

Micro music system

- Bluetooth®
- with MULTIPAIR

BTM2460/12

## Hi-Fi stereo sound that fits your home

Connect up to two Bluetooth devices simultaneously or use USB Direct, customise your sound with Digital Sound Control. Connect any music device through audio-in to reinvigorate your music. An all-in-one slim, compact and wall mountable design.

### Benefits

#### Enrich your sound experience

- Bass Reflex Speaker System delivers a powerful, deeper bass
- Digital Sound Control for optimised music style settings
- 20W RMS maximum output power

#### Enjoy your music from multiple sources

- Play MP3-CD, CD and CD-R/RW
- USB Direct for easy MP3 music playback
- Audio-in for portable music playback

- Stream music over Bluetooth® with multi-device pairing
- Swap music instantly between 2 devices with MULTIPAIR

#### Design that blends into your interior

- Compact design fits any space, any lifestyle
- Wall-mountable option for flexible placement

**PHILIPS**

## Features

### USB Direct for easy MP3 music

Thanks to the complete file transferability, you can easily enjoy the convenience and fun of accessing more digital music via the built-in USB Direct.

### Audio-in

The Audio-in connectivity allows direct playback of Audio-in content from portable media players. Besides the benefit of enjoying your favourite music in the superior sound quality delivered by the audio system, the Audio in is also extremely convenient as all you have to do is to plug your portable MP3 player into the audio system.

### Bass Reflex Speaker System

Bass Reflex Speaker System delivers a deep bass experience from a compact loudspeaker box system. It differs from a conventional loudspeaker box system in the addition of a bass pipe that is acoustically aligned to the woofer to optimise the low frequency roll-off of the system. The result is deeper controlled bass and lower distortion. The system works by causing the air mass in the bass pipe to vibrate like a conventional woofer. Combined with

the response of the woofer, the system extends the overall low frequency sounds to create a completely new dimension of deep bass.

### Digital Sound Control

Digital Sound Control offers you a choice of pre-set Balance, Clear, Powerful, Warm and Bright controls you can use to optimise the frequency ranges for different musical styles. Each mode uses graphic equalizing technology to automatically adjust the sound balance and enhance the most important sound frequencies in your chosen music style. Ultimately, Digital Sound Control makes it easy for you get the most out of your music by precisely adjusting the sound balance to match the type of music you are playing.

### Swap music between 2 devices

Pair with 2 smart devices simultaneously so you can stream music from whichever device you want, without the hassle of un-pairing and re-pairing. To play a song on a different device, pause the song on the original device first and then play the new song on a different device to take over. It's perfect for sharing music with friends, at parties, or just playing different songs stored on different devices. Let friends and family pair at the same time, so you can swap between each other's music easily.

### Wall-mountable

The perfect combination of a slim and versatile design, your Philips audio system is cleverly designed to blend into your living space. The base of the audio system is a stand so the system can sit securely and nicely on any shelf or cabinet. When wall mounted you have all the same flexibility of the freestanding stand.

## Specifications
