* Preise inkl. gesetzlicher MwSt. zzgl. Versandkosten

Marke: INL

Bestell-Nr.: 33282

There are literally countless ways of increasing your desktop real estate which can improve the efficiency, enjoyment, and usability of your computer. With another monitor, you can look at more programs at the same time and do real multitasking. The way using a computer is supposed to be. Imagine surfing the internet, reading a spreadsheet and being able to read your email while being involved in an instant messaging conversation and at the same time. You can even watch a movie on one screen without the need to minimize and maximize every window in the other. Whether you're a video editor that needs more monitors, a business that needs to take control and see all the crucial data at once or a home business owner that needs a bit more space, InLine® USB 2.0 graphic adapter is the easiest and fastest way to fulfill your multitasking needs. It can easily mirror the main display, or extend left, right, above, or below. Can be rotated left, right, or upside-down. Specification:
