Easy to use

- Designed for easy and fast weight measurement

Designed to fit your bathroom

- Designed with a large screen to clearly show results
- Gives results in kilograms, stones and pounds
- Designed with soft edges for safe use
- Equipped with four carpet feet

Features

Accurate

Four high-precision sensors deliver accurate weight measurements.

PHILIPS

Body composition analysis

Provides body composition analysis based on weight, BMI and body fat percentage. Four high-precision sensors deliver accurate weight measurements. Bio-Impedance Analysis (BIA) sends a small unnoticeable current through the body and establishes the body fat percentage. BMI is calculated based on the weight and height of the user. You can easily view your results in the Philips HealthSuite health app.

Connected scale

Connects with the free Philips HealthSuite health app to give you more data and insights into your health and wellbeing. Each reading is synced directly on the easy-to-use dashboard of the Philips health app.

Phone compatibility

Supports transfer of your data to the Philips HealthSuite health app via Bluetooth® Smart so you can monitor changes over time. Works with: - iPhone®: Version iOS8+ , iPhone® 4S and newer. - Android: Android 4.4 KitKat+.

Multiple user identification

Automatically recognises you when you step on the scale and sends your measurement data to the Philips HealthSuite health app on your smartphone.

Large screen

Making it easy for you to read your measurement, with a large backlit LCD screen.

Specifications

Please note that this is a pre-sales leaflet. The contents of this leaflet reflect the best of our knowledge per date and country mentioned above. The contents of this leaflet are subject to change without notice. Philips does not accept any liability as to the contents of this leaflet.
