Highlights

Unique OneBlade Technology

The Philips OneBlade has a revolutionary new technology designed for facial styling and body grooming. It can trim, edge and shave any length of hair. Its dual protection system — a glide coating combined with rounded tips — makes shaving easier and more comfortable. Its shaving technology features a fast-moving cutter (200x per second) so it's efficient – even on longer hairs.

Trim it down

Trim your beard to a precise stubble length with one of the four included stubble combs. 1 mm for a 5 o'clock, 2 mm for stubble, 3 mm for a tight trim and 5 mm for long stubble.

Edge it up

Create precise edges with the dual-sided blade. You can shave in either direction to get great visibility and see every hair that you're cutting. Line up your style in seconds!

Shave it off

OneBlade doesn't shave as close as a traditional blade – so your skin stays comfortable. Go against the grain and shave off any length of hair easily.

Contour following

OneBlade follows the contours of your face, allowing you to effectively and comfortably trim and shave all areas of your face.

Dual-sided blade

OneBlade follows the contours of your face, allowing you to easily and comfortably trim and shave all areas. Use the dual-sided blade to style your edges and create clean lines by moving the blade in any direction.

4 click-on stubble combs

Attach one of the click-on combs to get the even stubble length you want.
