

Micro music system

- 150 W
- Bluetooth®

BTM3360/12

Rich and powerful sound

Let your portable music play on at home. This Philips micro system comes with USB Direct and Audio in. Even with wireless music streaming via Bluetooth, it gives you fuss-free musical enjoyment.

Benefits

Enjoy your music from multiple sources

- Stream music over Bluetooth with multi-device pairing
- Play MP3-CD, CD and CD-R/RW
- USB Direct for easy MP3 music playback
- Audio-in for portable music playback

Enrich your sound experience

- Digital Sound Control for optimised music style settings
- Bass Reflex Speaker System delivers a powerful, deeper bass

- 150W RMS maximum output power

Easy to use

- Swap music instantly between 2 Bluetooth devices
- Digital tuning with preset stations for extra convenience
- Motorised CD loader for convenient access

Features

Multi-device pairing

Wireless Bluetooth® sound transmission is increasingly common in the world of sound systems, but most Bluetooth® compatible systems allow just one device to connect at a time. Multi-device pairing lets you pair up to two devices and switch between them instantly.

PHILIPS

Digital Sound Control

Digital Sound Control offers you a choice of pre-set Balance, Clear, Powerful, Warm and Bright controls you can use to optimise the frequency ranges for different musical styles. Each mode uses graphic equalizing technology to automatically adjust the sound balance and enhance the most important sound frequencies in your chosen music style. Ultimately, Digital Sound Control makes it easy for you get the most out of your music by precisely adjusting the sound balance to match the type of music you are playing.

USB Direct for easy MP3 music

Thanks to the complete file transferability, you can easily enjoy the convenience and fun of accessing more digital music via the built-in USB Direct.

Audio-in

The Audio-in connectivity allows direct playback of Audio-in content from portable media players. Besides the benefit of enjoying your favourite music in the superior sound quality delivered by the audio system, the Audio in is also extremely convenient as all you have to do is to plug your portable MP3 player into the audio system.

Bass Reflex Speaker System

Bass Reflex Speaker System delivers a deep bass experience from a compact loudspeaker box system. It differs from a conventional loudspeaker box system in the addition of a bass pipe that is acoustically aligned to the woofer to optimise the low frequency roll-off of the system. The result is deeper controlled bass and lower distortion. The system works by causing the air mass in the bass pipe to vibrate like a conventional woofer. Combined with the response of the woofer, the system extends the overall low frequency sounds to create a completely new dimension of deep bass.
