

SD4000 Universal USB Docking Station & VU4000 USB 3.0 to HDMI 4K Video Adapter Bundle

KTG003DC

Product Description

From the leader in desktop productivity solutions, Kensington's SD4000 Universal Docking Station enables 4K Ultra HD, even when your laptop doesn't have a 4K graphics card. As well as serving as a central hub and charger for all your peripherals, the dock provides Ultra HD (3840x2160) to a single 4K monitor or TV via an HDMI or DisplayPort connection. When using two additional monitors instead of one, the dock provides 2K resolution to each screen (2048x1152). There are three available USB 3.0 ports that support transfer speeds of up to 5Gbps, including one that provides 2.1 AMP fast charging for a tablet or smartphone. There's also a gigabit Ethernet port so you have a reliable, wired network connection.

With more and more people realizing the productivity gains of working on a 4K monitor, we have an easy way for you to upgrade your laptop without the need for a 4K graphics card. The VU4000 4K Video Adapter simply plugs into a USB 3.0 port on your laptop and connect to the HDMI video cable of your monitor, projector or TV so you can see your content in Ultra HD. You can either mirror your laptop screen or extend it for increased productivity.

Features

- SD4000 Universal USB Docking Station:
 - 4K Ultra HD resolution (3840x2160) to one monitor via an HDMI cable or DisplayPort connection
 - Enables 4K UHD even if laptop does not have 4K graphics card
