### **Physical and electrical specifications**

Dimensions and weight:

- Height: 86.5 mm (3.4 in)
- Width: 445 mm (17.5 in)
- Depth: 746 mm (29.4 in)
- Weight:
  - Minimum configuration: 25 kg (55 lb)
  - Maximum configuration: 30 kg (65 lb)

Supported environment:

- Air temperature:
  - Server on: 5 °C to 40 °C (41 °F to 104 °F); altitude: 0 to 950 m (3,117 ft); decrease the maximum system temperature by 1 °C for every 175-m increase in altitude.
  - Server off: 5 °C to 45 °C (41 °F to 113 °F)
  - Maximum altitude: 3,050 m (10,000 ft), 5 °C to 28 °C (41 °F to 82 °F)
  - Shipment: -40 °C to +60 °C (-40 °F to 140 °F)

- Humidity:
  - Server on: 8% to 85%, maximum dew point 24 °C, maximum rate of change 5 °C/hr
  - Server off: 8% to 85%, maximum dew point 27 °C
- Design to ASHRAE Class A3, ambient of 36 °C to 40 °C (96.8 °F to 104 °F), with relaxed support:
  - Supports cloud like workload with no performance degradation acceptable (Turbo-Off).
  - Under no circumstance can any combination of worst case workload and configuration result in system shutdown or design exposure at 40 °C.
  - The worst-case workload (like Linpack, Turbo-On) might have performance degradation.
- Electrical:
  - Models with 900 W power supplies:
    - 100 to 127 (nominal) V ac; 50 Hz or 60 Hz; 10 A
    - 200 to 240 (nominal) V ac; 50 Hz or 60 Hz; 5 A
    - Input kilovolt-amperes (kVA) (approximately):
      - Minimum configuration: 0.15 kVA
      - Maximum configuration: 1.02 kVA
  - Models with 750 W ac power supplies:
    - 100 to 127 (nominal) V ac; 50 Hz or 60 Hz; 8.9 A
    - 200 to 240 (nominal) V ac; 50 Hz or 60 Hz; 4.5 A
    - Input kilovolt-amperes (kVA) (approximately):
      - Minimum configuration: 0.15 kVA
      - Maximum configuration: 0.9 kVA
  - Models with 550 W power supplies:
    - 100 to 127 (nominal) V ac; 50 Hz or 60 Hz; 6.5 A
    - 200 to 240 (nominal) V ac; 50 Hz or 60 Hz; 3.3 A
    - Input kilovolt-amperes (kVA) (approximately):
      - Minimum configuration: 0.16 kVA
      - Maximum configuration: 0.66 kVA
- BTU output:
  - Minimum configuration: 525 Btu/hr (123 watts)
  - Maximum configuration: 3480 Btu/hr (1020 watts)
- Noise level:
  - 6.6 bels (operating)
  - 6.4 bels (idle)

### Warranty options

The System x3650 M4 has a three-year warranty with 24x7 standard call center support and 9x5 Next Business Day onsite coverage. Also available are Lenovo Services warranty maintenance upgrades and post-warranty maintenance agreements, with a well-defined scope of services, including service hours, response time, term of service, and service agreement terms and conditions.

Lenovo warranty service upgrade offerings are country-specific. Not all warranty service upgrades are available in every country. For more information about Lenovo warranty service upgrade offerings that are available in your country, visit the Lenovo Services website:

https://www-304.ibm.com/sales/gss/download/spst/servicepac

The following table explains warranty service definitions in more detail.

| Term                     | Description   |  |
|--------------------------|---|--|
| On-site service          | A service technician will arrive at the client's location for equipment service.  |  |
| 24x7x2 hour              | A service technician is scheduled to arrive at the client's location within two hours after remote problem determination is completed. Lenovo provides service around the clock, every day, including Lenovo holidays.  |  |
| 24x7x4 hour              | A service technician is scheduled to arrive at the client's location within four hours after remote problem determination is completed. Lenovo provides service around the clock, every day, including Lenovo holidays.   |  |
| 9x5x4 hour               | A service technician is scheduled to arrive at the client's location within four business hours after remote problem determination is completed. Lenovo provides service 8:00 am - 5:00 pm in the client's local time zone, Monday-Friday, excluding Lenovo holidays. For example, if a customer reports an incident at 3:00 pm on Friday, the technician will arrive by 10:00 am the following Monday.   |  |
| 9x5 next<br>business day | A service technician is scheduled to arrive at the client's location on the business day after remote problem determination is completed. Lenovo provides service 8:00 am - 5:00 pm in the client's local time zone, Monday - Friday, excluding Lenovo holidays. Calls received after 4:00 pm local time require an extra business day for service dispatch. Next business day service is not guaranteed. |  |
| Committed<br>Repair      | Problems receive priority handling so that repairs are completed within the committed time of 6, 8, or 24 hours. Lenovo provides service 24 hours/day, every day, including Lenovo holidays.  |  |

Table 24. Warranty service definitions

The following Lenovo warranty service upgrades are available:

- Warranty and maintenance service upgrades:
  - Three, four, or five years of 9x5 or 24x7 service coverage
  - Onsite response from next business day to 2 or 4 hours
  - Committed repair service
  - Warranty extension of up to 5 years
  - Post warranty extensions
- Committed Repair Service

Committed Repair Services enhances the level of Warranty Service Upgrade or Post Warranty/Maintenance Service offering associated with the selected systems. Offerings vary and are available in select countries.

- Priority handling to meet defined time frames to restore the failing machine to good working condition
- Committed repair service levels are measured within the following coverage hours:
  - 24x7x6: Service performed 24 hours per day, 7 days per week, within 6 hours
  - 24x7x8: Service performed 24 hours per day, 7 days per week, within 8 hours
  - 24x7x24: Service performed 24 hours per day, 7 days per week, within 24 hours
- Hard Drive Retention

Lenovo's Hard Drive Retention service is a multi-drive hard drive retention offering that ensures your data is always under your control, regardless of the number of hard drives that are installed in your Lenovo server. In the unlikely event of a hard drive failure, you retain possession of your hard drive while Lenovo replaces the failed drive part. Your data stays safely on your premises, in your hands. The Hard Drive Retention service can be purchased in convenient bundles with our warranty upgrades and extensions.

• Microcode Support

Keeping microcode current helps prevent hardware failures and security exposure. There are two levels of service: analysis of the installed base and analysis and update where required. Offerings vary by country and can be bundled with other warranty upgrades and extensions.

• Remote Technical Support Services (RTS)

RTS provides comprehensive technical call center support for covered servers, storage, operating systems, and applications. Providing a single source for support of hardware and software issues, RTS can reduce problem resolution time, decreasing the cost to address technical problems and increasing uptime. Offerings are available for Windows, Linux, IBM Systems Director, VMware, Microsoft business applications, and Lenovo System x storage devices, and IBM OEM storage devices.

### **Regulatory compliance**

The server conforms to the following regulations:

- Energy Star 2.0
- FCC Verified to comply with Part 15 of the FCC Rules, Class A
- Canada ICES-003, issue 4, Class A
- UL/IEC 60950-1
- CSA C22.2 No. 60950-1
- NOM-019
- Argentina IEC60950-1
- Japan VCCI, Class A
- Australia/New Zealand AS/NZS CISPR 22, Class A
- IEC 60950-1(CB Certificate and CB Test Report)
- China CCC (GB4943), GB9254 Class A, GB17625.1
- Taiwan BSMI CNS13438, Class A; CNS14336-1
- Korea KN22, Class A; KN24
- Russia/GOST ME01, IEC-60950-1, GOST R 51318.22, GOST R 51318.24, GOST R 51317.3.2, GOST R 51317.3.3
- IEC 60950-1 (CB Certificate and CB Test Report)
- CE Mark (EN55022 Class A, EN60950-1, EN55024, EN61000-3-2, EN61000-3-3)
- CISPR 22, Class A
- TUV-GS (EN60950-1 /IEC60950-1,EK1-ITB2000)
- RoHS compliance (Directive 2002/95/EC)

## External disk storage expansion

The x3650 M4 supports attachment to external storage expansion enclosures, such as the EXP2500 series, by using the ServeRAID M5120 SAS/SATA Controller. The x3650 M4 can also be attached to supported external storage systems, such as the Lenovo Storage S3200 (see the External disk storage systems section).

| Part number   | Feature<br>code                                       | Description  | Maximum supported | Standard models where used |
|---|---|--|-------------------|----------------------------|
| 00AE938   | A5ND  | ServeRAID M5225-2GB SAS/SATA Controller                | 4                 | -                          |
| 81Y4478   | A1WX  | ServeRAID M5120 SAS/SATA Controller                    | 4                 | -                          |
| Features on D   | emand up  | grades for the M5225 (per server)                      |                   |                            |

| 81Y4546   | A1X3  | ServeRAID M5100 Series RAID 6 Upgrade                  | 1†                | -                          |

Table 25. RAID controllers and options for external disk storage expansion

\* The ServeRAID M5100 Series Battery Kit (81Y4508) is only supported with ServeRAID M5100 Series 512MB Cache/RAID 5 Upgrade (81Y4484). † The ServeRAID M5100 Series RAID 6 Upgrade (81Y4546) requires 512 MB or 1 GB cache upgrades. \*\* Cannot be installed if an internal tape drive is installed.

The ServeRAID M5225 SAS/SATA Controller has the following specifications:

- Eight external 12 Gbps SAS/SATA ports
- Supports 12, 6, and 3 Gbps SAS and 6 and 3 Gbps SATA data transfer rates
- Two external x4 mini-SAS HD connectors (SFF-8644)
- Supports 2 GB flash-backed cache (standard)
- Supports RAID levels 0, 1, 5, 10, and 50 (standard)
- Supports RAID 6 and 60 with the optional M5200 Series RAID 6 Upgrade
- Supports optional M5200 Series Performance Accelerator and SSD Caching upgrades
- PCle x8 Gen 3 host interface
- Based on the LSI SAS3108 12 Gbps ROC controller
- Supports connectivity to the EXP2512 and EXP2524 storage expansion enclosures

The ServeRAID M5120 SAS/SATA Controller has the following specifications:

- Eight external 6 Gbps SAS/SATA ports
- Two external x4 mini-SAS connectors (SFF-8088)
- Supports RAID levels 0, 1, and 10
- Supports RAID levels 5 and 50 with optional M5100 Series RAID 5 upgrades
- Supports RAID 6 and 60 with the optional M5100 Series RAID 6 Upgrade
- Supports 512 MB battery-backed cache or 512 MB, 1 GB, or 2 GB flash-backed cache
- 6 Gbps throughput per port
- PCIe x8 Gen 3 host interface
- Based on the LSI SAS2208 6 Gbps ROC controller
- Supports connectivity to the EXP2512 and EXP2524 storage expansion enclosures

For more information, see the following Lenovo Press Product Guides:

- ServeRAID M5120 SAS/SATA Controller http://lenovopress.com/tips0858
- ServeRAID M5225-2GB SAS/SATA Controller http://lenovopress.com/tips1258

The controllers support connectivity to the external expansion enclosures listed in the following table. Up to nine expansion enclosures can be daisy-chained per one controller external port. For better performance, distribute expansion enclosures evenly across both controller ports.

| Part number |                           | Maximum quantity supported per one RAID controller |
|-------------|---------------------------|--|
| 610012X     | EXP2512 Storage Enclosure | 17   |
| 610024X     | EXP2524 Storage Enclosure | 9  |

Table 26. External expansion enclosures

The external SAS cables listed in Table 27 support connectivity between external expansion enclosures and an external RAID controller (M5120 or M5225-2GB).

| Part number  | Description   | Maximum quantity supported per<br>one enclosure |  |
|--|---|---|--|
| M5120: Server to   | M5120: Server to Expansion enclosure connectivity (Mini-SAS x4 to Mini-SAS x4)        |   |  |
| 00WC017  | 1 m SAS Cable   | 1   |  |
| 00WC018  | 3 m SAS Cable   | 1   |  |
| M5225-2GB: Serv  | M5225-2GB: Server to Expansion enclosure connectivity (Mini-SAS HD x4 to Mini-SAS x4) |   |  |
| 00MJ162  | 0.6m SAS Cable (mSAS HD to mSAS)  | 1   |  |
| 00MJ163  | 1.5m SAS Cable (mSAS HD to mSAS)  | 1   |  |
| 00MJ166  | 3m SAS Cable (mSAS HD to mSAS)  | 1   |  |
| Expansion enclosure to Expansion enclosure connectivity (Mini-SAS x4 to Mini-SAS x4) |   |   |  |
| 00WC017  | 1 m SAS Cable   | 1   |  |
| 00WC018  | 3 m SAS Cable   | 1   |  |

Table 28 lists drives that are supported by EXP2512 external expansion enclosures.

| Part number      | Description                       | Maximum quantity supported per<br>one enclosure |  |
|------------------|-----------------------------------|---|--|

### External disk storage systems

The following table lists the external storage systems that are offered by Lenovo that can be used in x3650 M4 solutions.

| Part number          | Description   |  |  |
|----------------------|---|--|--|
| Lenovo Storage S2200 |   |  |  |
| 64112B1              | Lenovo Storage S2200 LFF Chassis SAS Single Controller, Rack Kit, 9x5NBD      |  |  |
| 64112B2              | Lenovo Storage S2200 LFF Chassis SAS Dual Controller, Rack Kit, 9x5NBD        |  |  |
| 64114B1              | Lenovo Storage S2200 LFF Chassis FC/iSCSI Single Controller, Rack Kit, 9x5NBD |  |  |
| 64114B2              | Lenovo Storage S2200 LFF Chassis FC/iSCSI Dual Controller, Rack Kit, 9x5NBD   |  |  |
| 64112B3              | Lenovo Storage S2200 SFF Chassis SAS Single Controller, Rack Kit, 9x5NBD      |  |  |
| 64112B4              | Lenovo Storage S2200 SFF Chassis SAS Dual Controller, Rack Kit, 9x5NBD        |  |  |
| 64114B3              | Lenovo Storage S2200 SFF Chassis FC/iSCSI Single Controller, Rack Kit, 9x5NBD |  |  |
| 64114B4              | Lenovo Storage S2200 SFF Chassis FC/iSCSI Dual Controller, Rack Kit, 9x5NBD   |  |  |
| Lenovo Storage S     | 3200  |  |  |
| 64113B1              | Lenovo Storage S3200 LFF Chassis SAS Single Controller, Rack Kit, 9x5NBD      |  |  |
| 64113B2              | Lenovo Storage S3200 LFF Chassis SAS Dual Controller, Rack Kit, 9x5NBD        |  |  |
| 64116B1              | Lenovo Storage S3200 LFF Chassis FC/iSCSI Single Controller, Rack Kit, 9x5NBD |  |  |
| 64116B2              | Lenovo Storage S3200 LFF Chassis FC/iSCSI Dual Controller, Rack Kit, 9x5NBD   |  |  |
| 64113B3              | Lenovo Storage S3200 SFF Chassis SAS Single Controller, Rack Kit, 9x5NBD      |  |  |
| 64113B4              | Lenovo Storage S3200 SFF Chassis SAS Dual Controller, Rack Kit, 9x5NBD        |  |  |
| 64116B3              | Lenovo Storage S3200 SFF Chassis FC/iSCSI Single Controller, Rack Kit, 9x5NBD |  |  |
| 64116B4              | Lenovo Storage S3200 SFF Chassis FC/iSCSI Dual Controller, Rack Kit, 9x5NBD   |  |  |
| IBM Storwize         | IBM Storwize  |  |  |
| 6096CU2              | IBM Storwize V3500 3.5-inch Dual Control Storage Controller Unit              |  |  |
| 6096CU3              | IBM Storwize V3500 2.5-inch Dual Control Storage Controller Unit              |  |  |
| 6099L2C              | IBM Storwize V3700 3.5-inch Storage Controller Unit                           |  |  |
| 6099S2C              | IBM Storwize V3700 2.5-inch Storage Controller Unit                           |  |  |
| 6099T2C              | IBM Storwize V3700 2.5-inch DC Storage Controller Unit                        |  |  |
| 6194L2C              | IBM Storwize V5000 LFF Control Enclosure                                      |  |  |
| 6194S2C              | IBM Storwize V5000 SFF Control Enclosure                                      |  |  |
| 6195SC5              | IBM Storwize V7000 2.5-inch Storage Controller Unit                           |  |  |

# **Top-of-rack Ethernet switches**

The following table lists the top-of-rack Ethernet switches that are offered by Lenovo that can be used in x3650 M4 solutions.

| Part number                         | Description                               |  |  |
|-------------------------------------|---|--|--|
| 1 Gb Ethernet top-                  | 1 Gb Ethernet top-of-rack switches        |  |  |
| 7159BAX                             | Lenovo RackSwitch G7028 (Rear to Front)   |  |  |
| 7159CAX                             | Lenovo RackSwitch G7052 (Rear to Front)   |  |  |
| 7159G52                             | Lenovo RackSwitch G8052 (Rear to Front)   |  |  |
| 10 Gb Ethernet top                  | 10 Gb Ethernet top-of-rack switches       |  |  |
| 7159BR6                             | Lenovo RackSwitch G8124E (Rear to Front)  |  |  |
| 7159G64                             | Lenovo RackSwitch G8264 (Rear to Front)   |  |  |
| 7159DRX                             | Lenovo RackSwitch G8264CS (Rear to Front) |  |  |
| 7159CRW                             | Lenovo RackSwitch G8272 (Rear to Front)   |  |  |
| 7159GR6                             | Lenovo RackSwitch G8296 (Rear to Front)   |  |  |
| 40 Gb Ethernet top-of-rack switches |   |  |  |
| 7159BRX                             | Lenovo RackSwitch G8332 (Rear to Front)   |  |  |

Table 32. Top-of-rack switches

For more information, see the list of Product Guides in the Top-of-rack switches category: http://lenovopress.com/systemx/tor

# Uninterruptible power supply units

The following table lists the uninterruptible power supply (UPS) units that are offered by Lenovo that can be used in x3650 M4 solutions.

| Part number | Description   |
|-------------|---|
| 55941AX     | RT1.5kVA 2U Rack or Tower UPS (100-125VAC)          |
| 55941KX     | RT1.5kVA 2U Rack or Tower UPS (200-240VAC)          |
| 55942AX     | RT2.2kVA 2U Rack or Tower UPS (100-125VAC)          |
| 55942KX     | RT2.2kVA 2U Rack or Tower UPS (200-240VAC)          |
| 55943AX     | RT3kVA 2U Rack or Tower UPS (100-125VAC)            |
| 55943KX     | RT3kVA 2U Rack or Tower UPS (200-240VAC)            |
| 55945KX     | RT5kVA 3U Rack or Tower UPS (200-240VAC)            |
| 55946KX     | RT6kVA 3U Rack or Tower UPS (200-240VAC)            |
| 55948KX     | RT8kVA 6U Rack or Tower UPS (200-240VAC)            |
| 55949KX     | RT11kVA 6U Rack or Tower UPS (200-240VAC)           |
| 55948PX     | RT8kVA 6U 3:1 Phase Rack or Tower UPS (380-415VAC)  |
| 55949PX     | RT11kVA 6U 3:1 Phase Rack or Tower UPS (380-415VAC) |

Table 33. Uninterruptible power supply units

#### **Lenovo Financial Services**

Lenovo Financial Services reinforces Lenovo's commitment to deliver pioneering products and services that are recognized for their quality, excellence, and trustworthiness. Lenovo Financial Services offers financing solutions and services that complement your technology solution anywhere in the world.

We are dedicated to delivering a positive finance experience for customers like you who want to maximize your purchase power by obtaining the technology you need today, protect against technology obsolescence, and preserve your capital for other uses.

We work with businesses, non-profit organizations, governments and educational institutions to finance their entire technology solution. We focus on making it easy to do business with us. Our highly experienced team of finance professionals operates in a work culture that emphasizes the importance of providing outstanding customer service. Our systems, processes and flexible policies support our goal of providing customers with a positive experience.

We finance your entire solution. Unlike others, we allow you to bundle everything you need from hardware and software to service contracts, installation costs, training fees, and sales tax. If you decide weeks or months later to add to your solution, we can consolidate everything into a single invoice.

Our Premier Client services provide large accounts with special handling services to ensure these complex transactions are serviced properly. As a premier client, you have a dedicated finance specialist who manages your account through its life, from first invoice through asset return or purchase. This specialist develops an in-depth understanding of your invoice and payment requirements. For you, this dedication provides a high-quality, easy, and positive financing experience.

For your region specific offers please ask your Lenovo sales representative or your technology provider about the use of Lenovo Financial Services. For more information, see the following Lenovo website: http://www.lenovofs.com
