

Cordless phone

- 1.6" display/amber backlight
- 2 handsets

D1202B/90

Simply Call

A compact phone with all the essential functions at your fingertips. Ergonomically designed to give excellent sound reproduction, this plug-and-play device makes calling your loved ones truly enjoyable.

Benefits

Nice and simple

- Easy to read 1.6" (4.1 cm) display with backlight
- Caller ID – so you always know who is calling*
- Ultimate convenience through easy setup
- Textured back cover for non-slip grip
- Up to 10 hours' talk time on a single charge

Crystal clear sound

- Automatic Volume Control offsets unwanted volume variation

- Optimised antenna layout for great reception in any room
- The Parametric Equaliser delivers pure and clear sound
- Advanced sound testing and tuning for superb voice quality

Eco-conscious product

- Low radiation (ECO and ECO+ modes) and power consumption

PHILIPS

Features

4.1 cm (1.6") display

Automatic Volume Control

Automatic Volume Control offsets variations in sound signal, which can be caused by distance, signal strength or the caller's phone — so what you hear always remains consistent. Reducing the audio amplification for strong signals, and increasing it for weak ones, means you can enjoy a smooth conversation without unwanted sound volume variation.

Caller ID*

Sometimes it's good to know who's calling before you answer. And our Caller ID lets you keep track of who's on the other end of the line.

Easy setup

Ultimate convenience through easy set up. Simplified installation - Plug and Play product

Eco-conscious model with ECO+

Philips phones are energy efficient and designed to be respectful to the environment. When ECO mode is activated, the emitted radiation is reduced by up to 60%, and up to 95% when the phone is charging. With ECO+ mode activation, the radiation drops to zero.

Non-slip grip

The rear of the handset is treated with a special texture for added comfort and better grip.

Optimised antenna layout

Our optimised antenna layout ensures strong and stable reception, even in areas of the house where cordless transmission is difficult. Now you can take a call wherever you are in the house, and enjoy a long, uninterrupted conversation even as you walk around.

Parametric Equaliser

Our telephones use parametric equalisation in the digital sound processing to fine tune the sound response back to the intended linear frequency response curve, delivering sound that is pure and clear, for each conversation.

Up to 10 hours' talk time

Advanced sound testing

We test the sound quality of our DECT phones the same way as high-end headphone manufacturers do. Using an advanced ear simulator, we can accurately re-create the way people actually hear. This helps our acoustic engineers to measure and fine-tune things like frequency response, distortion and overall hearing perception, to create perfect voice reproduction.
