AOC

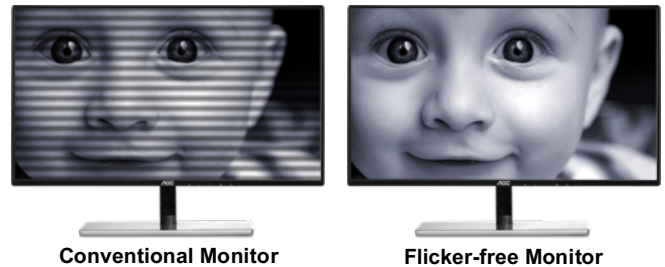

Frameless Design

AOC's I2379VHE has a frameless design that is perfect for saving desktop space, while giving you the optimum 23" viewable image screen with 16:9 aspect ratio. The LED backlit monitor runs a maximum 1920 x 1080 Full HD resolution. The screen itself has a matte anti-glare coating that won't leave fingerprints or smudges. The IPS panel allows you to view your spreadsheets or weekend movies from virtually any angle without compromising color uniformity. The buttons are located and laminated on the lower-right bezel for easy access.

Flicker-Free Technology for Reduced Eye Fatigue

The normal LED-backlit monitors adjust brightness using PWM (Pulse Width Modulation). This causes flicker although human eyes can't see it easily, it still causes discomfort over long periods of time. Flicker-free technology is using DC (Direct Current) backlight system for 79 Series to provide more comfortable and healthy viewing.

Clear Visibility and Vibrant Images

With a 20,000,000:1 contrast ratio and 5ms response time, the I2379VHE provides vibrant images and reveals darker image areas in greater depth. You can watch videos or play games without missing a beat.

User-Friendly and Eco-Friendly Features

The I2379VHE comes with VGA and HDMI connectivity. The I2379VHE is Energy Star with low-power consumption, and comes with AOC's e-Saver, Screen+, and iMenu software for both eco-friendly and user-friendly configuration and navigation.
