- Voice recording

Highlights

Up to 60 days standby time

The phone can be on and in standby mode continuously for up to 60 days on a single charge.

Up to 27 hours talk time

The phone can support up to 27 hours conversation on a single charge.

Dual SIM

Organize your life better and keep your contacts separate by using 2 different phone numbers. With Dual SIM, you don't need to carry 2 phones around.

Outer screen hand input

Thanks to a user-friendly inside keypad and a highly responsive outer touch screen, your Philips mobile phone gives the flexibility to touch or type when you need to key in data or text. The outer capacitive touch screen seamlessly works together with keypad for double convenient input experience.

VIP mode

Your Philips phone can automatically record the conversation without any extra operation, if the phone number is identified as VIP.

Free answer

Free answer mode allows you to speak and listen during a call without open the flip lid, which can provide you a safety condition in driving and free your hand in busy work.

Big key, voice and font

Your Philips mobile phone features large buttons with big printed fonts for dialing or texting by those with less dexterous fingers. And thanks to its large voice, you can now communicate comfortably and conveniently.

Dual 3.27" HVGA screen

The Philips dual screen phone gives you a new perspective, thanks to its two awesome 3.27" HVGA screens housed in a classical clamshell design. It can be used like a regular single screen phone when closed, allowing the user to access calls and messages, as well as view images and videos. Or you can choose to flip the phone open to use the ergonomic keypad for double convenience.
