Marke: INL

Bestell-Nr.: 33058I

The InLine® HiFi Audio to USB Converter is a high quality piece of equipment to convert 2-channel audio signals (analog stereo) into digital audio signals up to 192kHz / 24-bit, using the CMedia CMS6631A USB2.0 Audio chipset. This supports the latest USB Audio Device Class Definition (V2.0)

- Converter for digitizing analog audio signals at resolutions up to 192 kHz / 24-bit
 - Supports the recording of S/PDIF audio signals in 16/24-bit up to 192 kHz
 - Asynchronous mode to achieve low jitter.
 - Integrated low-jitter oscillator
 - Settings of the sample rate selectable
 - Supports ASIO and WASAPI
 - Output: USB 2.0 Micro-B connector
 - Input: Analog 2x RCA female (red / white) and digital Toslink connector (optical, S/PDIF)
 - Power supply via the USB port
 - Compatible with Windows 10, 8.1, 8, 7, Vista, XP
 - Please check whether the package contains the following items: 1x Audio to USB Converter 192 kHz / 24-Bit, 1x Audio cable 2x RCA male to 3.5mm Stereo plug, 1x Micro-USB cable, 1x User manual, Driver CD

Please note: Due to changes in the MacOS operating system, the SPDIF function is no longer supported as of MacOS 10.13 High Sierra.
