

#### Wireless multi-room music system

- wall-mountable
- CD, MP3-CD, USB, FM
- Bluetooth®
- with MULTIPAIR

BM50B/10

## One tap to play music in every room

The Philips izzy music system plays music via Bluetooth, CD/USB and FM. With the tap of a button, music from smartphones, CD/USB and radio stations will play simultaneously to any izzy speaker in any room. Easy setup with no router, password or app.

### Benefits

#### Enrich your sound experience

- 40W RMS maximum output power
- Digital Sound Control for optimised music style settings

#### Enjoy your music from multiple sources

- Play MP3-CD, CD and CD-R/RW
- Digital tuning with preset stations for extra convenience
- USB Direct for easy MP3 music playback
- Swap music instantly between 2 devices with MULTIPAIR

#### Philips izzylink™ for multiroom music

- Group up to 5 izzy with izzylink™ for multiroom enjoyment
- One tap to set up izzylink™, no router, no password, no apps
- Stream all your music source, CD, FM, USB, via izzylink™
- Play music in one room wirelessly via Bluetooth
- Change the master speaker in the group with just one tap

# PHILIPS

## Features

### izzylink™

izzylink™ is a wireless technology that uses the IEEE 802.11n standard to enable the link-up of multiple speakers to form a wireless network. The network connects up to five speakers without the need of a router, Wi-Fi password, or any smart device mobile app to set it up. You can add izzy speakers to the network easily to enjoy music playing at the same time in different rooms. Each speaker can still be switched between single mode for individual use or group mode for multiroom music with one tap.

### One tap to set up izzylink™

No router, no password, no apps needed for set up. Just long press the "GROUP" button on two speakers to set up for the first time. Repeat to add a 3rd, 4th, or 5th speaker. Each long press of the "Group" button adds one new speaker at a time. Multiroom music has never been easier. Once complete, the izzylink™ network will be stored even when the speaker is unplugged.

### Music from multiple sources

izzylink™ expands all the music source, your favourite apps from smartphone, tablet or computer, CDs, FM radio stations, USB, Audio-in wirelessly to every room.

## Specifications

Please note that this is a pre-sales leaflet. The contents of this leaflet reflect the best of our knowledge per date and country mentioned above. The contents of this leaflet are subject to change without notice. Philips does not accept any liability as to the contents of this leaflet.

### Connectivity

USB	USB host
-----	----------

### Play music in one room

Philips izzy speaker lets you stream all your favourite music from your phone, tablet or computer, no matter which music or radio app you use.

### Switch the lead speaker easily

In each izzylink™ group, any individual speaker can be the master, streaming music to the others. When you want to take the lead to share your own music, press the Bluetooth button on the speaker in your room and share that music from your device instantly. Other speakers in the same izzylink™ group will play the same music at the same time, in sync. Sharing music with each other is that easy.

### Swap music between 2 devices

Pair with 2 smart devices simultaneously so you can stream music from whichever device you want, without the hassle of un-pairing and re-pairing. To play a song on a different device, pause the song on the original device first and then play the new song on a different device to take over. It's perfect for sharing music with friends, at parties, or just playing different songs stored on different devices. Let friends and family pair at the same time, so you can swap between each other's music easily.
