- Music transfer between 2 USB for easy music sharing
- Rip music from CDs, radio and karaoke onto USB device

##### Designed to party

- 260K LED lights for great party atmosphere
- Auto-DJ for automatic mixing of tracks on USB drive
- DJ Crossfader for mixing your tracks

# PHILIPS

## Features

### 260K LED lights

Add the ultimate atmosphere, ambience and passion to any party, with thousands of coloured lights that flicker, flash and flow in time with your music. Easily choose light colours to match your theme, or just pick one of the system's many presets. Flick the NX bass button to make the light show even more intense.

### Auto-DJ for automatic mixing

You can automate your tunes with Auto-DJ, which automatically mixes tracks on a connected USB drive. Add sound effects with the DJ jogwheel. Rock the house continuously!

### DJ Crossfader for mixing

Be the master of every party! DJ crossfader lets you mix your favourite tracks between channels A and B, so you can flow seamlessly between songs. Just select the device output for deck A (USB, Bluetooth®, CD, Audio in or tuner) to start the music, then choose the input device for deck B (USB or audio in).

To change tracks, swipe the fader from one side to the other for a smooth transition that keeps the party pumping.

### NX bass button

Available throughout the range, NX bass temporarily boosts bass and volume to the extreme. Hit the NX bass button to instantly juice up your sound, make lighting effects go wild and feel the immense bass of the subwoofers thundering through your bones.

### Stream music via Bluetooth®

If you've got a big music collection stored away on a smartphone, tablet or computer, stream it to a NITRO system using digital Bluetooth® wireless music streaming and make it sound incredible. Powerful sound is rarely this easy or this convenient.

### 2 USB for easy music sharing
