

RMCARD305TAA Remote Management Card

Remotely manage, monitor and control your UPS from a web browser or SNMP management application.

The CyberPower RMCARD305TAA is a full-featured network UPS management device that remotely manages, monitors, and controls the Online Series UPS systems.

The internal card allows remote monitoring and control of a UPS via Web Browser, CLI, or NMS connection. By utilizing the auto-shutdown PowerPanel Business Edition software, servers and workstations stay protected from data loss due to power failure. An optional Environmental Sensor (ENVIROSENSOR) can be added to monitor ambient temperature and humidity.

The firmware can be updated by users to insure you have the latest features and updates. TLS security management is also provided to protect the integrity of the network.

A Three-Year Warranty ensures that this network management card has passed our highest quality standards in design, assembly, material, and workmanship.

Features

- Real time UPS monitoring
- Supports optional environment sensor management
- Remote management and configuration of UPS via Web Browser, CLI (Telnet or SSH), or NMS (SNMPv1 or v3)
- Automatic events notification via Email, SMS, SNMP Traps, and Syslog
- Logging of UPS Events and Status Records
- Support TCP/IP, UDP, SNMP v1 and v3, NTP, DNS, SMTP, IPv4 and v6, SSH, RADIUS, TLS, LDAP, LDAPS, Syslog, Windows Active Directory, CLI, and Secure FTP
- User upgradeable firmware
- Allows configuration and updating of multiple units at once
- Compatible with select Smart App Online models*

RMCARD305TAA Remote Management Card

Remotely manage, monitor and control your UPS from a web browser or SNMP management application.

GENERAL
