## Healthier Air, Always

AeraSense, making the invisible visible

AeraSense is an innovative technology with the accuracy and performance of a professional sensor. It senses harmful particles smaller than even PM2.5, ensures the purifier adjusts for cleaner air output and provides real time feedback.

### High performance from start to finish

- AeraSense detects, measures and controls purification
- VitaShield naturally purifies UFP as small as 0.2microns
- 3 smart presettings for different airborne pollutants
- 3 smart presettings for different airborne pollutants
- 3 smart presettings for different airborne pollutants
- Aerodynamic architecture boosts efficient airflowAerodynamic

### Reassurance of consistent clean air delivery

- Real time indoor PM2.5 numerical feedback

### Designed for better user experience

- Low noise at Sleep Mode (20.5dba) - soft as a whisper
- Smart light control: adjust light to suit your preference

# PHILIPS

# Highlights

## AeraSense technology

AeraSense is a professional-grade sensor that accurately identifies fine particles that are even smaller than PM2.5 (including most common indoor airborne allergens). It then processes this information to ensure that the purifier's settings are at the ideal level for current air conditions, and for continuous re-assurance. Then gives you feedback of real time indoor air quality by showing PM2.5 level.

## Low noise

When in Silent Mode, the Purifier turns down its fan speed and noise level to allow a comfortable night's sleep. The lights on the Purifier can also dimmed and/or turned off to suit your preference.

## Real time feedback

The numerical PM2.5 indicator and the 4-step color ring provide real time feedback of your indoor air quality.

## Smart light control

Both AQI and the light on the UI can be dimmed and/or turned off avoid light disturbance for consumers.

## VitaShield IPS technology

VitaShield IPS with its aerodynamic design and NanoProtect Filter has a boosted clean air delivery rate up to 344 m<sup>3</sup>/hr\* (according to China GB/T 18801-2015). It can effectively remove ultra-fine particles as small as 20nm, effectively reduce harmful gases such as formaldehyde, TVOC and odor. Removes up to 99.9% bacteria and virus\*.

## Aerodynamic design

Aerodynamic architecture boosts efficient airflow

## Allergen Mode

The Allergen Mode includes a special event-detection algorithm from AeraSense - a professional grade sensor that can detect daily

events such as shaking pillow or a vacuum cleaner passing by. After accurately detecting these events, the purifier will automatically give an extra boost to airflow to instantly reduce the risk level of allergens to a minimum.

## Bacteria & Virus Mode

Bacteria & Virus particles are the ones seldom detected by air sensors. Hence the most effective way to reduce these particles is to significantly boost the airflow and increase the air exchange per hour. This mode boosts the Air flow, then the high quality HEPA filter in the Purifier effectively captures the bacteria and virus by 99.9%, ensuring cleaner air output.

## Pollution Mode

Indoor PM2.5 levels can increase far above local guidelines because of activities like cooking. Our advanced sensing technology - AeraSense, accurately detects invisible indoor air pollutants in real time, and then auto-boosts the Air Purifier's speed to reduce harmful particles, gases, for a cleaner air output.

# Specifications

## Design and finishing

- Air quality sensor(s): Aerasense PM2.5 sensor
- Color of control panel: Black
- Fan speed indicators: Silent, Speed 1, 2, 3, Turbo
- Material of main body: Plastic
- Color(s): White

## Performance

- CADR (formaldehyde): 200 m<sup>3</sup>/h
- Filters out PM2.5: in one hour, >99 %
- Filters out viruses: in 0.5 hr, 99.9 %
- CADR (cigarette smoke): 334 m<sup>3</sup>/h

## Technical specifications

- Cord length: 1.6 m
- Effective area: 24~41 m<sup>2</sup>
- Frequency: 50/60 Hz
- Power: 11~60 W

- Sound level: 20.5-51 dB(A)
- Voltage: 220 V

## Country of origin

- Made in: China

## Replacement

- Multi-care filter: FY2428

## Sustainability

- Stand-by power consumption: <0.5 W

## Weight and dimensions

- Dimensions of packaging (LxWxH): 412 x 294 x 612 mm
- Dimensions of product (LxWxH): 359 x 240 x 558 mm
- Weight incl. packaging: 9.3 kg
- Weight of product: 7.7 kg

\* Particle and formaldehyde CADR and CCM: tested by third party according to GB/T 18801-2008

\* 20 Nanometers: Tested by IUTA. According to 2008 Microbiological Risk Assessment Report of the World Health Organization (WHO), the avian influenza, human influenza viruses, Legionella, Hepatitis viruses and SARS coronavirus are larger than 20 nanometer (0,00002 mm).
