Highlights

One remote for all lights

All of the LivingAmbiance products work together via the same intuitive remote control with which you can dim or change the colour of your lights – individually or together – in any combination you please. You can see which products work together by looking at the box or the product itself. If there is a SmartLink logo, it means the product will work with other SmartLink products.

Recall your scene with a touch

Press one of the three scene buttons to recall your saved lighting settings.

Store 3 lighting scenes

Set this luminaire, or a combination of luminaires, to your preferred setting. Choose your favourite colour(s) (including dim and saturation level). Press and hold one of the scene buttons to store it.

Dim one light or all

Dim each light individually, or in any combination

Easy to use remote control

Select a luminaire with just a touch, then scroll around the wheel to dim.
