\* 22.8 years means rated average life based on engineering testing and probability analysis where the bulb is used on average 3 hours/day, 7 days a week.  
\* At \$0.11 per kWh, this 3.5 watt, 1000 Candela (candlepower), LED bulb uses \$9.63 of electricity over its 25,000 hour life. This is a \$45.37 savings when compared to the \$55.00 required to run a 20 watt, 500 Candela, halogen bulb over the same period. Actual savings vary depending on cost per kWh.
