Highlights

Integrated vacuum system

Trim, style and finish without the mess. The powerful integrated vacuum system catches cut hair as you go along, giving you a mess-free trim and clean bathroom.

Innovative lift-and-trim system

Trim your stubble in one quick stroke. Our lift-and-trim system raises hairs into the optimal position so the double-sharpened blades effortlessly cut hairs for an easy, even finish.

Double-sharpened blades

Strong steel blades are double-sharpened and made to last a very long time to cut through even thick hair. They sharpen themselves by lightly brushing against each other as you trim.

Lock in length for an even trim

Select your preferred trim length by simply turning the zoom wheel on the handle until the length you want is displayed from 0.5 – 10mm with 0.5mm precision. Then use the lock in comb for an even trim.

Corded and cordless use

Charge your beard trimmer for 1 hour to get 60 minutes of cordless use. If you need more energy while trimming, you can simply plug the trimmer into the wall. This trimmer has been designed to run both cordless and plugged in.

Easy to clean

The double-sharpened steel blades sharpen themselves by lightly brushing against each other as you trim – meaning there is no need

for oil. The anti-static chamber makes it easy to empty the hairs into the bin. The blades can simply be removed and rinsed under the tap.

Built to last

We back this Philips trimmer with a 2 year guarantee: our grooming products are built to last. You'll never need to oil it, and it's compatible with all worldwide voltages.

Specifications

Cutting system

Precision (size of steps): By 0.5 mm

Range of length settings: 0.5 mm up to 10 mm
