Refrigerant	R410A
Global Warming Potential, GWP	2087.5
Refrigerant leakage contributes to climate change. Refrigerant with lower global warming potential (GWP) would contribute less to global warming than a refrigerant with higher GWP, if leaked to the atmosphere. This appliance contains a refrigerant fluid with a GWP equal to 1725. This means that if 1 kg of this refrigerant fluid would be leaked to the atmosphere, the impact on global warming would be 1725 times higher than 1 kg of CO ₂ , over a period of 100 years. Never try to interfere with the refrigerant circuit yourself or disassemble the product yourself and always ask a professional.	-
