Datasheet

NEC MultiSync® E805 SST - One display fits all - The Next Generation Digital Interactive Whiteboard

Seamless operation of presentation systems and whiteboards is essential to achieving productivity, allowing you to concentrate on business and not on technology. The 80" eye-pleasing multi-touch-display with 350 cd/m² brightness offers the ideal digital canvas to facilitate creative and efficient collaboration in smaller-sized corporate meeting rooms or classrooms. ShadowSense™ technology with 10 real-time touch points, allows several people to interact in parallel which leads to much more efficient working results. Bundle the display with a Windows-based OPS Slot-in-PC for a simple and seamless solution.

Benefits

Intuitive Touch Behaviour – benefit from Windows Ink supported automatic recognition of interactions, whether touch gestures, pen writing or erasing, in MS Office applications.

Simple Plug & Play – easy set-up without the need to install any drivers on the host PC for all major operating systems.

Ease of Use – enhance the display with an optional “Windows based” Slot-in-PC using the integrated Ultra High Resolution OPS option slot, thereby simplifying installations and reducing the points of failure.

Save Time and Work more Efficiently – ShadowSense™ touch technology offers real-time collaboration in meetings, tracking all 10 touch points with the highest touch point accuracy.

Reliability at High Ambient Light Operation – enhanced filtering and special sensors allow operation even in the brightest ambient light conditions without causing ghost touches.
