## Designed to be seen

Looks good off and on

Familiar shapes that you know and love. They use around 80% less energy than traditional light bulbs thanks to the latest LED energy-saving technology and last ten times longer. With EyeComfort†, for light that's easy on your eyes.

#### Benefits

##### Choose for the high-quality light

- True incandescent-like warm white light
- Learn about light

##### Choose a simple replacement for your old lamps

- Similar shape and size as standard incandescent bulbs
- No UV or InfraRed

##### Choose for a sustainable solution

- Long-life bulbs – Last up to 15 years

- Better for your wallet and your planet

##### Create the right light for your home

- Perfect for general room lighting

##### Comfortable LED light that is easy on your eyes

- Designed for the comfort of your eyes
- No visible flicker

# PHILIPS

## LED

### Features

#### Incandescent-like warm white

This bulb has a colour temperature of 2,700 K, providing you with a warm, tranquil atmosphere, perfect for relaxing. This 2,700 K light is ideal for home lighting design.

#### Replaces lustre incandescents

With its beautiful design and familiar shape, this energy-saving LED bulb is the perfect sustainable replacement for traditional incandescent bulbs.

#### 15,000-hour rated average life

With a lifetime of up to 15,000 hours, you can reduce the hassle of frequently replacing your light bulbs, and enjoy a perfect lighting solution for over 15 years.

#### Saves up to 80% energy

LED technology saves up to 80% energy compared to your standard bulb. It therefore pays for itself and saves you money year after year. It also helps to protect the environment.

#### Perfect for general lighting

Contemporary lighting with Philips LED standard bulbs for use in table lamps, floor lamps and pendant fixtures. Ideal for use in kitchens, kitchen island lighting, living rooms and dining rooms.

#### No UV or IR

The light has no infra-red component, so no heat is radiated. Also, there is no ultra-violet component in this light. These two characteristics mean that this light will not cause fabric and other items to fade.

#### Learn about light

Colour temperature: light can have different colour temperatures, indicated in units called Kelvin (K). Bulbs with a low Kelvin value produce a warm, more tranquil light, while those with a higher Kelvin value produce a cool, more energising light. CRI: the colour rendering index (CRI) is used to describe the effect of a light source on colour appearance. Natural sunlight has a CRI of 100. The CRI of Philips LED light bulbs is always higher than 80, which ensures that colours are shown as true and natural.

#### Gentle LEDs, easy on the eyes

It's easy to see how harsh lighting can strain the eyes. Too bright, and you get glare. Too soft and you experience flicker. Now you can gently light up your world with LEDs designed to go easy on the eyes, and create the perfect ambience for your home.

#### No visible flicker

When your light flickers in quick succession it could be hard on the eyes, cause headaches and even set off an attack for those with photosensitive epilepsy. It's both unpleasant and unnecessary. LEDs can flicker because of their rapid response to the driver current. However, because Philips LEDs are designed so that variations in your driver current's output are minimised, they eliminate the factors that cause flicker. So, you won't see it, not even a hint.

### Specifications

Please note that this is a pre-sales leaflet. The contents of this leaflet reflect the best of our knowledge per date and country mentioned above. The contents of this leaflet are subject to change without notice. Philips does not accept any liability as to the contents of this leaflet.

#### Bulb characteristics

Shape	Bulb
Cap/fitting	E27
Dimmable	No
Voltage	220–240 V
Wattage	7 W
Wattage equivalent	60 W

#### Power consumption

Energy efficiency label	A++
Power consumption per 1000h	7 kWh

## LED

### Light characteristics

EyeComfort	Eye Comfort
Light output	806 lumen
Beam angle	300 degree
Colour	Warm White
Colour temperature	2700 K
Light effect/finish	Warm White
Colour rendering index (CRI)	80
Starting time	<0.5 s
Warm-up time to 60% light	Instant full light
Application	Comfortable light Soft light

### Durability

Lifetime of lamp	15000 hour(s)
Number of switch cycles	30000
Lumen maintenance factor	0.7

Average life (at 2.7 hrs/day)	15 year(s)
-------------------------------	------------

### Bulb dimensions

Height	110 mm
Width	60 mm

### Other characteristics

Mercury content	0 mg
Power factor	0.55
Lamp current	50 mA

### Rated values

Rated power	7 W
Rated luminous flux	806 lumen
Rated lifetime	15000 hour(s)
Rated beam angle	300 degree
