Important

Read this important information carefully before you use the appliance and save it for future reference.

Danger

- Do not immerse the robot or the adapter in water or any other liquid.
- Do not use the robot on wet floors or in places where there is a risk of contact with water or immersion in water.
- Never let the robot operate on or near flammable substances and do not allow it to pick up ashes until they are cold.
- Do not use the robot in humid surroundings like bathrooms.
- Do not pour any liquid into the openings of the robot.

Warning

- Check if the voltage indicated on the adapter corresponds to the local mains voltage before you connect the adapter.
- The plug must be removed from the socket-outlet before cleaning or maintaining the appliance.
- Do not use the robot if the adapter or the robot itself is damaged or if the robot is not complete.
- If the mains cord is damaged, you must have it replaced by Philips, a service centre authorised by Philips or similarly qualified persons in order to avoid a hazard.
- This robot is designed for indoor household use only. Keep all doors leading outside closed.
- Do not use the robot in hazardous areas such as close to fireplaces, showers or swimming pools.
- This robot is better suited for cleaning hard floors. Its performance on soft floors can be somewhat limited.
- This product is not intended for use by persons (including children) with reduced physical, sensory or mental capabilities, or lack of experience and knowledge, unless they have been given supervision or instruction concerning use of the appliance by a person responsible for their safety.
- Children should be supervised to ensure that they do not play with the appliance.
- Keep the appliance and its cord out of the reach of children.
- Keep pets away from the robot. Do not let pets sit or stand on the robot.
- Keep loose clothing, hair and body parts away from the brushes of the robot.
- Remove all fragile and light objects from the floor and make sure the robot does not get entangled in the pull cords of blinds or curtains.
- Do not let the robot move over the mains cords of other appliances or other cables as this may cause a hazard.
- Switch off the robot if a dangerous situation occurs or if the robot behaves abnormally or gives off an abnormal smell.
- To prevent damage, do not use the robot if the filter is not present in the dust container or has not been placed properly in the dust container.
- Do not cover the robot or block the ventilation openings when the robot is cleaning. This may cause the robot to overheat.
- Do not store the robot at a temperature above 60°C or below -10°C.
- Do not use the robot in a room with a temperature above 45°C.
- The rechargeable battery may only be replaced by qualified service engineers. Take the robot to an authorized Philips service center to have the battery replaced when you can no longer recharge it or when it runs out of power quickly.
- Always return the appliance to an authorized Philips service center for examination or repair. Repair by unqualified persons could cause an extremely hazardous situation for the user.
- Do not incinerate, disassemble or expose the robot to temperatures above 60°C. The rechargeable battery may explode if overheated.

Caution

- The robot is fitted with three drop-off sensors in the bottom. These drop-off sensors are used to detect and avoid height differences. In some cases, the drop-off sensors may not detect a staircase or other height difference in time. The circumstances in your home (e.g. the light in the room, the colour or type of your floor) can affect how well or fast the drop-off sensors react. Therefore monitor the robot carefully, especially the first few times you use it and when you operate it near a staircase or another height difference.
- Do not put any tape or stickers over the drop-off sensors and make sure the drop-off sensors are cleaned regularly. If the drop-off sensors are covered or dirty, the robot is unable to detect a staircase or other height difference.
- When you use the robot to vacuum fine sand, lime, cement dust and similar substances, the pores of the filter become clogged.
- Never use scouring pads, abrasive cleaning agents or aggressive liquids such as alcohol, petrol or acetone to clean the appliance.
- Do not touch the mains plug with wet hands.

- Only use the adapter supplied to charge the robot.
- Set the power switch to off and unplug the docking station or the adapter if you are not going to use the robot for some time.
- Do not use the robot on high-pile carpets or on rugs with tassels.
- Do not clean the dust container with water or in the dishwasher.
