

14" Grid™ Advanced High-Impact Protection Backpack 20L

TSB857

Overview

The Targus 14" Grid™ Advanced Backpack offers high-impact protection plus stylish durability for the urban mobile professional. On any day, you might commute to work on crowded transportation, ride across town on your bike, or sprint for a meeting a few blocks away—all with your critical tech devices in tow. The Grid Advanced Backpack protects your laptop, tablet, and office supplies with a sleek, high-capacity design that's weather- and impact-resistant. Inspired by outdoor backpacking gear but tailored for the commuter, it is built tough enough to meet military grade drop test specifications, protecting your devices even at drops of up to 4 ft*. With advanced protective features like a suspended laptop vault with integrated tablet sleeve and a 360I memory foam shell to withstand shocks, your most important items are safe and secure. Padded, adjustable shoulder straps and an aerated, padded back ensure a comfortable fit once it's on your shoulders. Thoughtful features like a dedicated water bottle pocket and hidden stash pocket that doubles as a lumbar support add to its functionality.

Features

- Military grade drop protection survives up to a 4ft drop*
- Padded inner vault keeps your 14" laptop suspended and safe from impact
- 360I memory foam shell absorbs shock
- Convenient exterior water bottle pocket
- Weather resistant zipper and poly-coated base
- Aerated mesh padded back and adjustable shoulder straps
- Hidden stash pocket doubles as lumbar support
- Reflective accents increase visibility and safety
